

EPCOR ESSENTIALS

NOVEMBER 2023

Gas Usage Tips For Cold Weather

You're about to use your furnace more, but can you remember when you changed its filter? A new furnace filter every three months helps with efficiency and effectiveness. Plus, we recommend scheduling your annual maintenance appointment now to ensure everything works properly to keep you cozy when cold weather hits.

EPCOR Gives Back to United Way

EPCOR has given back to its local communities for more than 10 years through our annual United Way fundraising campaign. **This year, we are proud to have donated over \$76,000 to United Way.** We are grateful United Way serves our community and we will continue to be a company you can count on to give back.

WINTER WEATHER

These winter weather tips help lower your usage and your bill. Try these cost-friendly tips:

- Limit use of ventilation fans in bathrooms and kitchens as they can blow away your warm air
- Set your thermostat to 65-68°F during day and 58-60°F at night
- Use blinds or window coverings on each window and keep them open on sunny days and closed at night
- Adjust ceiling fans to push hot air down

Celebrating Native American Heritage Month

November is a time to celebrate the rich and diverse cultures, traditions, histories and to acknowledge the important contributions of indigenous populations. Native American Heritage Month is an opportune time to learn about tribes, raise general awareness about the unique challenges Native people have faced and continue to face. Learn more about the dynamic story of Native Americans at your local museum or library.

Staying Warm During Winter Weather

Gas furnaces, stoves and fireplaces can keep things cozy during cold weather. Save on your bill by trapping the warm air in your home as much as possible. Check the insulation of your windows and doors to stay warm while saving money.

How to Handle Holiday Season With Natural Gas Appliances

With more family, friends and food coming up this holiday season, you may notice an uptick in your monthly gas bill, especially if you're hosting guests and there's an increase in hot showers and loads of laundry. In that case, you may still be able to control your usage with other gas-saving tips around the home, such as setting your water heater temperature and properly loading your clothes dryer.
