ALBERTA UTILITIES COMMISSION (AUC)

Alberta's electric system is regulated by the AUC. The AUC is an independent quasi-judicial agency that ensures the delivery of Alberta's utility service takes place in a manner that is fair, responsible and in the public's interest. The AUC must approve this project before EPCOR can begin construction. For more information about the AUC contact:

Toll-free: 1-833-511-4282

Phone: 310-4282

Website: www.auc.ab.ca

Email: info@auc.ab.ca

SCHEDULE UPDATE

In January 2023, we shared details about EPCOR's plans to serve the growing demand for electricity and to replace aging infrastructure in northeast Edmonton. This proposed project would see us build new transmission power lines and a new substation, as shown on the map.

Feedback is an important part of our planning process, and we want to thank everyone who asked questions about the project and provided input on the proposed route options. The initial timeline saw us sharing refined route options in late spring or early summer following a review of your feedback, and of constructability, social, economic, and environmental considerations. This review continues, and we now anticipate sharing route options for the proposed new transmission lines this fall.

NEXT STEPS

This project is still in its planning phase. Once we have completed our review, we will send out a project update in the fall. **At that time, there will be additional opportunities for you to provide feedback.** Visit our website or contact us for more information.
