EPCOR Water Arizona, Inc.  
Derivation of Mean Equity Risk Premium Based Studies  
Using Holding Period Returns and  
Projected Market Appreciation of the S&P Utility Index

| <u>Line No.</u> |  | <u>Implied Equity Risk</u> |
|-----------------|--|----------------------------|
| 1.              | Historical Equity Risk Premium (1)   | 4.02 %                     |
| 2.              | Regression of Historical Equity Risk Premium (2)   | 4.97                       |
| 3.              | Forecasted Equity Risk Premium based on Projected Total Return on the S&P Utilities Index (Bloomberg, Value Line, and S&P Capital IQ Data) (3) | <u>5.21</u>                |
| 4.              | Average Equity Risk Premium (4)  | <u><u>4.73 %</u></u>       |

- Notes: (1) Based on S&P Public Utility Index monthly total returns and Moody's Public Utility Bond average monthly yields from 1928-2023. Holding period returns are calculated based upon income received (dividends and interest) plus the relative change in the market value of a security over a one-year holding period.
- (2) This equity risk premium is based on a regression of the monthly equity risk premiums of the S&P Utility Index relative to Moody's A2 rated public utility bond yields from 1928 - 2023 referenced in note 1 above.
- (3) Using data from Bloomberg, Value Line, and S&P Capital IQ for the S&P Utilities Index, an expected return of 10.66% was derived based on expected dividend yields as a proxy for income returns and long-term growth estimates as a proxy for market appreciation. Subtracting the expected A2 rated public utility bond yield of 5.45%, calculated on line 3 of page 1 of this Schedule results in an equity risk premium of 5.21%. (10.66% - 5.45% = 5.21%)
- (4) Average of lines 1 through 4.

Notes on page 2 of this Schedule.

EPCOR Water Arizona, Inc.  
Notes to Accompany the Application of the CAPM and ECAPM

Notes:

- (1) The market risk premium (MRP) is derived by using four different measures from four sources: Kroll, Value Line, Bloomberg, and S&P Capital IQ as illustrated below:

**Measure 1: Kroll Arithmetic Mean MRP (1926-2023)**

|   |         |
|---|---------|
| Arithmetic Mean Monthly Returns for Large Stocks 1926-2023:   | 12.16 % |
| Arithmetic Mean Income Returns on Long-Term Government Bonds: | 4.99    |
| MRP based on Kroll Historical Data:                           | 7.17 %  |

**Measure 2: Application of a Regression Analysis to Kroll Historical Data (1926-2023)**

8.21 %

**Measure 3: Value Line Projected MRP (Thirteen weeks ending April 5, 2024)**

|  |         |
|--|---------|
| Total projected return on the market 3-5 years hence*:                 | 12.10 % |
| Projected Risk-Free Rate (see note 2):                                 | 4.15    |
| MRP based on Value Line Summary & Index:                               | 7.95 %  |
| *Forecasted 3-5 year capital appreciation plus expected dividend yield |         |

**Measure 4: Bloomberg, Value Line, and S&P Capital IQ Projected Return on the Market based on the S&P 500**

|   |         |
|---|---------|
| Total return on the Market based on the S&P 500:            | 14.79 % |
| Projected Risk-Free Rate (see note 2):                      | 4.15    |
| MRP based on Bloomberg, Value Line, and S&P Capital IQ data | 10.64 % |

Average of all MRP Measures: 8.49 %

- (2) For reasons explained in the Direct Testimony, the appropriate risk-free rate for cost of capital purposes is the average forecast of 30 year Treasury Bonds per the consensus of nearly 50 economists reported in Blue Chip Financial Forecasts. (See pages 7 and 8 of Schedule DWD-4.) The projection of the risk-free rate is illustrated below:

|                     |        |
|---------------------|--------|
| Second Quarter 2024 | 4.30 % |
| Third Quarter 2024  | 4.20   |
| Fourth Quarter 2024 | 4.20   |
| First Quarter 2025  | 4.10   |
| Second Quarter 2025 | 4.10   |
| Third Quarter 2025  | 4.00   |
| 2025-2029           | 4.10   |
| 2030-2034           | 4.20   |
|                     | 4.15 % |

- (3) Average of Column 6 and Column 7.

\*From 2024 Kroll Cost of Capital Navigator

Notes:

- (1) From page 2 of this Schedule.
- (2) Gleaned from Columns [B] and [C] on the bottom of this page. The appropriate decile (Column [A]) corresponds to the market capitalization of the proxy group, which is found in Column [1].
- (3) Corresponding risk premium to the decile is provided in Column [D] on the bottom of this page.
- (4) Line No. 1 Column [3] - Line No. 2 Column [3]. For example, the 3.49% in Column [4], Line No. 2 is derived as follows 3.49% = 4.7% - 1.21%.

1 AIAC Refunds Paid Post Test Year

2

3 In an effort to reduce the effects of regulatory lag and the need for more frequent rate cases, the Company is adjusting  
 4 Advances in Aid of Construction (AIAC) for known and measurable refunds to be paid in the period post test year and prior to  
 5 expected implementation of rates from this current case. Refunds for 2024 are calculated based on refunds issued in 2023 and  
 6 consider terms left on each contract.

1 AIAC Refunds Paid Post Test Year

2

3 In an effort to reduce the effects of regulatory lag and the need for more frequent rate cases, the Company is adjusting Advances  
4 in Aid of Construction (AIAC) for known and measurable refunds to be paid in the period post test year and prior to expected  
5 implementation of rates from this current case. Refunds for 2024 are calculated based on refunds issued in 2023 and consider  
6 terms left on each contract.

1 AIAC Refunds Paid Post Test Year

2

3 In an effort to reduce the effects of regulatory lag and the need for more frequent rate cases, the Company is adjusting  
 4 Advances in Aid of Construction (AIAC) for known and measurable refunds to be paid in the period post test year and  
 5 prior to expected implementation of rates from this current case. Refunds for 2024 are calculated based on refunds  
 6 issued in 2023 and consider terms left on each contract.

1 Vactor Trucks Reallocation

2

3 Vactor and Sludge Trucks are exclusively used in Wastewater Operations. This adjustment removes all Vactor and  
 4 Sludge Trucks that are in 7A Arizona Corporate from the San Tan water allocation and from the San Tan Wastewater  
 5 allocation since San Tan has its own vactor trucks.

6

1 AIAC Refunds Paid Post Test Year

2

3 In an effort to reduce the effects of regulatory lag and the need for more frequent rate cases, the Company is adjusting  
 4 Advances in Aid of Construction (AIAC) for known and measurable refunds to be paid in the period post test year and prior  
 5 to expected implementation of rates from this current case. Refunds for 2024 are calculated based on refunds issued in  
 6 2023 and consider terms left on each contract.

1 Annualization of Revenues and Expenses

2  
 3 Due to growth in the San Tan area during 2023, it is appropriate to annualize revenues and certain customer related expenses for the year-end customer  
 4 population during the year, rather than the historical amount.  
 5

1 Removal of Disallowable Items

2

The Company has removed expenses that would typically be disallowed for ratemaking purposes, such as charitable and civic contributions and other miscellaneous expenses that are normally not recoverable from customers. While the Company still believes these expenses should be recoverable through rates, they have been removed to minimize issues in dispute. Also removed are non-Arizona related expenses from corporate allocations.

1 Annualize Labor & Labor Related Expenses

2

3 The Company has adjusted labor costs to reflect 12 months of costs to annualize for certain positions that were created or filled during the test year as well  
 4 as known increases to labor costs of 3%. This adjustment also annualizes the various employee benefit-related items including group insurance, 401(k), and  
 5 pension expense. Group Insurance includes premiums for life insurance, medical insurance, dental insurance, long-term disability insurance and short-term  
 6 disability. Also included is the annualization of the Company's contribution to its employees' 401(k) retirement savings program.

1 Removal of 50% of Performance Based Compensation

2  
 3 The Performance Based Compensation program contains metrics designed to incentivize employees to 1) work safely by requiring achievement of an annual  
 4 OSHA Recordable Incident Rate or lower, 2) achieve specified operational efficiency measures regarding water loss statistics and setting reduction targets, as  
 5 well as obtaining targets for completing capital projects on time and at or under budget, and 3) meet or exceed goals for providing excellent customer service  
 6 and accurate and timely customer billing. Each of these 3 targets is weighted at 30 percent with the remaining 10 percent based upon achieving a financial  
 7 target focused on earning the authorized rate of return. This pro forma adjustment removes 50 percent of the target for Performance Based Compensation  
 8 Plan.  
 9

1 Adjust Corporate Allocations

2

3 Corporate Allocation as of 12/31/23 has been annualized for one year with this adjustment. Corporate Allocations are costs associated with operational  
 4 services provided by EPCOR Utilities, Inc. ("EU") including Human Resources, Accounting and Reporting Functions, Legal, and Treasury Management  
 5 Services. This adjustment removes Public and Governmental Affairs costs as well as the 50% of the Performance Based Compensation plan and also adjusts  
 6 labor costs by 3% for 2024 and 2025.

7

1 Tank Maintenance

2  
 3 Tank maintenance expenses are often large and vary from year to year. To levelize tank maintenance expenses for the test year, the Company has adjusted  
 4 the expenses to reflect the average cost of tank maintenance over a planned maintenance program. The program maps out the anticipated frequency and  
 5 amount of the costs on a district level by storage tank. Costs are then averaged over each district's approved maintenance program.

1 Transition Costs

2  
 3 Decision No. 77854 (issued December 23, 2020) authorized the deferral of non-recurring transaction and integration costs associated with acquiring  
 4 Johnson's systems and integrating Johnson's customers and systems into EPCOR Water Arizona Inc., so EPCOR can request recovery in a future rate case.  
 5 EPCOR requests recovery of these costs over a three-year period.  
 6

1 Annualization of Revenues and Expenses

2

3 Due to growth in the San Tan area during 2023, it is appropriate to annualize revenues and certain customer related expenses for the year-end customer  
 4 population during the year, rather than the historical amount.

1 Removal of Disallowable Items

2

3 The Company has removed expenses that would typically be disallowed for ratemaking purposes, such as charitable and civic contributions and other  
 4 miscellaneous expenses that are normally not recoverable from customers. While the Company still believes these expenses should be recoverable through  
 5 rates, they have been removed to minimize issues in dispute. Also removed are non-Arizona related expenses from corporate allocations.  
 6

1 Annualize Labor & Labor Related Expenses

2

3 The Company has adjusted labor costs to reflect 12 months of costs to annualize for certain positions that were created or filled during the test year as well  
 4 as known increases to labor costs of 3%. This adjustment also annualizes the various employee benefit-related items including group insurance, 401(k), and  
 5 pension expense. Group Insurance includes premiums for life insurance, medical insurance, dental insurance, long-term disability insurance and short-term  
 6 disability. Also included is the annualization of the Company's contribution to its employees' 401(k) retirement savings program.

1 Removal of 50% of Performance Based Compensation

2  
 3 The Performance Based Compensation program contains metrics designed to incentivize employees to 1) work safely by requiring achievement of an annual  
 4 OSHA Recordable Incident Rate or lower, 2) achieve specified operational efficiency measures regarding water loss statistics and setting reduction targets,  
 5 as well as obtaining targets for completing capital projects on time and at or under budget, and 3) meet or exceed goals for providing excellent customer  
 6 service and accurate and timely customer billing. Each of these 3 targets is weighted at 30 percent with the remaining 10 percent based upon achieving a  
 7 financial target focused on earning the authorized rate of return. This pro forma adjustment removes 50 percent of the target for Performance Based  
 8 Compensation Plan.

1 Adjust Corporate Allocations

2

3 Corporate Allocation as of 12/31/23 has been annualized for one year with this adjustment. Corporate Allocations are costs associated with operational  
 4 services provided by EPCOR Utilities, Inc. ("EUI") including Human Resources, Accounting and Reporting Functions, Legal, and Treasury Management  
 5 Services. This adjustment removes Public and Governmental Affairs costs as well as the 50% of the Performance Based Compensation plan and also adjusts  
 6 labor costs by 3% for 2024 and 2025.

7

1 Insurance Other Than Group

2

3 Insurance Other Than Group consists of several separate components. Annually, the Company reports certain business statistics to its insuring agencies  
 4 including Revenues, Plant Balances, Employee Count, Total Payroll and Vehicle Counts. Each of these components is adjusted annually based on these  
 5 statistics. This adjustment is updating the premiums to the 2024 levels.

1 Tank Maintenance

2

3 Tank maintenance expenses are often large and vary from year to year. To levelize tank maintenance expenses for the test year, the Company has adjusted  
4 the expenses to reflect the average cost of tank maintenance over a planned maintenance program. The program maps out the anticipated frequency and  
5 amount of the costs on a district level by storage tank. Costs are then averaged over each district's approved maintenance program.

DEVELOPMENT OF ALLOCATION FACTORS  
FACTORS FOR ALLOCATING COST OF SERVICE TO CUSTOMER CLASS

FACTOR A. ALLOCATION OF COMMODITY COSTS.

Factors are based on the pro forma test year average daily consumption for each customer classification.

| Classification<br>(1) | Average Daily<br>Consumption,<br>1000 Gallons<br>(2) | Allocation<br>Factor<br>(5) |
|-----------------------|--|-----------------------------|
| Residential           | 6,815  | 0.6986                      |
| Commercial            | 590  | 0.0605                      |
| OPA                   | 98   | 0.0100                      |
| Construction          | 2  | 0.0002                      |
| Irrigation            | 2,251  | 0.2307                      |
| Total                 | 9,756  | 1.0000                      |

FACTOR B. ALLOCATION OF MAXIMUM DAY DEMAND COSTS - TREATMENT AND PUMPING.

Factors are based on the maximum day demand for each customer classification.

| Customer<br>Classification<br>(1) | Average Daily<br>Consumption,<br>1000 Gallons<br>(2) | Peak Day<br>Factor<br>(3) | Rate of Flow,<br>1000 Gallons<br>Per Day<br>(4)=(2)x(3) | Allocation<br>Factor<br>(5) |
|-----------------------------------|--|---------------------------|---|-----------------------------|
| Residential                       | 6,815  | 2.00                      | 13,654  | 0.6699                      |
| Commercial                        | 590  | 1.69                      | 998   | 0.0490                      |
| OPA                               | 98   | 2.26                      | 221   | 0.0108                      |
| Construction                      | 2  | 0.60                      | 1   | 0.0000                      |
| Irrigation                        | 2,251  | 2.45                      | 5,508   | 0.2702                      |
| Total                             | 9,756  |                           | 20,382  | 0.9999                      |

FACTOR C. ALLOCATION OF MAXIMUM HOUR DEMAND COSTS.

Factors are based on the maximum hour demand for each customer classification.

| Customer<br>Classification<br>(1) | Average Hourly<br>Consumption,<br>1000 Gallons<br>(2) | Peak Hour<br>Factor<br>(3) | Rate of Flow,<br>1000 Gallons<br>Per Hour<br>(4)=(2)x(3) | Allocation<br>Factor<br>(5) |
|-----------------------------------|---|----------------------------|--|-----------------------------|
| Residential                       | 284   | 3.46                       | 982  | 0.6699                      |
| Commercial                        | 25  | 2.92                       | 72   | 0.0489                      |
| OPA                               | 4   | 3.91                       | 16   | 0.0108                      |
| Construction                      | 0   | 1.04                       | 0  | 0.0001                      |
| Irrigation                        | 94  | 4.22                       | 396  | 0.2703                      |
| Total                             | 406   |                            | 1,466  | 1.0000                      |

**Service Line and Meter Installation Charges**

In addition to all other applicable rates and charges in this tariff, each customer requesting new water service shall pay a Service Line Meter Installation Charge for each meter requested, as follows:

| Meter Size              | Service Line | Meter Installation | Total      |
|-------------------------|--------------|--------------------|------------|
| 5/8" X 3/4-Inch Meter   | \$385.00     | \$135.00           | \$520.00   |
| 3/4-Inch Meter          | \$385.00     | \$215.00           | \$600.00   |
| 1-Inch Meter            | \$435.00     | \$255.00           | \$690.00   |
| 1-1/2 - Inch Meter      | \$470.00     | \$465.00           | \$935.00   |
| 2 - Inch Turbine Meter  | \$630.00     | \$965.00           | \$1,595.00 |
| 2 - Inch Compound Meter | \$630.00     | \$1,690.00         | \$2,320.00 |
| 3 - Inch Turbine Meter  | \$805.00     | \$1,470.00         | \$2,275.00 |
| 3 - Inch Compound Meter | \$845.00     | \$2,265.00         | \$3,110.00 |
| 4 - Inch Turbine Meter  | \$1,170.00   | \$2,350.00         | \$3,520.00 |
| 4 - Inch Compound Meter | \$1,230.00   | \$3,245.00         | \$4,475.00 |
| 6 - Inch Turbine Meter  | \$1,730.00   | \$4,455.00         | \$6,185.00 |
| 6- Inch Compound Meter  | \$1,770.00   | \$6,280.00         | \$8,050.00 |
| 8- Inch and Larger      | At Cost      | At Cost            | At Cost    |

**Terms and Conditions**

The Service Line and Meter Installation Charge shall be refundable to the customer pursuant to A.A.C. R14-2-405(B)(2). The customer shall be the owner of and shall be solely responsible for the design, installation, maintenance, repair, operation and cost of the service line on the customer's side of the water meter.

An applicant for water service shall pay to the Company, as a refundable advance in aid of construction the full cost to provide the new service line and meter.

In addition to the collection of regular rates, the company will collect from its customers a proportionate share of any privilege, sales, use, franchise or other governmental tax. Per Commission Rule 14-2-409(D)(5).

All advances and/or contributions are to include labor, materials, overheads, and all applicable taxes, including all gross-up taxes for income taxes, if applicable.

EPCOR Water Arizona Inc.  
Docket No. WS-01303A-24-0130  
Test Year Ended December 31, 2023

## H-6 Schedule

San Tan Water

San Tan Water District  
(Name of Service Area)

**TABLE OF CONTENTS**

**GENERAL WATER SERVICE**

Residential, Commercial, Industrial, Irrigation and Public Authority  
Terms and Conditions

Sheet No. 1.0  
Sheet No. 1.1 – 1.2

**NON-POTABLE WATER**

Non-Potable Central Arizona Project Water Service

Sheet No. 2.0 – 2.1

**FIRE PROTECTION**

Reserved

Sheet No. 3.0

**CUSTOMER ASSISTANCE PROGRAMS**

Low Income Assistance Program  
Deployed Service Member Credit  
Disabled Military Veteran Credit

Sheet No. 4.0 – 4.1  
Sheet No. 4.2 – 4.3  
Sheet No. 4.4 – 4.5

**ADJUSTOR MECHANISMS**

Sustainable Water Surcharge  
Rate Case Expense Surcharge

Sheet No. 5.0 – 5.1  
Sheet No. 5.2

**MISCELLANEOUS SERVICE CHARGES**

Service Charges  
Service Line and Meter Installation Charges

Sheet No. 6.0  
Sheet No. 6.1

**HOOK-UP FEES**

Common Facilities Hook-Up Fee

Sheet No. 7.0 – 7.4

**BEST MANAGEMENT PRACTICES**

Public Education Program Tariff  
New Homeowner Landscape Information Tariff BMP 2.3  
Residential Audit Program Tariff BMP 3.1  
Customer High Water Use Inquiry Resolution Tariff BMP 3.6  
Customer High Water Use Notification Tariff BMP 3.7  
Water Waste Investigations and Information Tariff BMP 3.8  
Leak Detection Program Tariff BMP 4.1  
Meter Repair and/or Replacement Tariff BMP 4.2  
Water System Tampering Tariff BMP 5.2  
Low Water Use Landscaping Requirements Tariff for Model  
Homes in New Residential Developments BMP 5.5

Sheet No. 8.0  
Sheet No. 8.1  
Sheet No. 8.2  
Sheet No. 8.3  
Sheet No. 8.4 – 8.5  
Sheet No. 8.6  
Sheet No. 8.7 – 8.8  
Sheet No. 8.9  
Sheet No. 8.10  
Sheet No. 8.11 – 8.12

**CURTAILMENT TARIFF**

Sheet No. 9.0 – 9.3

**CROSS CONNECTION AND/OR BACKFLOW TARIFF**

Sheet No. 10.0 – 10.1

San Tan Water District

**Note to Commodity Rates:**

(a) Construction water service shall be through a Company-approved meter, provided by the customer, and attached to a Company fire hydrant. If the customer does not provide a meter, the Company will provide a meter and will require a refundable deposit from the customer equal to the cost of the meter. The Company is under no obligation to provide construction water service. The Company will provide construction water service at its sole discretion and only as water is available. That construction water service may be withdrawn or restricted at any time by the Company at its sole discretion. The Customer shall be responsible for transporting that construction water from the assigned meter and hydrant to the place of use. Any attempt by the customer, their subcontractors or any other entity to take construction water through any means not specifically approved by the Company shall be deemed to be an illegal connection and treated as water theft.

The Low Income Surcharge will be added to the highest block commodity rate (residential, apartment, individual and commercial customers only), and will change upon the Company's annual reconciliation of number of participants and top tier usage.

Low Income Program details are noted on the Low Income Assistance Program Tariff on Sheets 4.0-4.1 under the Customer Assistance Programs section.

**GENERAL WATER SERVICE**

**Terms and Conditions**

Water service provided under this rate schedule is subject to this District's Rules and Regulations applicable to Water Service and may be subject to this District's Service Charges set forth in subsections, Customer Assistance Programs, Adjustor Mechanisms and Miscellaneous Service Charges included in the Company's tariffs on file with the Arizona Corporation Commission.

Water service under this Schedule is for the exclusive use of the Customer and water shall not be resold or provided to others.

In addition to the collection of regular rates, the utility will collect from its customers a proportionate share of any privilege, sales, use and franchise or other governmental tax, per Commission Rule 14-2-409.D.5.

A 1½% late payment penalty will be applied to account balances not paid within fifteen (15) days after the postmark date of the bill in accordance with Arizona Administrative Code R14-2-310.C.

From time to time, the Company may provide public notices, specific notices, correspondence or other notifications ("Notices") regarding the presence of conditions affecting the quality and/or quantity of water service provided by the Company. (Examples of such Notices include, but are not limited to, boil water alerts, notice of hydrant or main flushing, and notice of water quality testing results.) These Notices may contain information about actions members of the public may wish to, are recommended to, or should take in response to the conditions identified in the Notice. In the event the Company issues a Notice, the Company will not be liable for any expenses or costs incurred by a customer or end user for any action taken in response to any condition identified in the Notice.

**GENERAL WATER SERVICE**

**Terms and Conditions (continued)**

Liability

1. Water pressure for Private Fire Service and Public Fire Hydrant Service. The Utility will supply only such water at such pressures as may be available from time to time as a result of the normal operation of its water system. The Utility does not guarantee a specific water pressure or gallons per minute flow rate at any public fire hydrant or private fire service. In the event service is interrupted or irregular or defective or fails from causes beyond the Utility's control or through ordinary negligence of its employees or agents, the Utility will not be liable for any injuries or damages arising therefrom.
2. Limitation of Utility Responsibility. The Utility does not assume the responsibility of inspecting or maintaining any customer's piping or apparatus and will not be responsible therefor; however, the Utility reserves the right to refuse water service unless the customer's piping or apparatus is installed in such manner as to prevent cross connections or backflow into the Utility's system in compliance with the Utility's Cross Connection/Backflow Tariff as approved by the Commission.
3. Third party claims. Utility will not be responsible for any third-party claims against Utility that arise from Customer's use of Utility's utility service unless such claims are caused by the Utility's willful misconduct or gross negligence.
4. Indemnity. Customer will indemnify, defend and hold harmless the Utility (including the costs of reasonable attorney's fees) against all claims (including, without limitation, claims for damages to any business or property, or injury to, or death of, any person) arising out of any wrongful act or negligent omission of the Customer, or the Customer's agents, in connection with the Utility's service or facilities.
5. Limitation of damages. The liability of the Utility for damages of any nature arising from errors, mistakes, omissions, interruptions, or delays of the Utility, its agents, servants, or employees, in the course of establishing, furnishing, rearranging, moving, terminating, or changing the service or facilities or equipment shall not exceed an amount equal to the charges applicable under the Utility's tariff (calculated on a proportionate basis where appropriate) to the period during which the error, mistake, omission, interruption or delay occurs, except if such damages are caused by the Utility's willful misconduct or gross negligence.
6. Incidental, indirect, special, or consequential damages. In no event will the Utility be liable for any incidental, indirect, special, or consequential damages (including lost revenue or profits) of any kind whatsoever regardless of the cause or foresee ability thereof.
7. Interference with Utility facilities. The Utility will not be responsible in any occasion for any loss or damage caused by the negligence or wrongful act of the Customer or any of his agents, employees or licensees in installing, maintaining, using, operating or interfering with any Utility facilities.

**NON-POTABLE WATER**

**NON-POTABLE CENTRAL ARIZONA WATER PROJECT WATER SERVICE**

**Availability.** Within the Company's certificated area, Central Arizona Project ("CAP") water may be purchased when available and subject to the terms and conditions set forth herein. Portions of the delivery service will be provided through certain facilities owned by New Magma Irrigation and Drainage District ("NMIDD") under a wheeling agreement with the Company. Service availability to the customer is contingent upon the availability of those NMIDD facilities pursuant to the wheeling agreement.

**Suitability.** It is the customer's responsibility to determine the initial and continuing suitability of the non-potable CAP water furnished under this tariff for any intended uses. The Company does not treat, test or monitor non-potable CAP water and furnishes it to customers strictly on an "as-received" basis from the Central Arizona Water Conservation District ("CAWCD") and as wheeled by NMIDD. The customer agrees to accept non-potable CAP water "as received." Compliance with any requirement of the Arizona Department of Environmental Quality, or any other agency having jurisdiction, concerning the use or quality of non-potable CAP water shall be the sole responsibility of the customer. The Company will not be liable for, and the customer will hold harmless, indemnify and defend the Company against, any injuries or damages arising from its service of non-potable CAP water.

**Facilities and Demand.** When applying for non-potable CAP water service, the customer shall specify the maximum annual quantity of CAP water in acre feet ("AF") that it intends to use under this tariff schedule and pursuant to a Non-Potable Water Facilities Contribution Agreement. This quantity of water will be used to determine the facilities required to serve the customer and will be the customer's maximum demand for non-potable CAP water ("CAP Demand") during any calendar year. The customer will be responsible for the annual CAWCD M&I Water Service Capital Charge on the CAP Demand. The customer will contribute the funds required to install all facilities needed to provide CAP water. Such facilities will be owned by the Company.

**Monthly Bill.** The monthly billing will consist of the following components:

- a. A monthly CAP Demand charge equal to 1/12th of the customer's CAP Demand in AF times the applicable CAWCD M&I Water Service Capital Charge per AF plus four percent (4%) of such costs to cover the Company's administrative and handling costs.
- b. A meter charge based on the applicable monthly minimum charge by meter size as set forth in each system's General Service tariff schedule. This meter charge shall not include any water.
- c. A commodity charge designed to pass on all costs of non-potable CAP water, except the monthly CAP Demand charge, as billed to the Company during the previous month by the CAWCD or any other authorized governmental agency, plus one percent (1%) of such costs to cover the Company's administrative and handling costs.

**NON-POTABLE WATER**

**NON-POTABLE CENTRAL ARIZONA WATER PROJECT WATER SERVICE (continued)**

- d. A power, maintenance, wheeling and depreciation charge based on the specific requirements of each customer.
- i. The power component will be the direct and separately metered cost of the power billed to the Company during the previous month for CAP water delivered to the customer, plus one percent (1%) of the power cost to cover the Company's administrative and handling costs. If multiple customers are being served by common facilities, the power component will be prorated based on CAP water actually used during the month by each customer.
- ii. The maintenance component will be the actual costs of maintaining the facilities required to serve the customer, plus a ten percent (10%) charge to provide for overhead and margin. If multiple customers are being served by common facilities, the maintenance component will be prorated based on each customer's CAP Demand.
- iii. The wheeling component will be the actual costs to the Company of any and all costs to the Company associated with the NMIDD Wheeling Agreement, plus one percent (1%) of the contract cost to cover the Company's administrative and handling costs. If multiple customers are being served by common facilities, the power component will be prorated based upon CAP water actually used during the month by each customer.
- iv. The depreciation component will be 1/12th of the product of the Company's book depreciation rate, as authorized by the Arizona Corporation Commission, times the original cost of the plant facilities serving the customer. If multiple customers are being served by common facilities, the depreciation component will be prorated based on each customer's CAP Demand.

**Terms and Conditions**

Water service provided under this rate schedule is subject to this District's Rules and Regulations applicable to Water Service and may be subject to this District's Service Charges set forth in tariffs in subsections, Customer Assistance Programs, Adjustor Mechanism and Miscellaneous Service Charges included in the Company's tariff on file with the Arizona Corporation Commission.

Water service under this Schedule is for the exclusive use of the Customer and water shall not be resold or provided to others.

In addition to the collection of regular rates, the utility will collect from its customers a proportionate share of any privilege, sales, use, franchise or other governmental tax, per Commission Rule 14-2-409.D.5.

A 1-1/2% late payment penalty will be applied to account balances not paid within fifteen (15) days after the postmark date of the bill in accordance with Arizona Administrative Code R14-2-310.C.

**CUSTOMER ASSISTANCE PROGRAMS**

**LOW INCOME ASSISTANCE PROGRAM TARIFF**

**LOW INCOME ASSISTANCE PROGRAM**

The Low Income Assistance Program ("Program") offered by the Company is designed as a short-term relief program. The Program provides assistance to residential customers in the San Tan Water District. Customers must complete the Low Income Assistance Application and provide necessary documentation to show they meet the qualifying guidelines. Details can be found in the Company's Plan of Administration for the Program.

**Availability**

Customers that meet the eligibility requirements shall be enrolled in the Program on a first come, first served basis up to a combined maximum level of 1,000 participants for the San Tan Water District and San Tan Wastewater District. [Note: a participant receiving a low income assistance credit for both water and wastewater counts as two participants for purposes of calculating maximum participants]. Once the Program has reached full participation, any future applicants will be placed on a wait list.

To qualify, applicants must:

- Be a resident and residential customer in the San Tan Water District.
- Be the primary account holder or a person residing in housing in a homeowner's association, apartment complex or mobile home park.
- Not be claimed as a dependent on another person's tax return
- Not have gross annual household income that exceeds 200% of the Federal Poverty Guidelines for the current year (to be updated annually).

There is an annual recertification requirement whereby the applicant must reapply each year based on the timeline determined by the Company.

**Low Income Credit**

Those customers that are the primary account holder will receive a monthly credit of \$10.00 on their water bill. For those customers who reside in multi-unit housing, checks will be written on a bi-annual basis for the number of months that the customer is eligible for the credit during that 6-month period.

**Low Income Surcharge**

The low income assistance credit will be recovered via a surcharge on the high-usage block to residential and commercial customers in the San Tan Water District.

**LOW INCOME ASSISTANCE PROGRAM TARIFF** (continued)

|  |   |
|--|---|
| Surcharge added to the highest block volumetric rate | <u>Rate per 1,000 gallons</u><br>\$X.XXXX * |
|--|---|

\* Rate consists of \$x.xxxx surcharge per 1,000 gallons of usage to charge the under collection of prior years' surcharge and \$x.xxxx per 1,000 gallons of usage for the collection of current annual Low Income charges.

**Reporting**

The Company will file with Docket Control, by March 31 of each year, an annual report detailing the

- Number of water low income assistance participants from the previous calendar year;
- Total amount of discounts given;
- Direct and indirect costs associated with the Program;
- Collections made from all water ratepayers used to fund the Program; and
- Provide updated gross annual income guidelines as necessary from the federal government.

The first report will be based on the period from Program inception through December 31, 2022. The reporting period for all subsequent year filings will be on a calendar basis. This report will be filed within 90 days of the end of the initial reporting period, March 31, and then annually thereafter.

As part of each annual filing, the Company will perform a reconciliation for the prior year reporting period comparing the amounts recovered from the surcharge to the amounts credited to the Program participants. Any over- or under- collection will be trued up with the subsequent year's low income Program costs.

Annual revisions to the surcharge will become administratively effective 30 days after the filing date.

**Terms and Conditions**

All rates in this Schedule shall be subject to their proportionate part of any taxes or other governmental imposts, which are assessed directly or indirectly on the basis of revenues derived from service under this Schedule.

For primary account holders, no checks will be issued for excess credits generated by this Program.

**CUSTOMER ASSISTANCE PROGRAMS**

**DEPLOYED SERVICE MEMBER CREDIT PROGRAM TARIFF**

**DEPLOYED SERVICE MEMBER CREDIT PROGRAM**

The Deployed Service Member Credit Program is designed as a temporary relief Program for service members serving away from their primary residences for an extended period of time. The Program provides relief to service members who are residential customers in the San Tan Water District. Details can be found in the Company's Deployed Service Member Credit Program's Plan of Administration.

**Availability**

Customers must provide necessary documentation to show they meet the qualifying guidelines. A combined maximum of 100 service members may be enrolled in the Program at any time for the San Tan Water District and San Tan Wastewater District but the Company is permitted to seek Arizona Corporation Commission's approval to change participant limits based on level of participation. [Note: a participant receiving a low income assistance credit for both water and wastewater counts as two participants for purposes of calculating maximum participants]. Once the Program has reached full participation, any future applicants will be placed on a wait list.

To qualify for this Program, a service member must:

- Be on active duty for the Army, Navy, Marines, Air Force, Coast Guard, or National Guard.
- Be deployed, on a deployment that is not a "permanent change of station" and is not a short-term deployment in which a spouse and/or dependents remain stateside.
- Have the residence in EPCOR's service area as the service member's primary residence, not secondary to another primary residence.
- Not have any family living in the residence in EPCOR's service area during the service member's absence.

Each service member's eligibility must be determined based on written orders from the service member's command. Each service member's continued eligibility must be determined periodically through a recertification process.

**Deployed Service Member Credit**

For those qualified customers, during a service member's enrollment, the Program will provide a monthly bill credit covering the enrolled service member's entire monthly water bill.

**Funding**

EPCOR will defer all costs of the Program for recovery in EPCOR's next San Tan Water District's general rate case.

**DISABLED MILITARY VETERAN CREDIT PROGRAM TARIFF**

**DISABLED MILITARY VETERAN CREDIT PROGRAM**

The Disabled Military Veteran Credit Program is designed as a relief program for individuals disabled as part of their military service. The Program provides relief to disabled veterans who are residential customers in the San Tan Water District. Details can be found in the Company's Disabled Military Veteran Credit Program's Plan of Administration.

**Availability**

Customers must provide necessary documentation to show they meet the qualifying guidelines. A maximum combined total of 1,000 disabled veterans for the San Tan Water District and San Tan Wastewater District may be enrolled in the Program at any time. Enrollment in the Program will be determined on a first-come, first-served basis. [Note: a participant receiving a low income assistance credit for both water and wastewater counts as two participants for purposes of calculating maximum participants]. Once the Program has reached full participation, any future applicants will be placed on a wait list.

To qualify for this Program, a disabled veteran must:

- Present a Benefit Summary Letter from the United States Department of Veterans Affairs demonstrating that the individual had any level of disability as a result of military service, or;
- Present a Veteran Health Identification Card from the United States Department of Veterans Affairs demonstrating that the individual had any level of disability as a result of military service.

**Disabled Military Veteran Credit**

For those qualified customers, the Program will provide a monthly bill credit of \$10.00.

**Funding**

EPCOR will defer all costs of the Program for recovery in EPCOR's San Tan Water District's next general water rate case.

Decision No. XXXXX

San Tan Water District  
(Name of Service Area)

**ADJUSTOR MECHANISMS**

**SUSTAINABLE WATER SURCHARGE ("SWS")**

In Decision No. 78546 dated April 28, 2022, the Arizona Corporation Commission authorized the Company to implement a Sustainable Water Surcharge ("SWS") adjustor mechanism to recover the annual tax assessments imposed upon the Company by the CAGRDR as a result of the Company's membership in the CAGRDR, as well as costs incurred to acquire alternate sustainable water resources. Accordingly, in addition to all other applicable rates and charges in these tariffs, each customer shall pay a monthly SWS that is a combination of both a CAGRDR surcharge per thousand gallons of water delivered and a surcharge for Other Recoverable Costs (e.g. CAP costs, Gila River Indian Community Costs, Salt River Project costs, Groundwater Withdrawal Fees, etc.). The SWS is effective for all metered water service rendered in all water service areas for all classes of service on and after Month, Date, Year, in accordance with all conditions set forth in Decision No. 78546.

The SWS per kgal shall be the sum of the Estimated CAGRDR Payments per thousand gallons and the Estimated Other Recoverable Cost Payments per thousand gallons for each AMA. The Estimated CAGRDR Surcharge per 1,000 gallons shall be calculated as follows: The actual annual CAGRDR costs for the prior year (billed in August of the current year) in the Phoenix Active Management Area ("Phoenix AMA") shall be divided by the gallons sold in the current year (Actual Sales for January thru September and estimated sales for October, November, and December) to determine a CAGRDR fee per 1,000 gallons delivered to customers in the Phoenix AMA. The Other Recoverable Costs Surcharge per thousand gallons shall be calculated by reflecting the invoiced charges for CAP Costs, Gila River Indian Community Costs, Salt River Project costs, Groundwater Withdrawal Fees, etc. when applicable. The Total Prior Year's (Over) Under recovery shall be added to the Total Estimated CAGRDR Payments to compute the Proposed CAGRDR Surcharge per kgal.

Similarly, the actual annual CAGRDR costs for the prior year (billed in August of the current year) in the Pinal Active Management Area ("Pinal AMA") shall be divided by the gallons sold in the current year (Actual Sales for January thru September and estimated sales for October, November, and December) to determine a CAGRDR fee per 1,000 gallons delivered to customers in the Pinal AMA. The Other Recoverable Costs Surcharge per thousand gallons shall be calculated by reflecting the invoiced charges for CAP Costs, Gila River Indian Community Costs, Salt River Project costs, Groundwater Withdrawal Fees, etc. when applicable. The Total Prior Year's (Over) Under recovery shall be added to the Total Estimated CAGRDR Payments to compute the Proposed CAGRDR Surcharge per kgal.

The Estimated Other Recoverable Cost Payments per 1,000 gallons shall be the estimated costs of current CAP costs, Gila River Indian Community Costs, Salt River Project costs, Groundwater Withdrawal Fees that are included in the prior year's actual Other Recoverable Costs applicable to each AMA divided by the Projected Sales based on the Prior Year's sales used in determining Recoveries.

Decision No. XXXXX

San Tan Water District  
(Name of Service Area)

**ADJUSTOR MECHANISMS**

**SUSTAINABLE WATER SURCHARGE ("SWS") (continued)**

By October 31st of each year, the Company shall submit for Commission consideration its proposed SWS adjustor fees for the Phoenix AMA and the Pinal AMA, along with the calculations and documentation from all relevant sources to support the data used in the calculations. The Commission-approved SWS shall become effective by January 1 and shall remain in effect until the next SWS fee is calculated and approved. To prevent over or under recovery of the SWS components, an annual true-up of the prior year's collections shall be performed at the time the Company submits its proposed SWS adjustor to the Commission. Any over or under recovery of recoverable costs (CAGR and Other Recoverable Costs) shall be included in the next year's computation.

SWS Adjustor Fees.

A SWS adjustor fee shall be applicable to each thousand gallons of water sold, as follows:

| <u>AMA Where Customer Resides:</u> | <u>Rate Per Thousand Gallons of Water Delivered:</u> |
|------------------------------------|--|
| Phoenix AMA                        | \$X.XX (effective 12/1/YYYY)                         |
| Pinal AMA                          | \$X.XX (effective 12/1/YYYY)                         |

**ADJUSTOR MECHANISMS**

**RATE CASE EXPENSE SURCHARGE**

Decision Number XXXXX authorized the Company to recover approved rate case expense over a three year period and collected through a Rate Case Expense Surcharge. This surcharge will terminate once the Rate Case Expense has been collected.

Applicability

Applicable to all customers served in this service area except for sales of effluent.

Surcharge Rate

Flat charge per month                      \$X.XX

**Terms and Conditions**

The Company will annually file with the Commission, as part of its Annual Report to the Commission's Utility Division, a report indicating the amount of the expense collected through the Rate Case Expense Surcharge and the amount of the Rate Case Expense still outstanding.

This surcharge will appear on each applicable customer bill as a separate line item.

All rates in this Schedule shall be subject to their proportionate part of any taxes or other governmental imposts that are assessed directly or indirectly on the basis of revenues derived from this Schedule.

**MISCELLANEOUS SERVICE CHARGES**

In addition to all other applicable rates and charges in this tariff, each customer shall be subject to the following charges, as applicable:

|   |                 |
|---|-----------------|
| Establishment of Service                    | \$35.00         |
| Reconnection of Service (Delinquent)        | \$35.00         |
| Meter Test (if correct)                     | \$35.00         |
| Deposit Requirement (Residential Meter)     | (a)             |
| Deposit Requirement (Non-Residential Meter) | (a)             |
| Deposit Interest                            | (a)             |
| Re-Establishment of Service                 | (c)             |
| NSF Check (d)                               | \$25.00         |
| Deferred Payment, Per Month                 | 1.50% per month |
| Meter Re-Read (if Correct)                  | \$25.00         |
| After Hours Service Call Out (b)            | \$35.00         |
| Late Charge (Per Month)                     | 1.50%           |

(a) Per A.A.C. R14-2-403(B).

(b) After Hours Service Charge: After regular working hours, Saturday, Sundays, and holidays if at the customer's request or for the customer's convenience.

(c) Monthly minimum times number of months disconnected from the system at the same location where the same customer had ordered a service disconnection within the preceding 12-month period. If the customer is also a wastewater customer, the customer will only be charged for one water reconnection

(d) Only one NSF fee can be charged when customers are billed for water and wastewater services on one bill.

In addition to the collection of regular rates, the utility will collect from its customers a proportionate share of any privilege, sales, or use tax. Per Commission Rule 14-2-409(D)(5).

**MISCELLANEOUS SERVICE CHARGES**

**Service Line and Meter Installation Charges**

In addition to all other applicable rates and charges in this tariff, each customer requesting new water service shall pay a Service Line and Meter Installation Charge for each meter requested, as follows:

| <b>Meter Size</b>      | <b>Service Line</b> | <b>Meter Installation</b> | <b>Total *</b> |
|------------------------|---------------------|---------------------------|----------------|
| 5/8" x 3/4- inch Meter | \$565.00            | \$165.00                  | \$730.00       |
| 3/4- inch Meter        | \$565.00            | \$185.00                  | \$750.00       |
| 1- inch Meter          | \$629.00            | \$220.00                  | \$849.00       |
| 1-1/2 - inch Meter     | \$699.00            | \$325.00                  | \$1,024.00     |
| 2- inch Turbine Meter  | \$1,054.00          | \$385.00                  | \$1,439.00     |
| 2- inch Compound Meter | \$1,054.00          | \$1,050.00                | \$2,104.00     |
| 3- inch Turbine Meter  | \$1,327.00          | \$1,065.00                | \$2,392.00     |
| 3- inch Compound Meter | \$1,480.00          | \$1,665.00                | \$3,145.00     |
| 4- inch Turbine Meter  | \$1,892.00          | \$1,335.00                | \$3,227.00     |
| 4- inch Compound Meter | \$2,121.00          | \$2,445.00                | \$4,566.00     |
| 6- inch Turbine Meter  | \$2,807.00          | \$2,665.00                | \$5,472.00     |
| 6- inch Compound Meter | \$2,959.00          | \$3,700.00                | \$6,659.00     |
| Over 6" Meter          | At Cost             | At Cost                   | At Cost        |

- Amount will be adjusted to include the actual cost incurred when boring under or cutting across a road or highway is required

**Terms and Conditions**

An applicant for water service shall pay to the Company, as a refundable advance in aid of construction the full cost to provide the new service line and meter.

In addition to the collection of regular rates, the Company will collect from its customers a proportionate share of any privilege, sales, use, franchise or other governmental tax, per Commission Rule 14-2-409.D.5.

All advances and/or contributions are to include labor, materials, overheads, and all applicable taxes, including all gross-up taxes for income taxes, if applicable.

**HOOK-UP FEES**

**COMMON FACILITIES HOOK-UP FEE**

**I. Purpose and Applicability.**

The purpose of the Common Facilities Hook-up Fee payable to EPCOR Water Arizona Inc. ("the Company") pursuant to this tariff is to equitably apportion the costs of constructing additional common water facility infrastructure to provide water production, delivery, treatment, storage and pressure among all new service connections. These charges are applicable to all new service connections established after the effective date of this tariff. The charges are one-time charges and are payable as a condition to the Company's establishment of service, as more particularly provided below.

**II. Definitions.**

Unless the context otherwise requires, the definitions set forth in R-14-2-401 of the Arizona Corporation Commission's ("Commission") rules and regulations governing water utilities shall apply in interpreting this tariff schedule.

"Applicant" means any Person (as defined at A.A.C. R14-2-401(22)) entering into an agreement with the Company for the installation of water facilities to serve new service connections, and may include developers and/or builders of new residential subdivisions, but may also include commercial and industrial developers, including but not limited to persons utilizing water for industrial processes.

"Main Extension" has the meaning as set forth in A.A.C. R14-2-401(14), and which may be located on-site or off-site.

"Main Extension Agreement" means any agreement whereby an Applicant, Developer and/or Builder agrees to advance the costs of the installation of water facilities, which may include Common Facilities, to the Company to serve new service connections, or install water facilities to serve new service connections and transfer ownership of such water facilities to the Company, in either case which agreement shall require the approval of the Commission pursuant to A.A.C. R-14-2-406, and shall have the same meaning as "Water Facilities Agreement" or "Line Extension Agreement." A Main Extension Agreement may also include provisions governing the design, construction and conveyance of Off Site Facilities or Common Facilities, even if those facilities are not subject to the refund provisions of such agreement.

"Common Facilities" means all wells, storage tanks, production, treatment, booster pumps, pressure tanks, transmission mains and related appurtenances (and may include any expansions of existing facilities), constructed for the benefit of the entire water system and not for the exclusive use of the Applicant's development.

"Off Site Facilities" means those facilities – including but not limited to for pressure, storage and water supply – that are being designed and built for the exclusive use of Applicant's development and are not for the benefit of the entire water system (and may include any expansions of existing facilities). Off Site Facilities does not include any mains or ancillary equipment that are Main Extensions as defined herein.

"Service Connection" means and includes any connection for water service for any residential, commercial or industrial use (whether domestic or otherwise), regardless of meter size, and also includes any unmetered service connection, including for any fire line that is constructed separately from other water supply lines. In such instances, the Hook Up Fee shall be charged on the basis of the size of the connection and the quantity of points of connection.

**HOOK-UP FEES**

**COMMON FACILITIES HOOK-UP FEE (continued)**

**III. Common Facilities Hook-up Fee**

For each new service connection, the Company shall collect a Common Facilities Hook-up Fee derived from the following table:

| <b>OFF-SITE WATER FACILITY HOOK-UP FEE TARIFF</b> |            |
|---|------------|
| Meter Size  | Total Fee  |
| 5/8 x 3/4 Inch                                    | \$ 2,900   |
| 3/4 Inch  | \$ 2,900   |
| 1 Inch  | \$ 2,900   |
| 1-1/2 Inch  | \$ 14,000  |
| 2 Inch  | \$ 22,400  |
| 3 Inch  | \$ 42,000  |
| 4 Inch  | \$ 70,000  |
| 6 Inch  | \$ 140,000 |
| 8 Inch  | \$ 224,000 |
| 10 Inch or greater                                | \$ 322,000 |

**IV. Terms and Conditions.**

- (A) Assessment of One Time Common Facilities Hook-up Fee: The Common Facilities hook-up fee may be assessed only once per parcel, service connection, or lot within a subdivision (similar to meter and service line installation charges).
- (B) Use of Common Facilities Hook-up Fee: Common Facilities hook-up fees may only be used to pay for capital items of Common Facilities, or for repayment of loans obtained for installation of Common Facilities. Common Facilities hook-up fees shall not be used for repairs, maintenance or operational purposes.
- (C) Time of Payment:
  - 1) In the event that the Applicant that will be constructing improvements is required to enter into a Main Extension Agreement, payment of the Common Facilities hook-up fees required hereunder shall be made by the Applicant no later than 30 calendar days after the effective date of that Main Extension Agreement. Additionally, Company shall file the Main Extension Agreement with the Utilities Division of the Arizona Corporation Commission in accordance with R-14-2-406(M) and notify Applicant when approval is received.

**HOOK-UP FEES**

**COMMON FACILITIES HOOK-UP FEE (continued)**

2) In the event that the Applicant for the service is not required to enter into a Main Extension Agreement or any other facilities improvement agreement, the charges hereunder shall be due and payable at the time the meter and service line installation fee is due and payable.

(D) Common Facilities Construction by Applicant: The Company and Applicant may agree to construction of Common Facilities necessary to serve a particular development by Applicant which facilities are then conveyed to the Company. In that event, Company shall credit the total cost of such Common Facilities as an offset to the Common Facilities hook-up fees due under this Tariff. If the total cost of the Common Facilities constructed by Applicant and conveyed to Company is less than the applicable Common Facilities hook-up fees under this Tariff, Applicant shall pay the remaining amount of the Common Facilities hook-up fees owed hereunder. If the total cost of the Common Facilities contributed by Applicant, Developer or Builder and conveyed to Company is more than the applicable Common Facilities hook-up fees under this Tariff, Applicant shall be refunded the difference upon acceptance of the Common Facilities by the Company. The refund may be paid in installments over a period of time pursuant to an agreement between the Company and the developer on a case by case basis.

1) The Company and Applicant may agree to construction of additional facilities that are not Common Facilities and are not Main Extensions, the cost of which shall not be subject to off-set under this paragraph IV.D, but which may be subject to refund under R14-2-406(D) but where Company may, in the alternative, instead require a contribution from Applicant that will not be subject to any hook-up fee credit.

2) Any oversizing of any facilities that will be constructed by Applicant, whether Common Facilities, Off-Site Facilities, or Main Extensions, required by the Company will be subject to reimbursement, which may be done in one or more installments and will be independent of the refunding otherwise set forth in this provision.

(E) Other Facilities That Are Not Main Extensions or Common Facilities. Any facilities necessary for Applicant's development that are neither a Main Extension nor Common Facilities as defined herein, which may include but are not limited to additional facilities for storage, pressure and water supply, are Off-Site Facilities where a contribution may be required from Applicant and where such contribution will not be subject to any hook-up fee credit. This contribution will be independent of hook-up fees assessed for Common Facilities, and may be in the form of (1) an additional cash contribution; or (2) design and construction of such facilities by Applicant, which are subsequently conveyed to the Company. The total costs for such Off-Site Facilities will include design and engineering costs. At the Company's discretion, the Company may instead agree to treatment of such contribution(s) as a refundable advance subject to refund on the same terms as set forth in the Company's tariffs.

**HOOK-UP FEES**

**COMMON FACILITIES HOOK-UP FEE (continued)**

(F) Failure to Pay Charges; Delinquent Payments: The Company will not be obligated to provide water service to any Applicant or other applicant for service in the event that such Applicant has not paid in full all charges hereunder. Under no circumstances will the Company set a meter or otherwise allow service to be established if the entire amount of any payment has not been paid.

(G) Large Subdivision Projects: In the event that the Applicant is engaged in the development of a residential subdivision containing more than 150 lots, and is a party to a Main Extension Agreement with the Company for such development, the Company may, in its discretion, agree to payment of the Common Facilities hook-up fees in installments. Such installments may be based on the residential subdivision development's phasing, and should attempt to equitably apportion the payment of charges hereunder based on the Applicant's construction schedule and water service requirements.

(H) Common Facilities Hook-Up Fees Non-refundable: The amounts collected by the Company pursuant to the Common Facilities hook-up fee tariff shall be non-refundable contributions in aid of construction.

(I) Common Facilities Hook-up Fees in Addition to Main Extensions: The Common Facilities hook-up fee shall be in addition to any costs associated with the construction of those Main Extensions or other additional facilities under Paragraph IV.D that are not Common Facilities, required under a Main Extension Agreement.

(J) Disposition of Excess Funds: After all necessary and desirable Common Facilities are constructed utilizing funds collected pursuant to the Common Facilities hook-up fees, or if the Common Facilities hook-up fee has been terminated by order of the Arizona Corporation Commission, any funds remaining on the balance of hook-up fees shall be refunded. The manner of the refund shall be determined by the Commission at the time a refund becomes necessary.

(K) Fire Flow Requirements: In the event the Applicant has fire flow requirements that require additional facilities beyond those facilities whose costs were included in the Common Facilities hook-up fee, the Company may require the Applicant to install such additional facilities as are required to meet those additional fire flow requirements, as a non-refundable contribution, in addition to paying the Common Facilities hook-up fee.

(L) Status Reporting Requirements to the Commission: The Company shall submit a calendar year Common Facilities hook-up fee status report each February 28<sup>th</sup> to Docket Control for the prior twelve (12) month period, beginning February 28, 2025, until the Common Facilities hook-up fee tariff is no longer in effect. This status report shall contain a list of all customers that have paid the Common Facilities hook-up fee tariff, the amount each has paid, the amount of money spent from the hook-up fees balance, the amount of interest earned (if any) on the balance of hook-up fees collected, and a list of all facilities that have been installed with the tariff funds during the 12- month period.

**HOOK-UP FEES**

**COMMON FACILITIES HOOK-UP FEE (continued)**

**V. LARGE WATER USERS**

Any development with a projected average daily water demand greater than 1,700 gallons per day per acre is considered to be a Large User. Large Users will be required to provide an additional renewable water supply source to the Company to meet the demands of the development that are greater than 1,700 gallons per day per acre. Examples of a renewable water supply source include surface water or a groundwater well with long-term storage credits. The renewable water supply source must be approved by the Company, and must have the appropriately allocated water rights that will be conveyed to the Company. The costs to provide a renewable water supply source to the Company will not be credited as an offset to the Common Facilities Hook-Up Fee because such costs will be due to the exclusive need for additional water by the Large User; however, the cost of the portion of a renewable water supply source that is in excess of the Large User's need will be credited as an offset to the Common Facilities Hook-Up Fee.

Large Users may be required to enter into an agreement with the Company that will define terms and conditions, and will include fees that will be charged to Large Users for over usage. Fees will incur if Large Users use water in excess of the supply source provided, which will be reviewed by the Company on an annual basis. Continued excessive use could result in the Company requiring the Large User to develop and implement a water use reduction plan or, as a last resort, court action.

**BEST MANAGEMENT PRACTICES**

**Public Education Program Tariff – BMP**

**PURPOSE**

A program for the Company to provide free written information on water conservation measures to its customers and to remind them of the importance of conserving water (Required Public Education Program).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall provide two newsletters to each customer; one to be provided in the spring, the other in the fall. The goal of the letters is to provide timely information to customers in preparation of the hot summer months, and the cold winter months, in regards to water uses. The Company shall remind customers of the importance of water conservation measures and inform them of the information available from the Company.
2. Information in the newsletters shall include water savings tips, home preparation recommendations for water systems/pipes, landscape maintenance issues for summer and winter, water cistern maintenance reminders and additional pertinent digital format which can be e-mailed to customers upon request or posted on the Company's website.
3. Communication channels shall include one or more of the following: water bill inserts, messages on water bills, Company web page, post cards, e-mails and special mailings of print pieces, whichever is the most cost-effective and appropriate for the subject at hand.
4. Free written water conservation materials shall be available in the Company's business office and the Company shall send information to customers on request.
5. The Company may distribute water conservation information at other locations such as libraries, chamber of commerce, community events, etc., as well.
6. The Company shall keep a record of the following information and make it available to the Commission upon request.
  - a. A description of each communication channel (i.e., the way messages will be provided) and the number of times it has been used.
  - b. The number of customers reached (or an estimate).
  - c. A description of the written water conservation material provided free to customers.

**BEST MANAGEMENT PRACTICES****New Homeowner Landscape Information Tariff – BMP 2.3****PURPOSE**

A program for the Company to promote the conservation of water by providing a landscape information package for the purpose of educating its new customers about low water use landscaping (Modified Non-Per Capita Conservation Program BMP Category 2: Conservation Education and Training 2.3: New Homeowner Landscape Information).

**REQUIREMENTS:**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. Upon establishment of water service the Company shall provide a free "Homeowner Landscape Packet" to each new customer in the Company's service area. The packet will include at a minimum: a cover letter describing the water conservation expectations for all customers in the Company's service area, all applicable rate tariffs, a basic interior-exterior water saving pamphlet, xeriscape landscape information, and information on where to find low water use plant lists, watering guidelines, and a rain water harvesting pamphlet.
2. Upon customer request, the Company shall provide:
  - a. On-site consultations on low water use landscaping and efficient watering practices.
  - b. A summary of water saving options.
3. The number of packets provided to new customers will be recorded and made available to the Commission upon request.

**BEST MANAGEMENT PRACTICES****Residential Audit Program Tariff – BMP 3.1****PURPOSE**

A program for the Company to promote water conservation by providing customers with information on performing water audits to determine conservation opportunities at their residence (Modified Non-Per Capita Conservation Program BMP Category 3: Outreach Services 3.1: Residential Audit Program).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall offer self-audit information.
2. The Company or designated representative shall provide all customers that request them with a self-audit kit.
3. The kit shall include detailed instructions and tools for completing the water audit including information on how to check their water meter. The audit kit shall include but not be limited to information on checking the following components: irrigation system, pool, water features, toilets, faucets and shower.
4. If requested, the Company shall assist the customer in a self-water audit and assist the customer in determining what might be causing high water usage as well as supply customer with information regarding water conservation and landscape watering guidelines. As part of the water audit, and if requested to do so by the customer, the Company shall confirm the accuracy of the customer meter (applicable meter testing fees shall apply).
5. The Company shall keep a record of the following information and make it available upon request:
  - a. A description of the water conservation material provided in the kit.
  - b. The number of kits provided to customers.
  - c. Implementation costs of the Residential Audit Program.

A program for the Company to assist its customers with their high water-use inquiries and complaints (Modified Non-Per Capita Conservation Program BMP Category 3: Outreach Services 3.6: Customer High Water Use Inquiry Resolution).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall handle high water use inquiries as calls are received.
2. Calls shall be taken by a customer service representative who has been trained on typical causes of high water consumption as well as leak detection procedures that customers can perform themselves.
3. Upon request by the customer or when the Company determines it is warranted, a trained Field Technician shall be sent to the customer's residence to verify consumption and conduct a leak detection inspection and further assist the customer with water conservation measures.
4. The Company shall follow up in some way on every customer and keep a record of inquiries and follow-up activities. .

**BEST MANAGEMENT PRACTICES****Customer High Water Use Notification Tariff – BMP 3.7****PURPOSE**

A program for the Company to monitor and notify customers when water use seems to be abnormally high and provide information that could benefit those customers and promote water conservation (Modified Non-Per Capita Conservation Program BMP Category 3: Outreach Services Program 3.7: Customer High Water Use Notification).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall track water usage for each customer and notify the customer if water use seems excessive for that particular billing for that time of the year.
2. The Company shall identify customers with high consumption and investigate each instance to determine the possible cause.
3. The Company shall contact the high water use customers via telephone, email, by mail or in person. The Company shall contact the customer as soon as practical in order to minimize the possible loss of water. The customer will not be required to do anything to receive this notification.
4. In the notification the Company shall explain some of the most common water usage problems and common solutions and points of contact for dealing with the issues.
5. In the notification, the customer will be reminded of at least the following water-consumption occurrences:
  - a. Check for leaks, running toilets, or valves or flappers that need to be replaced.
  - b. Check landscape watering system valves periodically for leaks and keep sprinkler heads in good shape.
  - c. Adjust sprinklers so only the vegetation is watered and not the house, sidewalk, or street, etc.
  - d. Continue water conservation efforts with any pools such as installing covers on pools and spas and checking for leaks around pumps.
6. In the notification, the customer will also be reminded of at least the following ordinary life events that can cause a spike in water usage:
  - a. More people in the home than usual taking baths and showers.
  - b. Doing more loads of laundry than usual.
  - c. Doing a landscape project or starting a new lawn.
  - d. Washing vehicles more often than usual.

7. The Company shall offer water conservation information that could benefit the customer, such as, but not limited to, audit programs, publications, and rebate programs.
8. The Company shall assist the customer in self-water audit and assist the customer in determining what might be causing the high water usage as well as supply customer with information regarding water conservation and landscape watering guidelines. As part of the water audit the Company shall confirm the accuracy of the customer meter if requested to do so by the customer (applicable meter testing fees shall apply).
9. The type of notification, the timing of the notification (i.e., how long after high water use was discovered by the Company), and the criteria used for determining which customers are notified shall be recorded and made available to the Commission upon request.

**BEST MANAGEMENT PRACTICES****Water Waste Investigations and Information Tariff – BMP 3.8****PURPOSE**

A program for the Company to assist customers with water waste complaints and provide customers with information designed to improve water use efficiency (Modified Non-Per Capita Conservation Program Best Management Practice Category 3: Outreach Services 3.8: Water Waste Investigations and Information).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission specifically R14-2-403 and R14-2-410 and were adapted from the Arizona Departments of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall handle water waste complaints as calls are received.
2. Calls shall be taken by a customer service representative who has been trained to determine the type of water waste and to determine if it may be attributed to a leak or broken water line.
3. The Company shall follow up on every water waste complaint.
4. Upon request by the customer or when the Company determines it is warranted, a trained Field Technician shall be sent to investigate further and notify the responsible party of the waste and offer assistance and information to prevent waste in the future.
5. A letter of enforcement will be issued to customers with water running beyond the curb and/or off the customers' property due to such things as, but limited to, backwashing of pools, broken sprinkler heads, and over watering of lawns beyond the saturation point.
6. The same procedures outline above in item #4 will be followed in the event of a second violation within a 12 month period. In the event of a third violation the customer's service may be terminated per Arizona Administrative Code R14-2-410C, R14-2-410D and R14-2-410E (applicable service reconnection fees shall apply).
7. The Company shall record each account and each instance noted for water waste, and action taken and any follow-up activities.
8. Subject to the provisions of this tariff, compliance with the water waste resolution will be a condition of service.
9. The Company shall provide to its customers a complete copy of its tariff and all attachments upon request and to each new customer. The customer shall abide by the water waste restriction.
10. If a customer believes he/she has been disconnected in error, the customer may contact the Commission's Consumer Services Section at 1-800-222-7000 to initiate an investigation.

**BEST MANAGEMENT PRACTICES****Leak Detection Program Tariff – BMP 4.1****PURPOSE**

A program for the Company to systematically evaluate its water distribution system to identify and repair leaks (Modified Non-Per Capita Conservation Program Best Management Practice Category 4: Physical System Evaluation and Improvement 4.1 Leak Detection Program).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall implement a comprehensive leak detection and repair program to attain and maintain a goal of less than 10 percent unaccounted for water loss in its system(s). The program must include auditing procedures, in-field leak detection and repair efforts. The Company shall take whatever steps are necessary to ensure that its water system is operating at optimal efficiency.
2. On a systematic basis, at least every two years (annually for smaller systems), the Company shall inspect its water distribution system (to include hydrants, valves, tanks, pumps, etc. in the distribution system) to identify and repair leaks. Detection shall be followed by repair or in some cases replacement. Repair vs. replacement will depend upon site-specific leakage rates and costs.
3. Leak Detection efforts should focus on the portion of the distribution system with the greatest expected problems, including:
  - i. areas with a history of excessive leak and break rates;
  - ii. areas where leaks and breaks can result in the heaviest property damage;
  - iii. areas where system pressure is high;
  - iv. areas exposed to stray current and traffic vibration;
  - v. areas near stream crossings; and,
  - vi. areas where loads on pipe may exceed design loads.

**BEST MANAGEMENT PRACTICES****Leak Detection Program Tariff – BMP 4.1 (continued)**

4. The Company shall keep accurate and detailed records concerning its leak detection and repair/rehabilitation program and the associated costs. Records of repairs shall include: possible causes of leak; estimated amount of water lost; and date of repair. These records shall be made available to the Commission upon request.
5. The Company shall maintain a complete set of updated distribution system maps.
6. The Company shall ensure that properly functioning (accurate) and appropriately sized meters are installed on all service and source connections. All meters 1-inch and smaller shall be inspected at least once every ten years or upon registering 1,000,000 gallons of usage, whichever comes first. Meters larger than 1-inch shall be inspected at least once every five years or upon registering 1,000,000 gallons of usage, whichever comes first.
7. The inspection will be accomplished by having the meter pulled and having a Company Technician physically inspect each meter and its fittings for leaks, registers which may have become loose or are not properly attached to the meter and could be under-registering or other broken parts which need repair. In addition, meters shall be randomly selected for flow testing to identify potentially under-registering meters.
8. The Company shall conduct a water audit annually which includes the following steps to determine how efficient each water system is operating and where the losses might be.
  - a. Use coordinated monthly source and service meter readings to calculate how much water enters and leaves the system during the 12 month review period.
  - b. Track and estimate any unmetered authorized uses.
  - c. Calculate the total amount of leakage using the following formula:  
  

$$\text{Unaccounted for water (\%)} = \frac{[(\text{Production and/or purchased water minus metered use \& estimated authorized un-metered use}) / (\text{Production and/or purchased water})] \times 100}{1}$$
  - d. Authorized un-metered uses may include firefighting, main flushing, process water for water treatment plants, etc. Water losses include all water that is not identified as authorized metered water use or authorized un-metered use.
  - e. Determine possible reasons for leakage, including physical leaks and unauthorized uses.
  - f. Analyze results to determine the improvements needed, such as, better accounting practices, leak survey or replacing old distribution pipes.
9. The Company shall keep accurate and detailed records concerning its annual water audit results. These records shall be made available to the Commission upon request.

**BEST MANAGEMENT PRACTICES****Meter Repair and/or Replacement Tariff – BMP 4.2****PURPOSE**

A program for the Company to systematically assess all in-service water meters (including Company production meters) in its water service area to identify under-registering meters and to repair or replace them (Modified Non-Per Capita Conservation Program Best Management Practice Category 4: Physical System Evaluation and Improvement 4.2 Meter Repair and/or Replacement Program).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. On a systematic basis, the Company will inspect 100 percent of its 1-inch and smaller in-service water meters at least once every ten years for one of the following reasons (whichever occurs first):
  - a. A meter reading complaint is filed with the Company by a customer of Arizona Corporation Commission Staff,
  - b. A meter has registered 1,000,000 gallons of usage.
  - c. A meter has been in service for ten years.
  
2. Meters larger than 1-inch shall be inspected for one of the following reasons:
  - a. A meter reading complaint is filed with the Company by a customer or Arizona Corporation Commission Staff,
  - b. A meter has been in service for five years.
  
3. The inspection will be accomplished by having the meter pulled and having a Company Technician physically inspect each meter and its fittings for leaks, registers which may have become loose or are not properly attached to the meter and could be under-registering or other broken parts which need repair. In addition, meters shall be randomly selected for flow testing to identify potentially under-registering meters.
  
4. The Company shall also replace or reprogram any water meters that do not register in gallons. Within 5 years of the initial effective date of this tariff, the Company shall replace or reprogram all:
  - a. 1-inch and smaller meters such that they register usage in 1 gallon increments,
  - b. 1/2-inch through 4-inch meters such that they register in 10 gallon increments, and
  - c. 6-inch and larger meters such that they register in 100 gallon increments.

**BEST MANAGEMENT PRACTICES**

**Water System Tampering Tariff – BMP 5.2**

**PURPOSE**

The purpose of this tariff is to promote the conservation of groundwater by enabling the Company to bring an action for damages or to enjoin any activity against a person who tampers with the water system.

**REQUIREMENTS:**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission, specifically Arizona Administrative Code (“AAC”) R14-2-410 and the Arizona Department of Water Resources’ Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. In support of the Company’s water conservation goals, the Company may bring an action for damages or to enjoin any activity against a person who: (1) makes a connection or reconnection with property owned or used by the Company to provide utility service without the Company’s authorization or consent; (2) prevents a Company meter or other device used to determine the charge for utility services from accurately performing its measuring function; (3) tampers with property owned or used by the Company; or (4) uses or receives the Company’s services without the authorization or consent of the Company and knows or has reason to know of the unlawful diversion, tampering or connection. If the Company’s action is successful, the Company may recover as damages three times the amount of actual damages.
2. Compliance with the provisions of this tariff will be a condition of service.
3. The Company shall provide to all its customers, upon request, a complete copy of this tariff and AAC R14-2-410. The customers shall follow and abide by this tariff.
4. If a customer is connected to the Company water system and the Company discovers that the customer has taken any of the actions listed in No. 1 above, the Company may terminate service per AAC R14-2-410.
5. If a customer believes he/she has been disconnected in error, the customer may contact the Commission’s Consumer Services Section at 1-800-222-7000 to initiate an investigation.

**BEST MANAGEMENT PRACTICES**

**Low Water Use Landscaping Requirements Tariff for Model Homes in New Residential Developments – BMP 5.5**

**PURPOSE**

A program for the Company to reduce water use within its service area and/or increase water use efficiency by limiting or reducing water used for specific purposes (Modified non-Per Capita Conservation Program BMP Category 5: Ordinances/ Conditions of Service/Tariffs 5.5: Low Water Use Landscaping Requirements Tariff for Model Homes in New Residential Developments).

**REQUIREMENTS:**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission, specifically A.A.C. R14-2-403 and R14-2-410 and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall provide to the customer/developer/builder distinct guidelines for landscape planning and design for model homes.
2. The following landscape restrictions will be required in order for a customer/developer/builder to receive water service to its model homes from the Company on or after the effective date of this tariff.

Restrictions Applicable to All New Model Home Landscaping –

- a. Model Home landscaping will involve strategic planning and design. Landscaped areas will be divided into zones based on water requirements. Each model will have efficient irrigation systems, properly designed and maintained.
- b. All models will be placed on a drip irrigation system with a timer for shrubs and trees to apply water directly to the roots where it is needed. Watering schedules will be adjusted each month to match seasonal weather conditions and landscape requirements.
- c. All front yards shall be landscaped with xeriscape (low water use) materials. A list of low water use landscaping materials is available from the Company upon request. No turf of any kind that required watering shall be allowed in front of yards.
- d. Turf in back yards shall be limited to no more than fifty percent (50%) of the total backyard area.
- e. No model home shall be equipped with a swimming pool, jacuzzi, or other water –use intensive feature (e.g., fountain fish pond, etc.).
- f. Model home landscapes will require minimal but appropriate maintenance. Landscape maintenance may include pruning, removing trash that has blown into the landscape, occasional weeding and pest management, checking that the irrigation system is functioning properly, and adjusting automatic irrigation systems as the seasons change.

**CURTAILMENT TARIFF**

**CURTAILMENT PLAN FOR SAN TAN WATER DISTRICT**

ADEQ Public Water System Numbers: 11-128 & 11-136.

EPCOR Water Arizona Inc. ("Company") is authorized to curtail water service to all customers within its certificated area under the terms and conditions listed in this tariff.

This curtailment plan shall become part of the Arizona Department of Environmental Quality's Emergency Operations Plan for the Company.

The Company shall notify its customers of this new tariff as part of its next regularly scheduled billing after the effective date of this tariff or no later than sixty (60) days after the effective date of the tariff.

The Company shall provide a copy of the curtailment tariff to any customer upon request.

**Stage 1 Exists When:**

Company is able to maintain water storage in the system at 100 percent of capacity and there are no known problems with its well production or water storage in the system.

Restrictions: Under Stage 1, the Company is deemed to be operating normally and no curtailment is necessary.

Notice Requirements: Under Stage 1, no notice is necessary.

**Stage 2 Exists When:**

- a. Company's water storage or well production has been less than 80 percent of capacity for at least 48 consecutive hours, or
- b. Company has identified issues such as a steadily declining water table, increased draw down threatening pump operations, or poor water production, creating a reasonable belief the Company will be unable to meet anticipated water demand on a sustained basis or
- c. Company has been notified by a water management entity having authority that Company's water allocation or contract has or will be reduced by up to 20 percent of the full allocation or contract volume.

Restrictions: Under Stage 2, the Company may request that customers voluntarily employ water conservation measures to reduce water consumption by approximately 50 percent. Outside watering should be limited to essential water, dividing outside watering on some uniform basis (such as even and odd days) and eliminating outside watering on weekends and holidays.

**CURTAILMENT TARIFF**

**CURTAILMENT PLAN FOR SAN TAN WATER DISTRICT**

Notice Requirements: Under Stage 2, the Company is required to notify customers by delivering written notice door to door at each service address, or by United States first class mail to the billing address, or at the Company's option, both. Such notice shall notify the customers of the general nature of the problem and the need to conserve water.

**Stage 3 Exists When:**

- a. Company's total water storage or well production has been less than 50 percent of capacity for at least 24 consecutive hours, or
- b. Company has identified issues such as a steadily declining water table, increased draw down threatening pump operations, or poor water production, creating a reasonable belief the Company will be unable to meet anticipated water demand on a sustained basis or
- c. Company has been notified by a water management entity having authority that Company's water allocation or contract has or will be reduced by up to 50 percent of the full allocation or contract volume.

Restrictions: Under Stage 3, Company shall request the customers to voluntarily employ water conservation measures to reduce daily consumption by approximately 50 percent and use indoor water conservation techniques whenever possible. Company shall inform customers of a mandatory restriction on all outside watering, except livestock. Failure to comply will result in disconnection. Standpipe service shall be suspended.

Notice Requirements:

- 1. Company is required to notify customers by delivering written notice to each service address, or by United States first class mail to the billing address or, at the Company's option, both. Such Notice shall notify the customers of the general nature of the problem and the need to conserve water.
- 2. Beginning with Stage 3, Company shall post at least five (5) signs showing the curtailment stage. Signs shall be posted at the well and/or pump sites located within the San Tan Water District.
- 3. Company shall notify the Consumer Services Section of the Utilities Division of the Arizona Corporation Commission at least 12 hours prior to entering Stage 3.

Once Stage 3 has been reached, the Company must begin to augment the supply of water by either hauling or through an emergency interconnect with an approved water supply in an attempt to maintain the curtailment at a level no higher than Stage 3 until a permanent solution has been implemented.

**CURTAILMENT TARIFF**

**CURTAILMENT PLAN FOR SAN TAN WATER DISTRICT**

**Stage 4 Exists When:**

- a. Company's total water storage or well production has been less than 25 percent of capacity for at least 12 consecutive hours, or
- b. Company has identified issues such as steadily declining water table, increased draw down threatening pump operations, or poor water production, creating a reasonable belief the Company will be unable to meet anticipated water demand on a sustained basis.
- c. Company has been notified by a water management entity having authority that Company's water allocation or contract has or will be reduced by over 50 percent of the full allocation or contract volume.

Restrictions: Under Stage 4, Company shall inform the customers of a mandatory restriction to employ water conservation measures to reduce daily consumption. Failure to comply will result in customer disconnection. The following uses of water shall be prohibited:

- ◆ Irrigation of outdoor lawns, trees, shrubs, or any plant life is prohibited
- ◆ Washing of any vehicle is prohibited
- ◆ The use of water for dust control or any outdoor cleaning uses is prohibited
- ◆ The use of drip or misting systems of any kind is prohibited
- ◆ The filling of any swimming pool, spas, fountains or ornamental pools is prohibited
- ◆ The use of construction water is prohibited
- ◆ Restaurant patrons shall be served water only upon request
- ◆ Any other water intensive activity is prohibited

The Company's operation of its standpipe service is prohibited. The addition of new service lines and meter installations is prohibited.

Notice Requirements:

1. Company is required to notify customers by delivering written notice to each service address, or by United States first class mail to the billing address or, at the Company's option, both. Such notice shall notify the customers of the general nature of the problem and the need to conserve water.
2. Beginning with Stage 4, Company shall post at least eight (8) signs showing the curtailment stage. Signs shall be posted at the well and/or pump sites located within the San Tan Water District.
3. The Company shall notify the Consumer Services Section of the Utilities Division of the Arizona Corporation Commission at least 12 hours prior to entering Stage 4.

**CURTAILMENT PLAN FOR SAN TAN WATER DISTRICT**

Customers who fail to comply with the above restrictions will be given a written notice to end all outdoor use. Failure to comply within two (2) working days of receipt of the notice will result in temporary loss of service until an agreement can be made to end unauthorized use of outdoor water. To restore service, the customer shall be required to pay all authorized reconnection fees. Upon a customer's third instance of non-compliance, the Company is authorized to take appropriate steps to prevent future violations, including permanently limiting the amount of water the customer can take from the Company.

If a customer believes he/she has been disconnected in error, the customer may contact the Commission's Consumer Services Section at 1-800-222-7000 to initiate an investigation.

Once Stage 4 has been reached, the Company must augment the supply of water by hauling or through an emergency interconnect from an approved supply or must otherwise provide emergency drinking water for its customers until a permanent solution has been implemented.

**CROSS-CONNECTION AND/OR BACKFLOW TARIFF**

PURPOSE:

The purpose of this tariff is to protect EPCOR Water Arizona Inc.'s San Tan Water District's ("Company") water from the possibility of contamination caused by the backflow of contaminants that may be present on the customer's premises by requiring the installation and periodic testing of backflow prevention assemblies pursuant to the provisions of the Arizona Administrative Code ("A.A.C.") R14-2-405.B.6 and A.A.C. R18-4-215.

REQUIREMENTS:

In compliance with the Rules of the Arizona Corporation Commission ("Commission") and the Arizona Department of Environmental Quality ("ADEQ"), specifically A.A.C. R14-2-405.B.6 and A.A.C. R18-4-215 relating to backflow prevention:

1. The Company may require a customer to pay for and to have installed a backflow-prevention assembly if A.A.C. R18-4-215.B or C applies.
2. A backflow-prevention assembly required to be installed by the customer under Paragraph 1 of this tariff shall comply with the requirements set forth in A.A.C. R18-4-215.D and E.
3. Subject to the provisions of A.A.C. R14-2-407 and 410, and in accordance with Paragraphs 1 and 7 of this tariff, the Company may terminate service or may deny service to a customer who fails to install a backflow-prevention assembly as required by this tariff.
4. The Company shall give any existing customer who is required to install a backflow-prevention assembly written notice of said requirement. If A.A.C. R14-2-410.B.1.a. is **not** applicable, the customer shall be given thirty (30) days from the time such written notice is received in which to comply with this notice. If the customer can show good cause as to why he cannot install the backflow-prevention assembly within thirty (30) days, the Company or Commission Staff may suspend this requirement for a reasonable period of time.

**CROSS-CONNECTION AND/OR BACKFLOW TARIFF**

5. Testing shall be in conformance with the requirements of A.A.C. R18-4-215.F. The Company may require the customer to pay to have the backflow-prevention assembly tested as long as the Company does not require an unreasonable number of tests.

6. The customer shall provide the Company with records of installation and testing. For each backflow-prevention assembly, these records shall include:

- a. assembly identification number and description;
- b. location;
- c. date(s) of test(s);
- d. description of repairs and recommendations for repairs made by tester; and
- e. the tester's name and certificate number.

7. In the event the backflow-prevention assembly does not function properly or fails any test, and an obvious hazard as contemplated under A.A.C. R14-2-410.B.1.a. exists, the Company may terminate service immediately and without notice. The backflow-prevention assembly shall be repaired or replaced by the customer and retested.

8. In the event the backflow-prevention assembly does not function properly or fails any test, or in the event that a customer fails to comply with the testing requirement, and A.A.C. R14-2-410.B.1.a. is **not** applicable, the backflow prevention assembly shall be repaired or replaced within fourteen (14) days of the initial discovery of the deficiency in the assembly or its function. Failure to remedy the deficiency or dysfunction of the assembly, or failure to retest, shall be grounds for termination of water service in accordance with A.A.C R14-2-410.

Note to Commodity Rates:

- (a) Construction water service shall be through a Company-approved meter, provided by the customer, and attached to a Company fire hydrant. If the customer does not provide a meter, the Company will provide a meter and will require a refundable deposit from the customer equal to the cost of the meter. The Company is under no obligation to provide construction water service. The Company will provide construction water service at its sole discretion and only as water is available. That construction water service may be withdrawn or restricted at any time by the Company at its sole discretion. The Customer shall be responsible for transporting that construction water from the assigned meter and hydrant to the place of use. Any attempt by the customer, their subcontractors, or any other entity to take construction water through any means not specifically approved by the Company shall be deemed to be an illegal connection and treated as water theft.

The Low Income Surcharge will be added to the highest block commodity rate (residential, apartment, individual and commercial customers only), and will change upon the Company's annual reconciliation of number of participants and top tier usage.

Low Income Program details are noted on the Low Income Assistance Program Tariff on Sheets 4.0-4.1 under the Customer Assistance Programs section.

Decision No. XXXXX

San Tan Water District  
(Name of Service Area)

**GENERAL WATER SERVICE**

**Terms and Conditions**

Water service provided under this rate schedule is subject to this District's Rules and Regulations applicable to Water Service and may be subject to this District's Service Charges set forth in subsections, Customer Assistance Programs, Adjustor Mechanisms and Miscellaneous Service Charges included in the Company's tariffs on file with the Arizona Corporation Commission.

Water service under this Schedule is for the exclusive use of the Customer and water shall not be resold or provided to others.

In addition to the collection of regular rates, the utility will collect from its customers a proportionate share of any privilege, sales, use and franchise or other governmental tax, per Commission Rule 14-2-409.D.5.

A 1½% late payment penalty will be applied to account balances not paid within fifteen (15) days after the postmark date of the bill in accordance with Arizona Administrative Code R14-2-310.C.

From time to time, the Company may provide public notices, specific notices, correspondence or other notifications ("Notices") regarding the presence of conditions affecting the quality and/or quantity of water service provided by the Company. (Examples of such Notices include, but are not limited to, boil water alerts, notice of hydrant or main flushing, and notice of water quality testing results.) These Notices may contain information about actions members of the public may wish to, are recommended to, or should take in response to the conditions identified in the Notice. In the event the Company issues a Notice, the Company will not be liable for any expenses or costs incurred by a customer or end user for any action taken in response to any condition identified in the Notice.

**GENERAL WATER SERVICE**

**Terms and Conditions (continued)**

Liability

1. Water pressure for Private Fire Service and Public Fire Hydrant Service. The Utility will supply only such water at such pressures as may be available from time to time as a result of the normal operation of its water system. The Utility does not guarantee a specific water pressure or gallons per minute flow rate at any public fire hydrant or private fire service. In the event service is interrupted or irregular or defective or fails from causes beyond the Utility's control or through ordinary negligence of its employees or agents, the Utility will not be liable for any injuries or damages arising therefrom. Ratepayers shall not be required to reimburse through rates, damages from the acts of omissions of the Utility, its principals, agents or employees.
2. Limitation of Utility Responsibility. The Utility does not assume the responsibility of inspecting or maintaining any customer's piping or apparatus and will not be responsible therefor; however, the Utility reserves the right to refuse water service unless the customer's piping or apparatus is installed in such manner as to prevent cross connections or backflow into the Utility's system in compliance with the Utility's Cross Connection/Backflow Tariff as approved by the Commission.
3. Third party claims. Utility will not be responsible for any third-party claims against Utility that arise from Customer's use of Utility's utility service unless such claims are caused by the Utility's willful misconduct or gross negligence.
4. Indemnity. Customer will indemnify, defend and hold harmless the Utility (including the costs of reasonable attorney's fees) against all claims (including, without limitation, claims for damages to any business or property, or injury to, or death of, any person) arising out of any wrongful act or negligent omission of the Customer, or the Customer's agents, in connection with the Utility's service or facilities.
5. Limitation of damages. The liability of the Utility for damages of any nature arising from errors, mistakes, omissions, interruptions, or delays of the Utility, its agents, servants, or employees, in the course of establishing, furnishing, rearranging, moving, terminating, or changing the service or facilities or equipment shall not exceed an amount equal to the charges applicable under the Utility's tariff (calculated on a proportionate basis where appropriate) to the period during which the error, mistake, omission, interruption or delay occurs, except if such damages are caused by the Utility's willful misconduct or gross negligence.
6. Incidental, indirect, special, or consequential damages. In no event will the Utility be liable for any incidental, indirect, special, or consequential damages (including lost revenue or profits) of any kind whatsoever regardless of the cause or foresee ability thereof.
7. Interference with Utility facilities. The Utility will not be responsible in any occasion for any loss or damage caused by the negligence or wrongful act of the Customer or any of his agents, employees or licensees in installing, maintaining, using, operating or interfering with any Utility facilities.

**NON-POTABLE WATER**

**NON-POTABLE CENTRAL ARIZONA WATER PROJECT WATER SERVICE**

**Availability.** Within the Company's certificated area, Central Arizona Project ("CAP") water may be purchased when available and subject to the terms and conditions set forth herein. Portions of the delivery service will be provided through certain facilities owned by New Magma Irrigation and Drainage District ("NMIDD") under a wheeling agreement with the Company. Service availability to the customer is contingent upon the availability of those NMIDD facilities pursuant to the wheeling agreement.

**Suitability.** It is the customer's responsibility to determine the initial and continuing suitability of the non-potable CAP water furnished under this tariff for any intended uses. The Company does not treat, test or monitor non-potable CAP water and furnishes it to customers strictly on an "as-received" basis from the Central Arizona Water Conservation District ("CAWCD") and as wheeled by NMIDD. The customer agrees to accept non-potable CAP water "as received." Compliance with any requirement of the Arizona Department of Environmental Quality, or any other agency having jurisdiction, concerning the use or quality of non-potable CAP water shall be the sole responsibility of the customer. The Company will not be liable for, and the customer will hold harmless, indemnify and defend the Company against, any injuries or damages arising from its service of non-potable CAP water.

**Facilities and Demand.** When applying for non-potable CAP water service, the customer shall specify the maximum annual quantity of CAP water in acre feet ("AF") that it intends to use under this tariff schedule and pursuant to a Non-Potable Water Facilities Contribution Agreement. This quantity of water will be used to determine the facilities required to serve the customer and will be the customer's maximum demand for non-potable CAP water ("CAP Demand") during any calendar year. The customer will be responsible for the annual CAWCD M&I Water Service Capital Charge on the CAP Demand. The customer will contribute the funds required to install all facilities needed to provide CAP water. Such facilities will be owned by the Company.

**Monthly Bill.** The monthly billing will consist of the following components:

- a. A monthly CAP Demand charge equal to 1/12th of the customer's CAP Demand in AF times the applicable CAWCD M&I Water Service Capital Charge per AF plus four percent (4%) of such costs to cover the Company's administrative and handling costs.
- b. A meter charge based on the applicable monthly minimum charge by meter size as set forth in each system's General Service tariff schedule. This meter charge shall not include any water.
- c. A commodity charge designed to pass on all costs of non-potable CAP water, except the monthly CAP Demand charge, as billed to the Company during the previous month by the CAWCD or any other authorized governmental agency, plus one percent (1%) of such costs to cover the Company's administrative and handling costs.

**NON-POTABLE WATER**

**NON-POTABLE CENTRAL ARIZONA WATER PROJECT WATER SERVICE (continued)**

- d. A power, maintenance, wheeling and depreciation charge based on the specific requirements of each customer.
  - i. The power component will be the direct and separately metered cost of the power billed to the Company during the previous month for CAP water delivered to the customer, plus one percent (1%) of the power cost to cover the Company's administrative and handling costs. If multiple customers are being served by common facilities, the power component will be prorated based on CAP water actually used during the month by each customer.
  - ii. The maintenance component will be the actual costs of maintaining the facilities required to serve the customer, plus a ten percent (10%) charge to provide for overhead and margin. If multiple customers are being served by common facilities, the maintenance component will be prorated based on each customer's CAP Demand.
  - iii. The wheeling component will be the actual costs to the Company of any and all costs to the Company associated with the NMIDD Wheeling Agreement, plus one percent (1%) of the contract cost to cover the Company's administrative and handling costs. If multiple customers are being served by common facilities, the power component will be prorated based upon CAP water actually used during the month by each customer.
  - iv. The depreciation component will be 1/12th of the product of the Company's book depreciation rate, as authorized by the Arizona Corporation Commission, times the original cost of the plant facilities serving the customer. If multiple customers are being served by common facilities, the depreciation component will be prorated based on each customer's CAP Demand.

**Terms and Conditions**

Water service provided under this rate schedule is subject to this District's Rules and Regulations applicable to Water Service and may be subject to this District's Service Charges set forth in tariffs in subsections, Customer Assistance Programs, Adjustor Mechanism and Miscellaneous Service Charges included in the Company's tariff on file with the Arizona Corporation Commission.

Water service under this Schedule is for the exclusive use of the Customer and water shall not be resold or provided to others.

In addition to the collection of regular rates, the utility will collect from its customers a proportionate share of any privilege, sales, use, franchise or other governmental tax, per Commission Rule 14-2-409.D.5.

A 1-1/2% late payment penalty will be applied to account balances not paid within fifteen (15) days after the postmark date of the bill in accordance with Arizona Administrative Code R14-2-310.C.

**CUSTOMER ASSISTANCE PROGRAMS**

**LOW INCOME ASSISTANCE PROGRAM TARIFF**

**LOW INCOME ASSISTANCE PROGRAM**

The Low Income Assistance Program ("Program") offered by the Company is designed as a short-term relief program. The Program provides assistance to residential customers in the San Tan Water District. Customers must complete the Low Income Assistance Application and provide necessary documentation to show they meet the qualifying guidelines. Details can be found in the Company's Plan of Administration for the Program.

**Availability**

Customers that meet the eligibility requirements shall be enrolled in the Program on a first come, first served basis up to a combined maximum level of 1,000 participants for the San Tan Water District and San Tan Wastewater District. [Note: a participant receiving a low income assistance credit for both water and wastewater counts as two participants for purposes of calculating maximum participants]. Once the Program has reached full participation, any future applicants will be placed on a wait list.

To qualify, applicants must:

- Be a resident and residential customer in the San Tan Water District.
- Be the primary account holder or a person residing in housing in a homeowner's association, apartment complex or mobile home park.
- Not be claimed as a dependent on another person's tax return
- Not have gross annual household income that exceeds 200% of the Federal Poverty Guidelines for the current year (to be updated annually).

There is an annual recertification requirement whereby the applicant must reapply each year based on the timeline determined by the Company.

**Low Income Credit**

Those customers that are the primary account holder will receive a monthly credit of \$10.00 on their water bill. For those customers who reside in multi-unit housing, checks will be written on a bi-annual basis for the number of months that the customer is eligible for the credit during that 6-month period.

**Low Income Surcharge**

The low income assistance credit will be recovered via a surcharge on the high-usage block to residential and commercial customers in the San Tan Water District.

**CUSTOMER ASSISTANCE PROGRAMS**

**LOW INCOME ASSISTANCE PROGRAM TARIFF** (continued)

Surcharge added to the highest block volumetric rate Rate per 1,000 gallons  
~~\$X.XXXX~~\$0.0134 \*

\* Rate consists of ~~\$x.xxxx~~\$0.0055 surcharge per 1,000 gallons of usage to charge the under collection of prior years' surcharge and ~~\$x.xxxx~~\$0.0079 per 1,000 gallons of usage for the collection of current annual Low Income charges.

**Reporting**

The Company will file with Docket Control, by March 31 of each year, an annual report detailing the

- Number of water low income assistance participants from the previous calendar year;
- Total amount of discounts given;
- Direct and indirect costs associated with the Program;
- Collections made from all water ratepayers used to fund the Program; and
- Provide updated gross annual income guidelines as necessary from the federal government.

The first report will be based on the period from Program inception through December 31, 2022. The reporting period for all subsequent year filings will be on a calendar basis. This report will be filed within 90 days of the end of the initial reporting period, March 31, and then annually thereafter.

As part of each annual filing, the Company will perform a reconciliation for the prior year reporting period comparing the amounts recovered from the surcharge to the amounts credited to the Program participants. Any over- or under- collection will be trued up with the subsequent year's low income Program costs.

Annual revisions to the surcharge will become administratively effective 30 days after the filing date.

**Terms and Conditions**

All rates in this Schedule shall be subject to their proportionate part of any taxes or other governmental imposts, which are assessed directly or indirectly on the basis of revenues derived from service under this Schedule.

For primary account holders, no checks will be issued for excess credits generated by this Program.

**CUSTOMER ASSISTANCE PROGRAMS**

**DEPLOYED SERVICE MEMBER CREDIT PROGRAM TARIFF**

**DEPLOYED SERVICE MEMBER CREDIT PROGRAM**

The Deployed Service Member Credit Program is designed as a temporary relief Program for service members serving away from their primary residences for an extended period of time. The Program provides relief to service members who are residential customers in the San Tan Water District. Details can be found in the Company's Deployed Service Member Credit Program's Plan of Administration.

**Availability**

Customers must provide necessary documentation to show they meet the qualifying guidelines. A combined maximum of 100 service members may be enrolled in the Program at any time for the San Tan Water District and San Tan Wastewater District but the Company is permitted to seek Arizona Corporation Commission's approval to change participant limits based on level of participation. [Note: a participant receiving a low income assistance credit for both water and wastewater counts as two participants for purposes of calculating maximum participants]. Once the Program has reached full participation, any future applicants will be placed on a wait list.

To qualify for this Program, a service member must:

- Be on active duty for the Army, Navy, Marines, Air Force, Coast Guard, or National Guard.
- Be deployed, on a deployment that is not a "permanent change of station" and is not a short-term deployment in which a spouse and/or dependents remain stateside.
- Have the residence in EPCOR's service area as the service member's primary residence, not secondary to another primary residence.
- Not have any family living in the residence in EPCOR's service area during the service member's absence.

Each service member's eligibility must be determined based on written orders from the service member's command. Each service member's continued eligibility must be determined periodically through a recertification process.

**Deployed Service Member Credit**

For those qualified customers, during a service member's enrollment, the Program will provide a monthly bill credit covering the enrolled service member's entire monthly water bill.

**Funding**

EPCOR will defer all costs of the Program for recovery in EPCOR's next San Tan Water District's general rate case.

**DISABLED MILITARY VETERAN CREDIT PROGRAM TARIFF**

**DISABLED MILITARY VETERAN CREDIT PROGRAM**

The Disabled Military Veteran Credit Program is designed as a relief program for individuals disabled as part of their military service. The Program provides relief to disabled veterans who are residential customers in the San Tan Water District. Details can be found in the Company's Disabled Military Veteran Credit Program's Plan of Administration.

**Availability**

Customers must provide necessary documentation to show they meet the qualifying guidelines. A maximum combined total of 1,000 disabled veterans for the San Tan Water District and San Tan Wastewater District may be enrolled in the Program at any time. Enrollment in the Program will be determined on a first-come, first-served basis. [Note: a participant receiving a low income assistance credit for both water and wastewater counts as two participants for purposes of calculating maximum participants]. Once the Program has reached full participation, any future applicants will be placed on a wait list.

To qualify for this Program, a disabled veteran must:

- Present a Benefit Summary Letter from the United States Department of Veterans Affairs demonstrating that the individual had any level of disability as a result of military service, or;
- Present a Veteran Health Identification Card from the United States Department of Veterans Affairs demonstrating that the individual had any level of disability as a result of military service.

**Disabled Military Veteran Credit**

For those qualified customers, the Program will provide a monthly bill credit of \$10.00.

**Funding**

EPCOR will defer all costs of the Program for recovery in EPCOR's San Tan Water District's next general water rate case.

Decision No. XXXXX

San Tan Water District  
(Name of Service Area)

**ADJUSTOR MECHANISMS**

**SUSTAINABLE WATER SURCHARGE ("SWS")**

In Decision No. 78546 dated April 28, 2022, the Arizona Corporation Commission authorized the Company to implement a Sustainable Water Surcharge ("SWS") adjustor mechanism to recover the annual tax assessments imposed upon the Company by the CAGRDR as a result of the Company's membership in the CAGRDR, as well as costs incurred to acquire alternate sustainable water resources. Accordingly, in addition to all other applicable rates and charges in these tariffs, each customer shall pay a monthly SWS that is a combination of both a CAGRDR surcharge per thousand gallons of water delivered and a surcharge for Other Recoverable Costs (e.g. CAP costs, Gila River Indian Community Costs, Salt River Project costs, Groundwater Withdrawal Fees, etc.). The SWS is effective for all metered water service rendered in all water service areas for all classes of service on and after Month, Date, Year, in accordance with all conditions set forth in Decision No. 78546.

The SWS per kgal shall be the sum of the Estimated CAGRDR Payments per thousand gallons and the Estimated Other Recoverable Cost Payments per thousand gallons for each AMA. The Estimated CAGRDR Surcharge per 1,000 gallons shall be calculated as follows: The actual annual CAGRDR costs for the prior year (billed in August of the current year) in the Phoenix Active Management Area ("Phoenix AMA") shall be divided by the gallons sold in the current year (Actual Sales for January thru September and estimated sales for October, November, and December) to determine a CAGRDR fee per 1,000 gallons delivered to customers in the Phoenix AMA. The Other Recoverable Costs Surcharge per thousand gallons shall be calculated by reflecting the invoiced charges for CAP Costs, Gila River Indian Community Costs, Salt River Project costs, Groundwater Withdrawal Fees, etc. when applicable. The Total Prior Year's (Over) Under recovery shall be added to the Total Estimated CAGRDR Payments to compute the Proposed CAGRDR Surcharge per kgal.

Similarly, the actual annual CAGRDR costs for the prior year (billed in August of the current year) in the Pinal Active Management Area ("Pinal AMA") shall be divided by the gallons sold in the current year (Actual Sales for January thru September and estimated sales for October, November, and December) to determine a CAGRDR fee per 1,000 gallons delivered to customers in the Pinal AMA. The Other Recoverable Costs Surcharge per thousand gallons shall be calculated by reflecting the invoiced charges for CAP Costs, Gila River Indian Community Costs, Salt River Project costs, Groundwater Withdrawal Fees, etc. when applicable. The Total Prior Year's (Over) Under recovery shall be added to the Total Estimated CAGRDR Payments to compute the Proposed CAGRDR Surcharge per kgal.

The Estimated Other Recoverable Cost Payments per 1,000 gallons shall be the estimated costs of current CAP costs, Gila River Indian Community Costs, Salt River Project costs, Groundwater Withdrawal Fees that are included in the prior year's actual Other Recoverable Costs applicable to each AMA divided by the Projected Sales based on the Prior Year's sales used in determining Recoveries.

Decision No. XXXXX

San Tan Water District  
(Name of Service Area)

**ADJUSTOR MECHANISMS**

**SUSTAINABLE WATER SURCHARGE ("SWS") (continued)**

By October 31st of each year, the Company shall submit for Commission consideration its proposed SWS adjustor fees for the Phoenix AMA and the Pinal AMA, along with the calculations and documentation from all relevant sources to support the data used in the calculations. The Commission-approved SWS shall become effective ~~on~~<sup>by</sup> January 1 and shall remain in effect until the next SWS fee is calculated and approved. To prevent over or under recovery of the SWS components, an annual true-up of the prior year's collections shall be performed at the time the Company submits its proposed SWS adjustor to the Commission. Any over or under recovery of recoverable costs (CAGR and Other Recoverable Costs) shall be included in the next year's computation.

SWS Adjustor Fees.

A SWS adjustor fee shall be applicable to each thousand gallons of water sold, as follows:

| <u>AMA Where Customer Resides:</u> | <u>Rate Per Thousand Gallons of Water Delivered:</u>           |
|------------------------------------|--|
| Phoenix AMA                        | <del>\$X.XX\$2.89</del> (effective 12/1/ <del>YYYY2023</del> ) |
| Pinal AMA                          | <del>\$X.XX\$0.32</del> (effective 12/1/ <del>YYYY2023</del> ) |

**ADJUSTOR MECHANISMS**

**RATE CASE EXPENSE SURCHARGE**

Decision Number ~~XXXXX78439~~ authorized the Company to recover approved rate case expense over a three year period and collected through a Rate Case Expense Surcharge. This surcharge will terminate once the Rate Case Expense has been collected.

Applicability

Applicable to all customers served in this service area except for sales of effluent.

Surcharge Rate

Flat charge per month ~~\$X.XX0-16~~

**Terms and Conditions**

The Company will annually file with the Commission, as part of its Annual Report to the Commission's Utility Division, a report indicating the amount of the expense collected through the Rate Case Expense Surcharge and the amount of the Rate Case Expense still outstanding.

This surcharge will appear on each applicable customer bill as a separate line item.

All rates in this Schedule shall be subject to their proportionate part of any taxes or other governmental imposts that are assessed directly or indirectly on the basis of revenues derived from this Schedule.

**HOOK-UP FEES**

**COMMON OFF-SITE FACILITIES HOOK-UP FEE**

**I4. Purpose and Applicability.**

The purpose of the ~~Common Off-site~~ Facilities Hook-up Fee (~~also referred to as "Hook-up Fees"~~) payable to EPCOR Water Arizona Inc. ("the Company") pursuant to this tariff is to equitably apportion the costs of constructing additional ~~common water off-site facilities infrastructure necessary~~ to provide water production, delivery, treatment, storage and pressure among all new service connections. These charges ~~The Hook-up Fees~~ are applicable to all new service connections established after the effective date of this tariff ~~undertaken via a Main Extension Agreement or requests for service not requiring a Main Extension Agreement~~. The ~~charges~~ Hook-up Fees are one-time charges and are payable as a condition to the Company's establishment of service, as more particularly provided below. ~~The Hook-up Fees are in addition to Service Line and Meter Installation Charges, the requirement for on-site facilities to be installed pursuant to approved Main Extension Agreements, and the payment of Monthly Water Usage Charges, Commodity Charges and other charges authorized under this tariff.~~

**II2. Definitions.**

Unless the context otherwise requires, the definitions set forth in R-14-2-401 of the Arizona Corporation Commission's ("Commission") rules and regulations governing water utilities shall apply in interpreting this tariff schedule.

"Applicant" means any Person (as defined at A.A.C. R14-2-401(22)) ~~party~~ entering into an agreement with the Company for the installation of water facilities to serve new service connections, and may include dDevelopers and/or bBuilders of new residential subdivisions, but may also include commercial and industrial developers, including but not limited to persons utilizing water for industrial processes ~~and/or commercial and industrial properties.~~

"Main Extension" has the meaning as set forth in A.A.C. R14-2-401(14), and which may be either located on-site or off-site. ~~"Company" means EPCOR Water Arizona Inc., San Tan Water.~~

"Main Extension Agreement" means any agreement whereby an Applicant, Developer and/or Builder agrees to advance the costs of the installation of water facilities, which may include Common Facilities, to necessary for the Company to serve new service connections ~~within a development~~, or installs ~~such~~ water facilities ~~necessary~~ to serve new service connections and transfers ownership of such water facilities to the Company, in either case which agreement shall require the approval of the Commission pursuant to A.A.C. R-14-2-406, and shall have the same meaning as "Water Facilities Agreement" or "Line Extension Agreement." A Main Extension Agreement may also include provisions governing the design, construction and conveyance of Off Site Facilities or Common Facilities, even if those facilities are not subject to the refund provisions of such agreement.

~~d.~~ "Off-site Common Facilities" means all wells, storage tanks, and related appurtenances necessary for proper operation, including engineering and design costs. Off-site Facilities may also include production, treatment, booster pumps, pressure tanks, transmission mains and related appurtenances, necessary for proper operation if these facilities are including engineering and design costs (and may include any expansions of existing facilities), constructed for the benefit of the entire water system and not for the exclusive use of the Applicant's development and will benefit the entire water system.

"Off Site Facilities" means those facilities – including but not limited to for pressure, storage and water supply – that are being designed and built for the exclusive use of Applicant's development and are not for the benefit of the entire water system (and may include any expansions of existing facilities). Off Site Facilities does not include any mains or ancillary equipment that are Main Extensions as defined herein.

e. "Service Connection" means and includes any connection for waterall service for connections any residential, commercial or industrial use (whether domestic or otherwise)for single family residential or commercial, industrial or other uses, regardless of meter size, and may also includes any unmetered service connections, including for such anys fire lines that ismay be constructed separately from other water supply lines. In such instances, the Hook Up Fee shall be charged on the basis of the size of the connection and the quantity of points of connection.

**HOOK-UP FEES**

**COMMON OFF-SITE FACILITIES HOOK-UP FEE (continued)**

**III.3. Common Off-site Facilities Hook-up Fee:**

For each new service connection, the Company shall collect an Off-site Common Facilities Hook-up Fee derived from as listed in the following table:

| <b>OFF-SITE WATER FACILITY HOOK-UP FEE TARIFF</b> |            |
|---|------------|
| Meter Size  | Total Fee  |
| 5/8 x 3/4 Inch                                    | \$ 2,900   |
| 3/4 Inch  | \$ 2,900   |
| 1 Inch  | \$ 2,900   |
| 1-1/2 Inch  | \$ 14,000  |
| 2 Inch  | \$ 22,400  |
| 3 Inch  | \$ 42,000  |
| 4 Inch  | \$ 70,000  |
| 6 Inch  | \$ 140,000 |
| 8 Inch  | \$ 224,000 |
| 10 Inch or greater                                | \$ 322,000 |

**IV.4. Terms and Conditions.**

(A) Assessment of One -Time Common Off-site Facilities Hook-up Fee:- The Common Off-site Facilities Hook-up Fee may be assessed only once per parcel, service connection, or lot within a subdivision (similar to meter and service line installation charges).

(B) Use of Off-site Common Facilities Hook-up Fees:- Off-site Common Facilities Hook-up Fees may only be used to pay for capital items of Common Off-site Facilities, or for repayment of loans obtained to fund the cost of installation of Off-site Common Facilities. Off-site Common Facilities Hook-up Fees shall not be used to cover for repairs, maintenance or operational costs purposes.

(C) Time of Payment:-

1) For those requiring a Main Extension Agreement:- In the event that the Applicant that will be constructing improvements is required to enter into a Main Extension Agreement, whereby the Applicant agrees to advance the costs of installing mains, valves, fittings, hydrants and other on-site improvements or to construct such improvements in order to extend service in accordance with R-14-2-406(B), payment of the Hook-up Common Facilities hook-up Fees required hereunder shall be made by the Applicant no later than 3045 calendar days after the effective date of that Main Extension Agreement. Additionally, Company shall file the Main Extension Agreement with receipt of notification from the Company that the Utilities Division of the Arizona Corporation Commission has approved the Main Extension Agreement in accordance with R-14-2-406(M) and notify Applicant when approval is received.

(Name of Service Area)

**HOOK-UP FEES**

**OFF-SITE COMMON FACILITIES HOOK-UP FEE (continued)**

~~2)i-~~ ~~For those connecting to an existing main:~~ In the event that the Applicant ~~for the service~~ is not required to enter into a Main Extension Agreement ~~or any other facilities improvement agreement~~, the ~~charges~~ Hook-up Fees required hereunder shall be due and payable at the time the meter and service line installation fee is due and payable.

~~(D)e-~~ ~~Off-site Common Facilities Construction by Applicant/Developer:-~~ The Company and ~~the~~ Applicant may agree to construction of ~~Off-site Common~~ Facilities necessary to serve a particular development by ~~the~~ Applicant, which facilities are then conveyed to the Company. In that event, ~~the~~ Company shall credit the total cost of such ~~Off-site Common~~ Facilities as an offset to ~~the Off-site Common~~ Facilities ~~Hhook-up F~~ees due under this ~~T~~ariff. If the total cost of the ~~Off-site Common~~ Facilities constructed by ~~the~~ Applicant and conveyed to ~~the~~ Company is less than the applicable ~~Off-site Common~~ Facilities ~~Hhook-up F~~ees under this ~~t~~ariff, ~~then the~~ Applicant shall pay the remaining amount of ~~the Off-site Common~~ Facilities ~~Hhook-up F~~ees owed hereunder ~~upon acceptance of the Off-site Facilities by the Company~~. If the total cost of the ~~Off-site Common~~ Facilities contributed by ~~the~~ Applicant, Developer or Builder and conveyed to ~~the~~ Company is more than the applicable ~~Off-site Common~~ Facilities ~~Hhook-up F~~ees under this ~~t~~ariff, ~~then the~~ Applicant shall be refunded the difference upon acceptance of the ~~Off-site Common~~ Facilities by the Company. The refund may be paid in installments over a period of time pursuant to an agreement between the Company and the developer on a case by case basis.

1) The Company and Applicant may agree to construction of additional facilities that are not Common Facilities and are not Main Extensions, the cost of which shall not be subject to off-set under this paragraph IV.D, but which may will be subject to refund under R14-2-406(D) but where Company may, in the alternative, instead require a contribution from Applicant that will not be subject to any hook-up fee credit.

2) Any oversizing of any facilities that will be constructed by Applicant, whether Common Facilities, Off-Site Facilities, or Main Extensions, required by the Company will be subject to reimbursement, which may be done in one or more installments and will be independent of the refunding otherwise set forth in this provision.

(E) Other Facilities That Are Not Main Extensions or Common Facilities. Any facilities necessary for Applicant's development that are neither a Main Extension nor Common Facilities as defined herein, which may include but are not limited to additional facilities for storage, pressure and water supply, are Off-Site Facilities where a contribution may be required from Applicant and where such contribution will not be subject to any hook-up fee credit. This contribution will be independent of hook-up fees assessed for Common Facilities, and may be in the form of (1) an additional cash contribution; or (2) design and construction of such facilities by Applicant, which are subsequently conveyed to the Company. The total costs for such Off-Site Facilities will include design and engineering costs. At the Company's discretion, the Company may instead agree to treatment of such contribution(s) as a refundable advance subject to refund on the same terms as set forth in the Company's tariffs.

~~Fe. — Failure to Pay Fees; Delinquent Payments. The Company will not be obligated to make an advance commitment to provide or actually provide water service to any Applicant if the Applicant has not paid in full~~

**HOOK-UP FEES**

**COMMON FACILITIES HOOK-UP FEE (continued)**

(F) Failure to Pay Charges; Delinquent Payments: The Company will not be obligated to provide water service to any Applicant or other applicant for service in the event that such Applicant has not paid in full all charges hereunder. Under no circumstances will the Company set a meter or otherwise allow service to be established if the entire amount of any payment has not been paid.

(GF)f. Large Subdivision and/or Development Projects: In the event that the Applicant is engaged in the development of a residential subdivision ~~and/or development~~ containing more than 150 lots, and is a party to a Main Extension Agreement with the Company for such development, the Company may, in its discretion, agree to payment of ~~the Common Off-site~~ Facilities Hook-up Fees in installments. Such installments may be based on the residential subdivision ~~and/or~~ development's phasing, and should attempt to equitably apportion the payment of charges hereunder based on the Applicant's construction schedule and water service requirements. ~~In the alternative, the Applicant shall post an irrevocable letter of credit in favor of the Company in a commercially reasonable form, which may be drawn by the Company consistent with the actual or planned construction and Hook up Fees schedule for the subdivision and/or development.~~

(HG)g. Off-site Common Facilities Hook-Up Fees Non-refundable: The amounts collected by the Company ~~as Off site Facilities Hook-up Fees~~ pursuant to the ~~Off-site Common~~ Facilities Hook-up fee tariff shall be non-refundable contributions in aid of construction.

**HOOK-UP FEES**

**OFF-SITE FACILITIES HOOK-UP FEE (continued)**

**OFF-SITE FACILITIES HOOK-UP FEE (continued)**

~~(I)h. Use of Off-site Facilities Hook-up Fees Received. All funds collected by the Company as Off-site Facilities Hook-up Fees shall be used solely for the purposes of paying for the costs of installation of the Off-site Facilities, including repayment of loans obtained for the installation of Off-site Facilities that will benefit the entire water system.~~

~~i. Off-site Common Facilities Hook-up Fees in Addition to Main Extensions On-site Facilities:- The Off-site Common Facilities Hhook-up fFee shall be in addition to any costs associated with the construction of those Main Extensions on-site facilities or other additional facilities under Paragraph IV.D that are not Common Facilities, above, required under a Main Extension Agreement.~~

~~(J)j. Disposition of Excess Funds:- After all necessary and desirable Off-site Common Facilities are constructed utilizing funds collected pursuant to the Off-site Common Facilities Hhook-up fFees, or if the Off-site Common Facilities hHook-up fFee has been terminated by order of the Arizona Corporation Commission, any funds remaining on the balance of hook-up fees shall be refunded. The manner of the refund shall be determined by the Commission at the time a refund becomes necessary.~~

~~(K)k. Fire Flow Requirements:- In the event the Applicant for service has fire flow requirements that require additional facilities beyond those facilities whose costs were included in the Off-site Common Facilities Hhook-up fFee, and which are contemplated to be constructed using the proceeds of the Off-site Common Facilities Hhook-up fFee, the Company may require the Applicant to install such additional facilities as are required to meet those additional fire flow requirements, as a non-refundable contribution, in addition to paying the Off-site Common Facilities Hhook-up Ffee.~~

~~(L)l. Status Reporting Requirements to the Commission:- The Company shall submit a calendar year Off-site Common Facilities Hhook-up Ffee status report each February 28 January 31<sup>st</sup> to Docket Control for the prior twelve (12) month period, beginning February 28 January 31, 2022 2025, until the Off-site Common Facilities Hhook-up Ffee tariff is no longer in effect. This status report shall contain a list of all customers that have paid the Off-site Common Facilities Hhook-up Ffee tariff, the amount each has paid, the physical location/address of the property in respect of which such fee was paid, the amount of money spent from the hook-up fees collected balance, the amount of interest earned (if any) on the balance of hook-up fees collected, and a list of all facilities that have been installed with the tariff funds during the 12-month period.~~

San Tan Water District  
(Name of Service Area)**HOOK-UP FEES****COMMON FACILITIES HOOK-UP FEE (continued)****V. LARGE WATER USERS**

Any development with a projected average daily water demand greater than 1,700 gallons per day per acre is considered to be a Large User. Large Users will be required to provide an additional renewable water supply source to the Company to meet the demands of the development that are greater than 1,700 gallons per day per acre. Examples of a renewable water supply source include surface water or a groundwater well with long-term storage credits. The renewable water supply source must be approved by the Company, and must have the appropriately allocated water rights that will be conveyed to the Company. The costs to provide a renewable water supply source to the Company will not be credited as an offset to the Common Facilities Hook-Up Fee because such costs will be due to the exclusive need for additional water by the Large User; however, the cost of the portion of a renewable water supply source that is in excess of the Large User's need will be credited as an offset to the Common Facilities Hook-Up Fee.

Large Users may be required to enter into an agreement with the Company that will define terms and conditions, and will include fees that will be charged to Large Users for over usage. Fees will incur if Large Users use water in excess of the supply source provided, which will be reviewed by the Company on an annual basis. Continued excessive use could result in the Company requiring the Large User to develop and implement a water use reduction plan or, as a last resort, court action.

**BEST MANAGEMENT PRACTICES**

**Public Education Program Tariff – BMP**

**PURPOSE**

A program for the Company to provide free written information on water conservation measures to its customers and to remind them of the importance of conserving water (Required Public Education Program).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall provide two newsletters to each customer; one to be provided in the spring, the other in the fall. The goal of the letters is to provide timely information to customers in preparation of the hot summer months, and the cold winter months, in regards to water uses. The Company shall remind customers of the importance of water conservation measures and inform them of the information available from the Company.
2. Information in the newsletters shall include water savings tips, home preparation recommendations for water systems/pipes, landscape maintenance issues for summer and winter, water cistern maintenance reminders and additional pertinent digital format which can be e-mailed to customers upon request or posted on the Company's website.
3. Communication channels shall include one or more of the following: water bill inserts, messages on water bills, Company web page, post cards, e-mails and special mailings of print pieces, whichever is the most cost-effective and appropriate for the subject at hand.
4. Free written water conservation materials shall be available in the Company's business office and the Company shall send information to customers on request.
5. The Company may distribute water conservation information at other locations such as libraries, chamber of commerce, community events, etc., as well.
6. The Company shall keep a record of the following information and make it available to the Commission upon request.
  - a. A description of each communication channel (i.e., the way messages will be provided) and the number of times it has been used.
  - b. The number of customers reached (or an estimate).
  - c. A description of the written water conservation material provided free to customers.

**BEST MANAGEMENT PRACTICES****New Homeowner Landscape Information Tariff – BMP 2.3****PURPOSE**

A program for the Company to promote the conservation of water by providing a landscape information package for the purpose of educating its new customers about low water use landscaping (Modified Non-Per Capita Conservation Program BMP Category 2: Conservation Education and Training 2.3: New Homeowner Landscape Information).

**REQUIREMENTS:**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. Upon establishment of water service the Company shall provide a free "Homeowner Landscape Packet" to each new customer in the Company's service area. The packet will include at a minimum: a cover letter describing the water conservation expectations for all customers in the Company's service area, all applicable rate tariffs, a basic interior-exterior water saving pamphlet, xeriscape landscape information, and information on where to find low water use plant lists, watering guidelines, and a rain water harvesting pamphlet.
2. Upon customer request, the Company shall provide:
  - a. On-site consultations on low water use landscaping and efficient watering practices.
  - b. A summary of water saving options.
3. The number of packets provided to new customers will be recorded and made available to the Commission upon request.

**BEST MANAGEMENT PRACTICES****Residential Audit Program Tariff – BMP 3.1****PURPOSE**

A program for the Company to promote water conservation by providing customers with information on performing water audits to determine conservation opportunities at their residence (Modified Non-Per Capita Conservation Program BMP Category 3: Outreach Services 3.1: Residential Audit Program).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall offer self-audit information.
2. The Company or designated representative shall provide all customers that request them with a self-audit kit.
3. The kit shall include detailed instructions and tools for completing the water audit including information on how to check their water meter. The audit kit shall include but not be limited to information on checking the following components: irrigation system, pool, water features, toilets, faucets and shower.
4. If requested, the Company shall assist the customer in a self-water audit and assist the customer in determining what might be causing high water usage as well as supply customer with information regarding water conservation and landscape watering guidelines. As part of the water audit, and if requested to do so by the customer, the Company shall confirm the accuracy of the customer meter (applicable meter testing fees shall apply).
5. The Company shall keep a record of the following information and make it available upon request:
  - a. A description of the water conservation material provided in the kit.
  - b. The number of kits provided to customers.
  - c. Implementation costs of the Residential Audit Program.

A program for the Company to assist its customers with their high water-use inquiries and complaints (Modified Non-Per Capita Conservation Program BMP Category 3: Outreach Services 3.6: Customer High Water Use Inquiry Resolution).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall handle high water use inquiries as calls are received.
2. Calls shall be taken by a customer service representative who has been trained on typical causes of high water consumption as well as leak detection procedures that customers can perform themselves.
3. Upon request by the customer or when the Company determines it is warranted, a trained Field Technician shall be sent to the customer's residence to verify consumption and conduct a leak detection inspection and further assist the customer with water conservation measures.
4. The Company shall follow up in some way on every customer and keep a record of inquiries and follow-up activities. .

**BEST MANAGEMENT PRACTICES****Customer High Water Use Notification Tariff – BMP 3.7****PURPOSE**

A program for the Company to monitor and notify customers when water use seems to be abnormally high and provide information that could benefit those customers and promote water conservation (Modified Non-Per Capita Conservation Program BMP Category 3: Outreach Services Program 3.7: Customer High Water Use Notification).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall track water usage for each customer and notify the customer if water use seems excessive for that particular billing for that time of the year.
2. The Company shall identify customers with high consumption and investigate each instance to determine the possible cause.
3. The Company shall contact the high water use customers via telephone, email, by mail or in person. The Company shall contact the customer as soon as practical in order to minimize the possible loss of water. The customer will not be required to do anything to receive this notification.
4. In the notification the Company shall explain some of the most common water usage problems and common solutions and points of contact for dealing with the issues.
5. In the notification, the customer will be reminded of at least the following water-consumption occurrences:
  - a. Check for leaks, running toilets, or valves or flappers that need to be replaced.
  - b. Check landscape watering system valves periodically for leaks and keep sprinkler heads in good shape.
  - c. Adjust sprinklers so only the vegetation is watered and not the house, sidewalk, or street, etc.
  - d. Continue water conservation efforts with any pools such as installing covers on pools and spas and checking for leaks around pumps.
6. In the notification, the customer will also be reminded of at least the following ordinary life events that can cause a spike in water usage:
  - a. More people in the home than usual taking baths and showers.
  - b. Doing more loads of laundry than usual.
  - c. Doing a landscape project or starting a new lawn.
  - d. Washing vehicles more often than usual.

**BEST MANAGEMENT PRACTICES****Water Waste Investigations and Information Tariff – BMP 3.8****PURPOSE**

A program for the Company to assist customers with water waste complaints and provide customers with information designed to improve water use efficiency (Modified Non-Per Capita Conservation Program Best Management Practice Category 3: Outreach Services 3.8: Water Waste Investigations and Information).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission specifically R14-2-403 and R14-2-410 and were adapted from the Arizona Departments of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall handle water waste complaints as calls are received.
2. Calls shall be taken by a customer service representative who has been trained to determine the type of water waste and to determine if it may be attributed to a leak or broken water line.
3. The Company shall follow up on every water waste complaint.
4. Upon request by the customer or when the Company determines it is warranted, a trained Field Technician shall be sent to investigate further and notify the responsible party of the waste and offer assistance and information to prevent waste in the future.
5. A letter of enforcement will be issued to customers with water running beyond the curb and/or off the customers' property due to such things as, but limited to, backwashing of pools, broken sprinkler heads, and over watering of lawns beyond the saturation point.
6. The same procedures outline above in item #4 will be followed in the event of a second violation within a 12 month period. In the event of a third violation the customer's service may be terminated per Arizona Administrative Code R14-2-410C, R14-2-410D and R14-2-410E (applicable service reconnection fees shall apply).
7. The Company shall record each account and each instance noted for water waste, and action taken and any follow-up activities.
8. Subject to the provisions of this tariff, compliance with the water waste resolution will be a condition of service.
9. The Company shall provide to its customers a complete copy of its tariff and all attachments upon request and to each new customer. The customer shall abide by the water waste restriction.
10. If a customer believes he/she has been disconnected in error, the customer may contact the Commission's Consumer Services Section at 1-800-222-7000 to initiate an investigation.

**BEST MANAGEMENT PRACTICES****Leak Detection Program Tariff – BMP 4.1****PURPOSE**

A program for the Company to systematically evaluate its water distribution system to identify and repair leaks (Modified Non-Per Capita Conservation Program Best Management Practice Category 4: Physical System Evaluation and Improvement 4.1 Leak Detection Program).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall implement a comprehensive leak detection and repair program to attain and maintain a goal of less than 10 percent unaccounted for water loss in its system(s). The program must include auditing procedures, in-field leak detection and repair efforts. The Company shall take whatever steps are necessary to ensure that its water system is operating at optimal efficiency.
2. On a systematic basis, at least every two years (annually for smaller systems), the Company shall inspect its water distribution system (to include hydrants, valves, tanks, pumps, etc. in the distribution system) to identify and repair leaks. Detection shall be followed by repair or in some cases replacement. Repair vs. replacement will depend upon site-specific leakage rates and costs.
3. Leak Detection efforts should focus on the portion of the distribution system with the greatest expected problems, including:
  - i. areas with a history of excessive leak and break rates;
  - ii. areas where leaks and breaks can result in the heaviest property damage;
  - iii. areas where system pressure is high;
  - iv. areas exposed to stray current and traffic vibration;
  - v. areas near stream crossings; and,
  - vi. areas where loads on pipe may exceed design loads.

**BEST MANAGEMENT PRACTICES****Leak Detection Program Tariff – BMP 4.1 (continued)**

4. The Company shall keep accurate and detailed records concerning its leak detection and repair/rehabilitation program and the associated costs. Records of repairs shall include: possible causes of leak; estimated amount of water lost; and date of repair. These records shall be made available to the Commission upon request.
5. The Company shall maintain a complete set of updated distribution system maps.
6. The Company shall ensure that properly functioning (accurate) and appropriately sized meters are installed on all service and source connections. All meters 1-inch and smaller shall be inspected at least once every ten years or upon registering 1,000,000 gallons of usage, whichever comes first. Meters larger than 1-inch shall be inspected at least once every five years or upon registering 1,000,000 gallons of usage, whichever comes first.
7. The inspection will be accomplished by having the meter pulled and having a Company Technician physically inspect each meter and its fittings for leaks, registers which may have become loose or are not properly attached to the meter and could be under-registering or other broken parts which need repair. In addition, meters shall be randomly selected for flow testing to identify potentially under-registering meters.
8. The Company shall conduct a water audit annually which includes the following steps to determine how efficient each water system is operating and where the losses might be.
  - a. Use coordinated monthly source and service meter readings to calculate how much water enters and leaves the system during the 12 month review period.
  - b. Track and estimate any unmetered authorized uses.
  - c. Calculate the total amount of leakage using the following formula:  
  
 Unaccounted for water (%) = [(Production and/or purchased water minus (metered use & estimated authorized un-metered use) / (Production and/or purchased water)] x 100
  - d. Authorized un-metered uses may include firefighting, main flushing, process water for water treatment plants, etc. Water losses include all water that is not identified as authorized metered water use or authorized un-metered use.
  - e. Determine possible reasons for leakage, including physical leaks and unauthorized uses.
  - f. Analyze results to determine the improvements needed, such as, better accounting practices, leak survey or replacing old distribution pipes.
9. The Company shall keep accurate and detailed records concerning its annual water audit results. These records shall be made available to the Commission upon request.

**BEST MANAGEMENT PRACTICES****Meter Repair and/or Replacement Tariff – BMP 4.2****PURPOSE**

A program for the Company to systematically assess all in-service water meters (including Company production meters) in its water service area to identify under-registering meters and to repair or replace them (Modified Non-Per Capita Conservation Program Best Management Practice Category 4: Physical System Evaluation and Improvement 4.2 Meter Repair and/or Replacement Program).

**REQUIREMENTS**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. On a systematic basis, the Company will inspect 100 percent of its 1-inch and smaller in-service water meters at least once every ten years for one of the following reasons (whichever occurs first):
  - a. A meter reading complaint is filed with the Company by a customer of Arizona Corporation Commission Staff,
  - b. A meter has registered 1,000,000 gallons of usage.
  - c. A meter has been in service for ten years.
  
2. Meters larger than 1-inch shall be inspected for one of the following reasons:
  - a. A meter reading complaint is filed with the Company by a customer or Arizona Corporation Commission Staff,
  - b. A meter has been in service for five years.
  
3. The inspection will be accomplished by having the meter pulled and having a Company Technician physically inspect each meter and its fittings for leaks, registers which may have become loose or are not properly attached to the meter and could be under-registering or other broken parts which need repair. In addition, meters shall be randomly selected for flow testing to identify potentially under-registering meters.
  
4. The Company shall also replace or reprogram any water meters that do not register in gallons. Within 5 years of the initial effective date of this tariff, the Company shall replace or reprogram all:
  - a. 1-inch and smaller meters such that they register usage in 1 gallon increments,
  - b. 1/2-inch through 4-inch meters such that they register in 10 gallon increments, and
  - c. 6-inch and larger meters such that they register in 100 gallon increments.

**BEST MANAGEMENT PRACTICES**

**Water System Tampering Tariff – BMP 5.2**

**PURPOSE**

The purpose of this tariff is to promote the conservation of groundwater by enabling the Company to bring an action for damages or to enjoin any activity against a person who tampers with the water system.

**REQUIREMENTS:**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission, specifically Arizona Administrative Code (“AAC”) R14-2-410 and the Arizona Department of Water Resources’ Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. In support of the Company’s water conservation goals, the Company may bring an action for damages or to enjoin any activity against a person who: (1) makes a connection or reconnection with property owned or used by the Company to provide utility service without the Company’s authorization or consent; (2) prevents a Company meter or other device used to determine the charge for utility services from accurately performing its measuring function; (3) tampers with property owned or used by the Company; or (4) uses or receives the Company’s services without the authorization or consent of the Company and knows or has reason to know of the unlawful diversion, tampering or connection. If the Company’s action is successful, the Company may recover as damages three times the amount of actual damages.
2. Compliance with the provisions of this tariff will be a condition of service.
3. The Company shall provide to all its customers, upon request, a complete copy of this tariff and AAC R14-2-410. The customers shall follow and abide by this tariff.
4. If a customer is connected to the Company water system and the Company discovers that the customer has taken any of the actions listed in No. 1 above, the Company may terminate service per AAC R14-2-410.
5. If a customer believes he/she has been disconnected in error, the customer may contact the Commission’s Consumer Services Section at 1-800-222-7000 to initiate an investigation.

**BEST MANAGEMENT PRACTICES**

**Low Water Use Landscaping Requirements Tariff for Model Homes in New Residential Developments – BMP 5.5**

**PURPOSE**

A program for the Company to reduce water use within its service area and/or increase water use efficiency by limiting or reducing water used for specific purposes (Modified non-Per Capita Conservation Program BMP Category 5: Ordinances/ Conditions of Service/Tariffs 5.5: Low Water Use Landscaping Requirements Tariff for Model Homes in New Residential Developments).

**REQUIREMENTS:**

The requirements of this tariff are governed by Rules of the Arizona Corporation Commission, specifically A.A.C. R14-2-403 and R14-2-410 and were adapted from the Arizona Department of Water Resources' Required Public Education Program and Best Management Practices in the Modified Non-Per Capita Conservation Program.

1. The Company shall provide to the customer/developer/builder distinct guidelines for landscape planning and design for model homes.
2. The following landscape restrictions will be required in order for a customer/developer/builder to receive water service to its model homes from the Company on or after the effective date of this tariff.

Restrictions Applicable to All New Model Home Landscaping –

- a. Model Home landscaping will involve strategic planning and design. Landscaped areas will be divided into zones based on water requirements. Each model will have efficient irrigation systems, properly designed and maintained.
- b. All models will be placed on a drip irrigation system with a timer for shrubs and trees to apply water directly to the roots where it is needed. Watering schedules will be adjusted each month to match seasonal weather conditions and landscape requirements.
- c. All front yards shall be landscaped with xeriscape (low water use) materials. A list of low water use landscaping materials is available from the Company upon request. No turf of any kind that required watering shall be allowed in front of yards.
- d. Turf in back yards shall be limited to no more than fifty percent (50%) of the total backyard area.
- e. No model home shall be equipped with a swimming pool, jacuzzi, or other water –use intensive feature (e.g., fountain fish pond, etc.).
- f. Model home landscapes will require minimal but appropriate maintenance. Landscape maintenance may include pruning, removing trash that has blown into the landscape, occasional weeding and pest management, checking that the irrigation system is functioning properly, and adjusting automatic irrigation systems as the seasons change.

**BEST MANAGEMENT PRACTICES**

**Low Water Use Landscaping Requirements Tariff for Model Homes in New Residential Developments – BMP 5. (continued)**

3. Subject to the provisions of this tariff, the installation of the landscape restrictions will be a condition of service.

4. The Company shall provide to customer/developer/builder a complete copy of this tariff and all attachments upon request for service. The customer/develop/builder shall follow and abide by these landscape restrictions.

5. If after a customer has been connected to the Company water system, the Company discovers that the customer has installed turf or water-use intensive features contrary to the above requirements, the Company shall notify (in writing) the customer of such violation and provide the customer with the appropriate educational materials informing the customer of some possibilities of how to correct the problem. The customer shall be allowed thirty (30) days to come into compliance with the above requirements. If after thirty (30) days the customer is not in compliance with the above requirements, the customer's service may be terminated per Arizona Administrative Code R14-2-410C, R14-2-410D and R14-2-410E.

6. If a customer believes he/she has been disconnected in error, the customer may contact the Commission's Consumer Services Section at 1-800-222-7000 to initiate an investigation.

**CURTAILMENT TARIFF**

**CURTAILMENT PLAN FOR SAN TAN WATER DISTRICT**

ADEQ Public Water System Numbers: 11-128 & 11-136.

EPCOR Water Arizona Inc. ("Company") is authorized to curtail water service to all customers within its certificated area under the terms and conditions listed in this tariff.

This curtailment plan shall become part of the Arizona Department of Environmental Quality's Emergency Operations Plan for the Company.

The Company shall notify its customers of this new tariff as part of its next regularly scheduled billing after the effective date of this tariff or no later than sixty (60) days after the effective date of the tariff.

The Company shall provide a copy of the curtailment tariff to any customer upon request.

**STAGE Stage 1 Exists When:**

~~Stage 1 exists when the~~ Company is able to maintain water storage in the system at 100 percent% of capacity and there are no known problems with its well production or water storage in the system.

Restrictions:- Under Stage 1, the Company is deemed to be operating normally and no curtailment is necessary.

Notice Requirements:- Under Stage 1, no notice is necessary.

**STAGE Stage 2 Exists When:**

~~Stage 2 exists when:~~

a. ~~The~~ Company's water storage or well production has been less than 80 percent% of capacity for at least 48 consecutive hours; and/or

b. ~~The~~ Company has identified issues such as a steadily declining water table, increased draw down threatening pump operations, or poor water production, creating a reasonable belief the Company will be unable to meet anticipated water demand on a sustained basis or

a-c. Company has been notified by a water management entity having authority that Company's water allocation or contract has or will be reduced by up to 20 percent of the full allocation or contract volume.

Restrictions:- Under Stage 2, the Company may request that customers voluntarily employ water conservation measures to reduce water consumption by approximately 50% percent. Outside watering should be limited to essential watering, dividing outside watering on some uniform basis (such as even and odd days) and eliminating outside watering on weekends and holidays.

**STAGE 3 Exists When:**

- a. ~~The~~ Company's total water storage or well production has been less than 50 percent% of capacity for at least 24 consecutive hours; ~~and~~ or
- b. ~~The~~ Company has identified issues such as a steadily declining water table, increased draw down threatening pump operations, or poor water production, creating a reasonable belief the Company will be unable to meet anticipated water demand on a sustained basis; ~~or~~
- c. Company has been notified by a water management entity having authority that Company's water allocation or contract has or will be reduced by up to 50 percent of the full allocation or contract volume.

**Restrictions:-** Under Stage 3, ~~the~~ Company shall request the customers to voluntarily employ water conservation measures to reduce daily consumption by approximately 50 percent and use indoor water conservation techniques whenever possible. Company shall inform customers of a mandatory restriction on ~~All~~ outside watering, ~~should be eliminated,~~ except livestock, ~~and indoor water conservation techniques should be employed whenever possible~~ Failure to comply will result in disconnection. Standpipe service shall be suspended.

**Notice Requirements:-**

1. Company is required to notify customers by delivering written notice to each service address, or by United States first class mail to the billing address or, at the ~~Company's~~ option, both. Such Notice shall notify the customers of the general nature of the problem and the need to conserve water.
2. Beginning with Stage 3, ~~the~~ Company shall post at least five (5) signs showing the curtailment stage. Signs shall be posted at noticeable locations, like at the well and/or pump sites located within the San Tan Water District and at the entrance to major subdivisions served by the Company.
3. ~~The~~ Company shall notify the Consumer Services Section of the Utilities Division of the Arizona Corporation Commission at least 12 hours prior to entering Stage 3.

Once Stage 3 has been reached, the Company must begin to augment the supply of water by either hauling or through an emergency interconnect with an approved water supply in an attempt to maintain the curtailment at a level no higher than Stage 3 until a permanent solution has been implemented.

**CROSS-CONNECTION AND/OR BACKFLOW TARIFF**

PURPOSE:

~~The purpose of this tariff is to protect the public water supply in the Company's EPCOR Water Arizona Inc.'s San Tan Water District's ("Company") water system from the possibility of contamination caused by the backflow through unprotected cross-of contaminants that may be present on the customer's premises by requiring the installation and periodic testing of backflow prevention assemblies pursuant to the provisions of the Arizona Administrative Code ("A.A.C.") R14-2-405.B.6 and A.A.C. R18-4-215232, as adopted by the Arizona Department of Environmental Quality, as those regulations may be revised from time to time.~~

INSPECTIONS:

~~The customers shall cooperate fully with the Company in its efforts to investigate and determine the degree of potential health hazard to the public water supply which may result from conditions existing on the customer's premises.~~

REQUIREMENTS:

In compliance with the Rules of the Arizona Corporation Commission ("Commission") and the Arizona Department of Environmental Quality ("ADEQ"), specifically A.A.C. R14-2-405.B.6 and A.A.C. R18-4-215232 relating to backflow prevention:

1. The Company ~~may~~shall require a customer to pay for and ~~to have installed, maintain, test and repair~~ a backflow-prevention assembly if A.A.C. R18-4-215232.B or C applies.
2. A backflow-prevention assembly required to be installed by the customer under Paragraph 1 of this tariff shall comply with the requirements set forth in A.A.C. R18-4-215232.D and E.
3. Subject to the provisions of A.A.C. R14-2-407 and 410, and in accordance with Paragraphs 1 and 7 of this tariff, the Company may terminate service or may deny service to a customer who fails to install a backflow-prevention assembly as required by this tariff.
4. The Company shall give any existing customer who is required to install and/or test a backflow-prevention assembly written notice of said requirement. If A.A.C. R14-2-410.B.1.a. is not applicable, the customer shall be given thirty (30) days from the time such written notice is received in which to comply with this notice. If the customer can show good cause as to why he cannot install the backflow-prevention assembly device within thirty (30) days, the Company or the Arizona Corporation Commission Staff may suspend grant additional time for this requirement for a reasonable period of time.

**CROSS-CONNECTION AND/OR BACKFLOW TARIFF**

54. Testing shall be in conformance with the requirements of A.A.C. R18-4-~~2322~~15.F. The Company ~~may~~shall not require the customer to pay to have the backflow-prevention assembly tested as long as the Company does not require an unreasonable number of tests.

65. The customer shall provide the Company with records of installation and testing. For each backflow-prevention assembly, these records shall include:

- a. assembly identification number and description;
- b. location;
- c. date(s) of test(s);
- d. description of repairs and recommendations for repairs made by tester; and
- e. the tester's name and certificate number.

Discontinuance of Service

~~In accordance with A.A.C. R14-02-407 and 410 and provisions of this tariff, the Company may terminate service or deny service to a customer who fails to install and/or test a backflow-prevention assembly as required by this tariff.~~

74. In the event the backflow-prevention assembly ~~does not function properly~~has not been installed or fails any test, and an obvious hazard as contemplated under A.A.C. R14-2-410.B.1.a. ~~exists~~is applicable, the Company may terminate service immediately and without notice. The backflow-prevention assembly shall be repaired or replaced by the customer and retested.

82. In the event the backflow-prevention assembly ~~does not function properly~~has not been installed or fails any test, or in the event that a customer fails to comply with the testing requirement, and A.A.C. R14-2-410.B.1.a. is not applicable, the backflow prevention assembly shall be installed and/or repaired or replaced by the customer and tested within fourteen (14) days of the initial discovery of the deficiency in the assembly or its function~~written notice by the Company~~. Failure ~~to install or~~ to remedy the deficiency or dysfunction of the assembly, or failure to retest, shall be grounds for termination of water ~~utility~~ service in accordance with A.A.C R14-2-410.

**WATER MAIN EXTENSIONS**

Water main extensions shall be pursuant to A.A.C. R14-2-406, except that refunds of advances in aid of construction shall be made at a rate of tenfive percent (105%) of the gross revenues received by the Company from bona fide customers connected to the facilities funded with the advance, for a period of tenwenty (120) years commencing from the date of Company's written final acceptance of the water facilities.

Refunds of the Advance shall be made by Company on or before the 31<sup>st</sup> day of August of each year commencing with the effective date of Company's written final acceptance of the water facilities, covering any refunds owing from water revenues during the preceding July 1 to June 30 period. Any balance remaining at the end of the 120-year period shall become non-refundable, and the balance not refunded shall be entered as a contribution in aid of construction in the accounts of the Company.

OTHER

PERMITTED COSTS

1. ~~Costs shall be verified by invoice.~~
2. ~~For services that are provided by the Company at cost, cost shall include labor, materials, other charges incurred, and overhead. However, prior to any such service being provided, the estimated cost of such service will be provided by the Company to the customer. After review of the cost estimate, the customer will pay the amount of the estimated cost to the Company.~~
3. ~~In the event that the actual cost is less than the estimated cost, the Company will refund the excess to the customer within 30 days after completion of the provision of the service or after Company's receipt of invoices, timesheets or other related documents, whichever is later.~~
4. ~~In the event the actual cost is more than the estimated cost, the Company will bill the customer for the amount due within 30 days after completion of the provision of the service or after the Company's receipt of invoices, timesheets or other related documents, whichever is later. The amount so billed will be due and payable 30 days after the invoice date.~~
5. ~~At the customer's request, the Company shall make available to the customer all invoices, timesheets or related documents that support the cost for providing such service.~~
6. ~~Permitted costs shall include any State or Federal income taxes that are or may be payable by the Company as a result of any tariff or contract for water facilities under which the Customer advances or contributes funds or facilities to the Company.~~

EPCOR WATER ARIZONA INC.  
SAN TAN WASTEWATER  
DEVELOPMENT OF ALLOCATION FACTORS  
FACTORS FOR ALLOCATING COST OF SERVICE TO CUSTOMER CLASS

FACTOR A. ALLOCATION OF COMMODITY COSTS.

Factors are based on the pro forma test year average daily consumption for each customer classification.

| Classification<br>(1) | Average Daily Consumption,<br>1000 Gallons<br>(2) | Allocation Factor<br>(5) |
|-----------------------|---|--------------------------|
| Residential           | 8,854   | 0.9602                   |
| Commercial            | 290   | 0.0315                   |
| OPA                   | 77  | 0.0083                   |
| Total                 | 9,221   | 1.0000                   |

FACTOR B. ALLOCATION OF MAXIMUM DAY DEMAND COSTS - TREATMENT AND PUMPING.

Factors are based on the maximum day demand for each customer classification.

| Customer Classification<br>(1) | Average Daily Consumption,<br>1000 Gallons<br>(2) | Peak Day Factor<br>(3) | Rate of Flow,<br>1000 Gallons Per Day<br>(4)=(2)x(3) | Allocation Factor<br>(5) |
|--------------------------------|---|------------------------|--|--------------------------|
| Residential                    | 8,854   | 2.13                   | 18,836   | 0.9639                   |
| Commercial                     | 290   | 1.79                   | 521  | 0.0267                   |
| OPA                            | 77  | 2.40                   | 184  | 0.0094                   |
| Total                          | 9,221   |                        | 19,541   | 1.0000                   |

FACTOR C. ALLOCATION OF MAXIMUM HOUR DEMAND COSTS.

Factors are based on the maximum hour demand for each customer classification.

| Customer Classification<br>(1) | Average Hourly Consumption,<br>1000 Gallons<br>(2) | Peak Hour Factor<br>(3) | Rate of Flow,<br>1000 Gallons Per Hour<br>(4)=(2)x(3) | Allocation Factor<br>(5) |
|--------------------------------|--|-------------------------|---|--------------------------|
| Residential                    | 369  | 3.67                    | 1,355   | 0.9639                   |
| Commercial                     | 12   | 3.10                    | 38  | 0.0267                   |
| OPA                            | 3  | 4.15                    | 13  | 0.0095                   |
| Total                          | 384  |                         | 1,406   | 1.0001                   |

EPCOR WATER ARIZONA INC.  
SAN TAN WASTEWATER  
DEVELOPMENT OF ALLOCATION FACTORS  
FACTORS FOR ALLOCATING COST OF SERVICE TO CUSTOMER CLASS

FACTOR D. ALLOCATION OF COSTS ASSOCIATED WITH SERVICES

Factors are based on the relative cost of meters by size and customer classification

| <u>Customer<br/>Classification</u><br>(1) | <u>3/4"<br/>Equivalents</u><br>(2) | <u>Allocation<br/>Factor</u><br>(3) |
|---|------------------------------------|-------------------------------------|
| Residential                               | 44,127                             | 0.9945                              |

**GENERAL WASTEWATER SERVICE**

**Terms and Conditions**

Wastewater service provided under this rate schedule is subject to Arizona Administrative Code Rules and Regulations applicable to Wastewater Service and may be subject to the Company's Service Charges set forth in Rate Schedule Service Charges and adjustor mechanisms included in the Company's tariffs on file with the Arizona Corporation Commission.

Wastewater services under this schedule are for the exclusive use of the customer and wastewater services shall not be resold or provided to others.

In addition to the collection of regular rates, the Company will collect from its customers a proportionate share of any privilege, sales or use tax, or other imposition based on the gross revenues received by the Company. Per Commission Rule 14-2-608 (D)(5).

A 1½% late payment penalty will be applied to account balances not paid within fifteen (15) days after the postmark date of the bill in accordance with Arizona Administrative Code R14-2-608(F)(3).

(Name of Service Area)

**EFFLUENT**

**Availability**

Available to large turf and landscape irrigators for use on golf courses, lakes, school grounds, park lands, rights of ways, and similar large open spaces when effluent is available. Also available to land developers and their contractors and sub-contractors for use on large construction projects which require significant amounts of dirt moving, grading, trenching or other effluent intensive construction activities when effluent is available.

**Schedule of Charges**

|                              | Volumetric Rates | Upper Limit |
|------------------------------|------------------|-------------|
| Effluent (per 1,000 gallons) | \$ 1.13          | Infinite    |
|                              |                  |             |
| Effluent (per Acre-Foot)     | \$ 368.60        | Infinite    |

**Special Conditions**

The treated wastewater provided under this tariff is reclaimed sewage effluent and it is not suitable for human consumption or bodily contact. Service provided under this tariff should be used only for irrigation. Deliveries are subject to interruption, curtailment, or scheduling as necessary to match demands with available supplies.

**Terms and Conditions**

Treated wastewater service provided under this rate schedule is subject to this District's Rules and Regulations and may be subject to this District's Service Charges set forth in Rate Schedule Service Charges and adjustor mechanisms included in the Company's tariffs on file with the Arizona Corporation Commission.

Wastewater services under this schedule are for the exclusive use of the customer and wastewater services shall not be resold or provided to others.

In addition to the collection of regular rates, the Company will collect from its customers a proportionate share of any privilege, sales or use tax, or other imposition based on the gross revenues received by the utility. Per Commission Rule 14-2-608 (D)(5).

A 1 ½ % late payment penalty will be applied to account balances not paid within fifteen (15) days after the postmark of the bill in accordance with Arizona Administrative Code R14-2-608(F).

**CUSTOMER DISCHARGE TO WASTEWATER SYSTEM**

**A. Service Subject to Regulation.**

The Company provides wastewater service using treatment and collection facilities that are regulated by numerous county, state and federal statutes and regulations. Those regulations include limitations as to domestic strength wastewater and the type of wastewater that may be discharged into the system by any person directly or indirectly connected to the plant.

**B. Waste Limitations.**

The Company has established the permissible limits of concentration as domestic strength wastewater and will limit concentration for various specific substances, materials, waters, or wastes that can be accepted in the wastewater system, and to specify those substances, materials, waters, or wastes that are prohibited from entering the wastewater system. Each permissible limit so established shall be placed on file in the business office of the Company, with a copy filed with the Commission. No person shall discharge, or cause to be discharged, any new sources of inflow including, but not limited to, storm water, surface water, groundwater, roof runoffs, subsurface drainage, cooling water, or polluted industrial process waters into the sanitary wastewater. The Company will require an affidavit from all commercial and industrial customers, and their professional engineer, stating that the wastewater discharged to the system does not exceed domestic strength.

**C. Inspection and Right of Entry.**

Every facility that is involved directly or indirectly with the discharge of wastewater to the Treatment Plant may be inspected by the Company as it deems necessary. These facilities shall include but not be limited to wastewater; wastewater pumping plants; all processes; devices and connection sewers; and all similar wastewater facilities. Inspections may be made to determine that such facilities are maintained and operated property and are adequate to meet the provisions of these rules. Inspections may include the collection of samples. Authorized personnel of the Company shall be provided immediate access to all of the above facilities or to other facilities directly or indirectly connected to the Treatment Plant at all reasonable times including those occasioned by emergency conditions. Any permanent or temporary obstruction to easy access to the user's facility to be inspected shall promptly be removed by the facility user or owner at the written or verbal request of the Company and shall not be replaced. No person shall interfere with, delay, resist or refuse entrance to an authorized Company representative attempting to inspect any facility involved directly or indirectly with a discharge of wastewater to the Treatment Plant. Adequate identification shall be provided by the Company for all inspectors and other authorized personnel and these persons shall identify themselves when entering any property for inspection purposes or when inspecting the work of any contractor.

The Company, in its full discretion, may review and approve any engineering plans for any facilities interconnecting with any of the Company's wastewater system to ensure compliance with any applicable codes and standards, and to ensure that there will not be any adverse impact to Company's wastewater operations, including those facilities where ownership will be retained by a third party.

All transient motor homes, travel trailers and other units containing holding tanks must arrive at the Company's service area in an empty condition. Inspection will be required of said units prior to their being allowed to hookup to the wastewater system.

**CUSTOMER ASSISTANCE PROGRAMS****LOW INCOME PROGRAM**

The Low Income Program offered by the Company is designed as a short-term relief program. The Program provides assistance to residential customers in the San Tan Wastewater District. Customers must complete the Low Income Application and provide necessary documentation to show they meet the qualifying guidelines. Details can be found in the Company's Low Income Surcharge Plan of Administration.

**Availability**

Customer that meet the eligibility requirements shall be enrolled in the Low Income Program on a first come, first served basis up to a maximum combined total of 1,000 participants for the San Tan Water District and San Tan Wastewater District. [Note: a participant receiving a low income assistance credit for both water and wastewater counts as two participants for purposes of calculating maximum participants]. Once the Program has reached full participation, any future applicants will be placed on a wait list.

To qualify, applicants must:

- Demonstrate in-state residency.
- Must be the primary account holder or a person residing in housing in a homeowner's association, apartment complex or mobile home park.
- Not be claimed as a dependent on another person's tax return
- Not have gross annual household income that exceeds 200% of the Federal Poverty Guidelines for the current year (to be updated annually).

**Low Income Credit**

Those customers that are the primary account holder will receive a monthly credit of \$10.00 on their wastewater bill. For those customers who reside in multi-unit housing, checks will be written on a bi-annual basis for the number of months that the customer is eligible for the credit during that 6-month period.

**Low Income Surcharge**

In the initial year of the Program, the Company will defer all costs of the Program for recovery in the first annual reconciliation. The low income assistance credit will be recovered by adding a monthly surcharge to all San Tan wastewater ratepayers. The total annual Program costs will be calculated by multiplying the total actual participation by the \$10.00 monthly credit multiplied by 12. The total annual Program costs will be divided by total customers to determine the surcharge rate per customer.

Effective May 1<sup>st</sup>, YYYY, the Low Income Surcharge /(Surcredit) will be \$X.XX per unit, per month on all San Tan Wastewater customers.

**CUSTOMER ASSISTANCE PROGRAMS****LOW INCOME PROGRAM (continued)****Reporting**

The Company will file with Docket Control, by March 31 of each year, an annual report detailing the

- Number of wastewater low income assistance participants from the previous calendar year;
- Total amount of discounts given;
- Direct and indirect costs associated with the Program;
- Collections made from all wastewater ratepayers used to fund the Program; and
- Provide updated gross annual income guidelines as necessary from the federal government.

The first report will be based on the period from Program inception through December 31, 2022. The reporting period for all subsequent year filings will be on a calendar basis. This report will be filed within 90 days of the end of the initial reporting period, March 31, and then annually thereafter.

As part of each annual filing, the Company will perform a reconciliation for the prior year reporting period comparing the amounts recovered from the surcharge to the amounts credited to the Program participants. Any over- or under- collection will be trued up with the subsequent year's low income Program costs.

Annual revisions to the surcharge will become administratively effective 30 days after the filing date.

**Terms and Conditions**

All rates in this Schedule shall be subject to their proportionate part of any taxes or other governmental imposts which are assessed directly or indirectly on the basis of revenues derived from service under this Schedule.

**CUSTOMER ASSISTANCE PROGRAMS****DEPLOYED SERVICE MEMBER PROGRAM**

The Deployed Service Member Program is designed as a temporary relief program for service members serving away from their primary residences for an extended period of time. The Program provides relief to service members who are residential customers in the San Tan Wastewater District. Details can be found in the Company's Deployed Service Member Program Plan of Administration.

**Availability**

Customers must complete the Deployed Service Member Credit Program Application and provide necessary documentation to show they meet the qualifying guidelines. A maximum combined total of 100 service members for the San Tan Water District and San Tan Wastewater District may be enrolled in the Program at any time. Enrollment in the Program must be determined on a first come, first served basis. [Note: a participant receiving a low income assistance credit for both water and wastewater counts as two participants for purposes of calculating maximum participants]. Once the Program has reached full participation, any future applicants will be placed on a wait list.

To qualify for this Program, a service member must:

- Be on active duty for the Army, Navy, Marines, Air Force, Coast Guard, or National Guard.
- Be deployed, on a deployment that is not a "permanent change of station" and is not on a short-term deployment in which a spouse and/or dependents remain stateside.
- Have the residence in EPCOR's service area as the service member's primary residence, not a secondary to another primary residence.
- Not have any family living in the residence in EPCOR's service area during the service member's absence.

Each service member's eligibility must be determined based on written orders from the service member's command. Each service member's continued eligibility must be determined periodically through a recertification process.

**Deployed Service Member Credit**

Those qualified customers, during a service member's enrollment, the Program will provide a monthly bill credit covering the enrolled service member's entire monthly wastewater bill.

**Funding**

EPCOR will defer all costs of the Program for recovery in EPCOR's next San Tan Wastewater District's general rate case.

**MISCELLANEOUS SERVICE CHARGES**

In addition to all other applicable rates and charges in this tariff, each customer shall be subject to the following charges, as applicable:

|  |         |
|--|---------|
| Establishment (Regular Hours)                          | \$35.00 |
| After Hours Service Charge (at customer's request) (b) | \$35.00 |
| Re-Establishment of Service (Within 12 Months)         | (c)     |
| Reconnection of Service (Delinquent)                   | \$35.00 |
| NSF Check (d)  | \$25.00 |
| Deposit  | (a)     |
| Deposit Interest                                       | (a)     |
| Deferred Payment (Per Month)                           | 1.50%   |
| Late Payment Penalty (per month) (e)                   | 1.50%   |

- (a) Per A.A.C. R14-2-603(B)(7), and Per A.A.C. R14-2-603(B)(3).
- (b) After hours service charge: After regular working hours, Saturdays, Sundays, and holidays if at the customer's request or for the customer's convenience.
- (c) Monthly minimum times number of months disconnected from the system at the same location where the same customer had ordered a service connection within the preceding 12-month period.
- (d) Company may only charge one NSF Fee when customer is billed for water and wastewater on one bill and when the customer pays their bill with one check.
- (e) 1.5% per month of the unpaid balance, per A.A.C. R14-2-608(F)

In addition to the collection of regular rates, the utility will collect from its customers a proportionate share of any privilege, sales, or use tax. Per Commission Rule 14-2-608(D)(5).

(Name of Service Area)

**HOOK-UP FEES****COMMON WASTEWATER FACILITIES HOOK-UP FEES****I. Purpose and Applicability.**

The purpose of the Common Wastewater Facilities hook-up fees payable to EPCOR Water Arizona Inc. ("the Company") pursuant to this tariff is to equitably apportion the costs of constructing additional Common Wastewater Facilities necessary to provide wastewater treatment plant facilities among all new service laterals.

These charges are payable to the Company and are applicable to all new service connections established after the effective date of this tariff whether undertaken either pursuant to Main Extension Agreement, or any and all requests for service not requiring a Main Extension Agreement.

The hook-up fees as set forth in Section III of this tariff are established as one-time charges for those connections requiring wastewater treatment capacity in the amount up to 750 gallons per acre per day.

For any connection requiring wastewater treatment capacity more than 750 gallons per acre per day, any hook-up fees paid to the Company will be established as set forth in Section V of this tariff, so as to equitably apportion the costs for the excess capacity in constructing additional off-site facilities to provide wastewater treatment.

The hook-up fees are payable as a condition to Company's establishment of service, as set forth in the following sections.

The hook-up fees are in addition to any service line installation charges, the requirement for on-site facilities to be installed pursuant to approved Main Extension Agreements including (i) any advances or contributions required under such agreements; (ii) any other contributions or charges that may be required; and (iii) the payment of Monthly Wastewater Usage Charges and other charges authorized under this tariff.

**II. Definitions**

Unless the context otherwise requires, the definitions set forth in R-14-2-601 of the Arizona Corporation Commission's ("Commission") rules and regulations governing wastewater utilities shall apply in interpreting this tariff schedule.

"Applicant" means any Person (as defined at A.A.C. R14-2-601(16)) entering into an agreement with the Company for the installation of wastewater facilities to serve new service laterals, and may include a Developer(s) and/or a Builder(s) of new residential subdivisions, but may also include commercial and industrial developers, including but not limited to persons discharging wastewater flows from industrial processes into Company's wastewater system.

"Collection Main" has the meaning as set forth in A.A.C. R14-2-601(7), and which may be located on-site or off-site.

(Continued on Sheet No. 7.1)

**San Tan Wastewater District**

(Name of Service Area)

**HOOK-UP FEES****COMMON WASTEWATER FACILITIES HOOK-UP FEES**

"Collection Main Extension Agreement" means any agreement whereby an Applicant agrees to advance the costs to install any collection mains (i.e., a sewer main of the utility from which service collection lines or "service laterals" are extended to customers) to the Company to establish new service laterals, and to arrange the transfer of ownership of these wastewater facilities to the Company, which agreement does not require the approval of the Commission pursuant to A.A.C. R-14-2-606, and shall have the same meaning as "Wastewater Facilities Agreement." A Collection Main Extension Agreement may also include provisions governing the design, construction and conveyance of Off Site Wastewater Facilities or Common Wastewater Facilities, even if those facilities are not subject to the refund provisions of such agreement.

"Off Site Wastewater Facilities" means those facilities – including but not limited to wastewater treatment plant, sludge disposal facilities, effluent disposal facilities, lift stations, transmission mains and related appurtenances for proper operation – that are being designed and built for the exclusive use of Applicant's development and are not for the benefit of the entire wastewater system (and may include expansions of existing facilities). Off Site Wastewater Facilities do not include those mains that are Collection Mains as defined herein.

"Common Wastewater Facilities" means the wastewater treatment plant, sludge disposal facilities, effluent disposal facilities, regional lift stations, transmission mains and related appurtenances (and may include any expansions of existing facilities) for proper operation, constructed for the benefit of the entire wastewater system and not for the exclusive use of the Applicant's development.

"Service Lateral" means and includes all service laterals providing sewer service to, and protruding from any structure, regardless of whether that structure is for residential, commercial, or any other use, but for which sewer service is required and at the size required pursuant to other regulatory jurisdictional authorities including the Uniform Plumbing Code

**III. Common Wastewater Facilities Hook-Up Fee**

For each new service lateral, the Company shall collect a Common Wastewater Facilities hook-up fee as listed in the following table for customers in the San Tan Wastewater District.

| <b>OFF-SITE WASTEWATER FACILITY HOOK-UP FEE TARIFF</b> |             |
|--|-------------|
| Service Lateral Size                                   | Total Fee   |
| 4"   | \$ 3,900.00 |
| 6"   | \$ 8,775.00 |
| 8" or greater  | \$15,600.00 |

New wastewater installations. May be assessed only once per parcel, service connection, or lot within a subdivision. Purpose is to equitably apportion the costs of constructing additional Common Wastewater Facilities.

(Name of Service Area)

**HOOK-UP FEES****COMMON WASTEWATER FACILITIES HOOK-UP FEES****IV. Terms and Conditions.**

(A). Assessment of One Time Common Wastewater Facilities Hook-Up Fee. The Common Wastewater Facilities hook-up fee may be assessed only once per parcel, service lateral or lot within a subdivision (similar to service lateral installation charges).

(B). Use of Off-Site Facilities Hook-Up Fees. The Common Wastewater Facilities hook-up fees may only be used to pay for capital items of off-site facilities, or for repayment of loans obtained for installation of off-site facilities. Off-site facilities hook-up fees shall not be used for repairs, maintenance or operational purposes.

(C). Time of Payment.

(1) In the event that the Applicant that will be constructing improvements is otherwise required to enter into a Collection Main Extension Agreement, payment of the fees required hereunder shall be made by the Applicant within 30 calendar days of the effective date of the Main Extension Agreement.

(2) In the event that the Applicant for services is not required to enter into a Collection Main Extension Agreement or other facilities construction agreement, the charges hereunder shall be due and payable at the time wastewater service is requested for the property.

(D). Common Wastewater Facilities Construction by Applicant. Company and Applicant may agree to construction of Common Wastewater Facilities necessary to serve a particular development by Applicant, which facilities are then conveyed to Company. In that event, Company shall credit the total cost of such off-site facilities as an offset to Common Wastewater Facilities hook-up fees due under this Tariff. If the total cost of the Common Wastewater Facilities constructed by the Applicant and conveyed to Company is less than the applicable Common Wastewater Facilities hook-up fees under this Tariff, Applicant shall pay the remaining amount of Common Wastewater Facilities hook-up fees owed hereunder. If the total cost of the Common Wastewater Facilities contributed by the Applicant and conveyed to Company is more than the applicable Common Wastewater Facilities hook-up fees under this Tariff, Applicant shall be refunded the difference upon acceptance of the Common Wastewater Facilities by the Company. The refund may be paid in installments over a period of time pursuant to an agreement between the Company and the developer on a case by case basis.

(Name of Service Area)

**HOOK-UP FEES****COMMON WASTEWATER FACILITIES HOOK-UP FEES**

(E) Other Facilities That Are Not Collection Mains or Common Wastewater Facilities. Any facilities necessary for Applicant's development that are neither a Collection Main nor Common Wastewater Facilities as defined herein, which may include but are not limited to additional facilities including but not limited to wastewater treatment plant, sludge disposal facilities, effluent disposal facilities, lift stations, transmission mains and related appurtenances for proper operation, are Off-Site Wastewater Facilities where a contribution may be required from Applicant for the costs of such facilities, and where such contribution will not be subject to any hook-up fee credit. This contribution will be independent of hook-up fees assessed for Common Facilities, and may be in the form of (1) an additional cash contribution; or (2) design and construction of such facilities by Applicant, which are subsequently conveyed to the Company. The total costs for such Off-Site Wastewater Facilities will include design and engineering costs. At the Company's discretion, the Company may instead agree to treatment of such contribution(s) as a refundable advance subject to refund on the same terms as set forth in the Company's tariffs.

(F) Failure to Pay Charges; Delinquent Payments. The Company will not be obligated to provide wastewater service to any Applicant for service in the event that the Applicant for service has not paid in full all charges hereunder. Under no circumstances will the Company connect service or otherwise allow service to be established if the entire amount of any payment has not been paid.

(G) Off-Site Facilities Hook-up Fees Non-refundable. The amounts collected by the Company pursuant to the Common Wastewater Facilities hook-up fee tariff shall be non-refundable contributions in aid of construction.

(H) Common Wastewater Facilities Hook-up Fees in Addition to Collection Mains. The Common Wastewater Facilities hook-up fee shall be in addition to any costs associated with the construction of those Collection Mains under a Collection Main Extension Agreement, or other additional facilities under Paragraph IV.D that are not Common Wastewater Facilities .

(I) Disposition of Excess Funds. After all necessary and desirable Common Wastewater Facilities are constructed utilizing funds collected pursuant to the Common Wastewater Facilities hook-up fees, or if the Common Wastewater Facilities hook-up fee has been terminated by order of the Arizona Corporation Commission, any funds remaining shall be refunded. The manner of the refund shall be determined by the Commission at the time a refund becomes necessary.

(J) Status Reporting Requirements to the Commission. The Company shall submit a calendar year Off-site Facilities Hook-up Fee status report each February 28<sup>th</sup> to Docket Control for the prior twelve (12) month period, beginning February 28, 2025, until the off-site facilities hook-up fee tariff is no longer in effect. This status report shall contain a list of all customers that have paid the Off-site Facilities Hook-up Fee tariff, the amount each has paid, the amount of money spent from the account, the amount of interest earned on the tariff account, and a list of all facilities that have been installed with the tariff funds during the 12 month period.

**GENERAL WASTEWATER SERVICE**

**Terms and Conditions**

Wastewater service provided under this rate schedule is subject to Arizona Administrative Code Rules and Regulations applicable to Wastewater Service and may be subject to the Company's Service Charges set forth in Rate Schedule Service Charges and adjustor mechanisms included in the Company's tariffs on file with the Arizona Corporation Commission.

Wastewater services under this schedule are for the exclusive use of the customer and wastewater services shall not be resold or provided to others.

In addition to the collection of regular rates, the Company will collect from its customers a proportionate share of any privilege, sales or use tax, or other imposition based on the gross revenues received by the Company. Per Commission Rule 14-2-608 (D)(5).

A 1½% late payment penalty will be applied to account balances not paid within fifteen (15) days after the postmark date of the bill in accordance with Arizona Administrative Code R14-2-608(F)(3).

**EFFLUENT**

**Availability**

Available to large turf and landscape irrigators for use on golf courses, lakes, school grounds, park lands, rights of ways, and similar large open spaces when effluent is available. Also available to land developers and their contractors and sub-contractors for use on large construction projects which require significant amounts of dirt moving, grading, trenching or other effluent intensive construction activities when effluent is available.

**Schedule of Charges**

|                              | Volumetric Rates | Upper Limit |
|------------------------------|------------------|-------------|
| Effluent (per 1,000 gallons) | \$ 0.75          | Infinite    |
| Effluent (per Acre-Foot)     | \$ 244.39        | Infinite    |

|                              | Volumetric Rates | Upper Limit |
|------------------------------|------------------|-------------|
| Effluent (per 1,000 gallons) | \$ 1.13          | Infinite    |
| Effluent (per Acre-Foot)     | \$ 368.60        | Infinite    |

**Special Conditions**

The treated wastewater provided under this tariff is reclaimed sewage effluent and it is not suitable for human consumption or bodily contact. Service provided under this tariff should be used only for irrigation. Deliveries are subject to interruption, curtailment, or scheduling as necessary to match demands with available supplies.

**Terms and Conditions**

Treated wastewater service provided under this rate schedule is subject to this District's Rules and Regulations and may be subject to this District's Service Charges set forth in Rate Schedule Service Charges and adjustor mechanisms included in the Company's tariffs on file with the Arizona Corporation Commission.

Wastewater services under this schedule are for the exclusive use of the customer and wastewater services shall not be resold or provided to others.

**CUSTOMER DISCHARGE TO WASTEWATER SYSTEM**

**A. Service Subject to Regulation.**

The Company provides wastewater service using treatment and collection facilities that are regulated by numerous county, state and federal statutes and regulations. Those regulations include limitations as to domestic strength wastewater and the type of wastewater that may be discharged into the system by any person directly or indirectly connected to the plant.

**B. Waste Limitations.**

The Company has established the permissible limits of concentration as domestic strength wastewater and will limit concentration for various specific substances, materials, waters, or wastes that can be accepted in the wastewater system, and to specify those substances, materials, waters, or wastes that are prohibited from entering the wastewater system. Each permissible limit so established shall be placed on file in the business office of the Company, with a copy filed with the Commission. No person shall discharge, or cause to be discharged, any new sources of inflow including, but not limited to, storm water, surface water, groundwater, roof runoffs, subsurface drainage, cooling water, or polluted industrial process waters into the sanitary wastewater. The Company will require an affidavit from all commercial and industrial customers, and their professional engineer, stating that the wastewater discharged to the system does not exceed domestic strength.

**C. Inspection and Right of Entry.**

Every facility that is involved directly or indirectly with the discharge of wastewater to the Treatment Plant may be inspected by the Company as it deems necessary. These facilities shall include but not be limited to wastewater; wastewater pumping plants; all processes; devices and connection sewers; and all similar wastewater facilities. Inspections may be made to determine that such facilities are maintained and operated properly and are adequate to meet the provisions of these rules. Inspections may include the collection of samples. Authorized personnel of the Company shall be provided immediate access to all of the above facilities or to other facilities directly or indirectly connected to the Treatment Plant at all reasonable times including those occasioned by emergency conditions. Any permanent or temporary obstruction to easy access to the user's facility to be inspected shall promptly be removed by the facility user or owner at the written or verbal request of the Company and shall not be replaced. No person shall interfere with, delay, resist or refuse entrance to an authorized Company representative attempting to inspect any facility involved directly or indirectly with a discharge of wastewater to the Treatment Plant. Adequate identification shall be provided by the Company for all inspectors and other authorized personnel and these persons shall identify themselves when entering any property for inspection purposes or when inspecting the work of any contractor.

The Company, in its full discretion, may review and approve any engineering plans for any facilities interconnecting with any of the Company's wastewater system to ensure compliance with any applicable codes and standards, and to ensure that there will not be any adverse impact to Company's wastewater operations, including those facilities where ownership will be retained by a third party.

**CUSTOMER DISCHARGE TO WASTEWATER SYSTEM**

**D. Termination of Water Service for Violation of Wastewater Rules and Regulations.**

The Company is authorized to discontinue water service to any person connected to both its water and wastewater systems who violates the Company's wastewater terms and conditions as set forth in this PART FOUR, Section I. This termination authority does not apply to non-payment for water or wastewater services.

**CUSTOMER ASSISTANCE PROGRAMS****LOW INCOME PROGRAM**

The Low Income Program offered by the Company is designed as a short-term relief program. The Program provides assistance to residential customers in the San Tan Wastewater District. Customers must complete the Low Income Application and provide necessary documentation to show they meet the qualifying guidelines. Details can be found in the Company's Low Income Surcharge Plan of Administration.

**Availability**

Customer that meet the eligibility requirements shall be enrolled in the Low Income Program on a first come, first served basis up to a maximum combined total of 1,000 participants for the San Tan Water District and San Tan Wastewater District. [Note: a participant receiving a low income assistance credit for both water and wastewater counts as two participants for purposes of calculating maximum participants]. Once the Program has reached full participation, any future applicants will be placed on a wait list.

To qualify, applicants must:

- Demonstrate in-state residency.
- Must be the primary account holder or a person residing in housing in a homeowner's association, apartment complex or mobile home park.
- Not be claimed as a dependent on another person's tax return
- Not have gross annual household income that exceeds 200% of the Federal Poverty Guidelines for the current year (to be updated annually).

**Low Income Credit**

Those customers that are the primary account holder will receive a monthly credit of \$10.00 on their wastewater bill. For those customers who reside in multi-unit housing, checks will be written on a bi-annual basis for the number of months that the customer is eligible for the credit during that 6-month period.

**Low Income Surcharge**

In the initial year of the Program, the Company will defer all costs of the Program for recovery in the first annual reconciliation. The low income assistance credit will be recovered by adding a monthly surcharge to all San Tan wastewater ratepayers. The total annual Program costs will be calculated by multiplying the total actual participation by the \$10.00 monthly credit multiplied by 12. The total annual Program costs will be divided by total customers to determine the surcharge rate per customer.

Effective May 1<sup>st</sup>, YYYY2024, the Low Income Surcharge /(Surcredit) will be \$X.XX(\$0.17) per unit, per month on all San Tan Wastewater customers.

**CUSTOMER ASSISTANCE PROGRAMS****LOW INCOME PROGRAM (continued)****Reporting**

The Company will file with Docket Control, by March 31 of each year, an annual report detailing the

- Number of wastewater low income assistance participants from the previous calendar year;
- Total amount of discounts given;
- Direct and indirect costs associated with the Program;
- Collections made from all wastewater ratepayers used to fund the Program; and
- Provide updated gross annual income guidelines as necessary from the federal government.

The first report will be based on the period from Program inception through December 31, 2022. The reporting period for all subsequent year filings will be on a calendar basis. This report will be filed within 90 days of the end of the initial reporting period, March 31, and then annually thereafter.

As part of each annual filing, the Company will perform a reconciliation for the prior year reporting period comparing the amounts recovered from the surcharge to the amounts credited to the Program participants. Any over- or under- collection will be trued up with the subsequent year's low income Program costs.

Annual revisions to the surcharge will become administratively effective 30 days after the filing date.

**Terms and Conditions**

All rates in this Schedule shall be subject to their proportionate part of any taxes or other governmental imposts which are assessed directly or indirectly on the basis of revenues derived from service under this Schedule.

**CUSTOMER ASSISTANCE PROGRAMS**

**DEPLOYED SERVICE MEMBER PROGRAM**

The Deployed Service Member Program is designed as a temporary relief program for service members serving away from their primary residences for an extended period of time. The Program provides relief to service members who are residential customers in the San Tan Wastewater District. Details can be found in the Company’s Deployed Service Member Program Plan of Administration.

**Availability**

Customers must complete the Deployed Service Member Credit Program Application and provide necessary documentation to show they meet the qualifying guidelines. A maximum combined total of 100 service members for the San Tan Water District and San Tan Wastewater District may be enrolled in the Program at any time. Enrollment in the Program must be determined on a first come, first served basis. [Note: a participant receiving a low income assistance credit for both water and wastewater counts as two participants for purposes of calculating maximum participants]. Once the Program has reached full participation, any future applicants will be placed on a wait list.

To qualify for this Program, a service member must:

- Be on active duty for the Army, Navy, Marines, Air Force, Coast Guard, or National Guard.
- Be deployed, on a deployment that is not a “permanent change of station” and is not on a short-term deployment in which a spouse and/or dependents remain stateside.
- Have the residence in EPCOR’s service area as the service member’s primary residence, not a secondary to another primary residence.
- Not have any family living in the residence in EPCOR’s service area during the service member’s absence.

Each service member’s eligibility must be determined based on written orders from the service member’s command. Each service member’s continued eligibility must be determined periodically through a recertification process.

**Deployed Service Member Credit**

Those qualified customers, during a service member’s enrollment, the Program will provide a monthly bill credit covering the enrolled service member’s entire monthly wastewater bill.

**CUSTOMER ASSISTANCE PROGRAMS****DISABLED MILITARY VETERAN CREDIT PROGRAM TARIFF****DISABLED MILITARY VETERAN CREDIT PROGRAM**

The Disabled Military Veteran Credit Program is designed as a relief program for individuals disabled as part of their military service. The Program provides relief to disabled veterans who are residential customers in the San Tan Wastewater District. Details can be found in the Company's Disabled Military Veteran Credit Program's Plan of Administration.

**Availability**

Customers must provide necessary documentation to show they meet the qualifying guidelines. A maximum combined total of 1000 disabled veterans for the San Tan Water District and San Tan Wastewater District may be enrolled in the Program at any time. Enrollment in the Program will be determined on a first-come, first-served basis. [Note: a participant receiving a low income assistance credit for both water and wastewater counts as two participants for purposes of calculating maximum participants]. Once the Program has reached full participation, any future applicants will be placed on a wait list.

To qualify for this Program, a disabled veteran must:

- Present a Benefit Summary Letter from the United States Department of Veterans Affairs demonstrating that the individual had any level of disability as a result of military service, or;
- Present a Veteran Health Identification Card from the United States Department of Veterans Affairs demonstrating that the individual had any level of disability as a result of military service.

**Disabled Military Veteran Credit**

For those qualified customers, the Program will provide a monthly bill credit of \$10.00.

**Funding**

EPCOR will defer all costs of the Program for recovery in EPCOR's San Tan Wastewater District's next general water rate case.

Decision No. XXXXX

San Tan Wastewater District

(Name of Service Area)

**HOOK-UP FEES****COMMON WASTEWATER FACILITIES HOOK-UP FEES** ~~Off-site Facilities Hook-up Fee~~**I. Purpose and Applicability.**

The purpose of the ~~Common Wastewater Facilities~~ ~~off-site Facilities~~ ~~Hook-up Fees~~ (also referred to as "Hook-up Fees") payable to ~~EPCOR Water Arizona Inc., San Tan Wastewater District~~ ("the Company") pursuant to this tariff is to equitably apportion the costs of constructing additional ~~Common Wastewater Facilities~~ ~~Off-site Facilities~~ necessary to provide wastewater treatment plant facilities among all new service laterals.

These ~~fees~~ ~~charges~~ are payable to the Company and are applicable to all new service ~~connections~~ ~~laterals~~ established after the effective date of this tariff ~~whether~~ undertaken ~~either pursuant to~~ ~~a Collection Main Extension Agreement~~, or ~~any and all~~ requests for service not requiring a ~~Collection~~ Main Extension Agreement.

The ~~Hook-up Fees~~ as set forth in Section III of this tariff are established as one-time charges for those connections requiring wastewater treatment capacity in the amount up to 750 gallons per acre per day.

~~For those connections that require wastewater treatment in excess of 750 gallons per acre per day, there will be separate hook up fees established in accordance with Section V of this tariff. In other words, for any connection requiring wastewater treatment capacity more than 750 gallons per acre per day, any hook-up fees paid to the Company will be established as set forth in Section V of this tariff, so as to equitably apportion the costs for the excess capacity in constructing additional off-site facilities to provide wastewater treatment.~~

The ~~hook-up fees~~ are payable as a condition to Company's establishment of service, ~~as more particularly provided below~~ as set forth in the following sections.

The ~~Hook-up Fees~~ are in addition to ~~any~~ ~~Service Line~~ ~~installation~~ ~~Connection~~ ~~Charges~~, the requirement for on-site facilities to be installed pursuant to ~~approved~~ ~~Collection~~ Main Extension Agreements ~~including (i) any advances or contributions required under such agreements; (ii) any other contributions or charges that may be required;~~ and (iii) the payment of Monthly Wastewater Usage Charges and other charges authorized under this tariff.

**II. Definitions.**

Unless the context otherwise requires, the definitions set forth in R-14-2-601 of the Arizona Corporation Commission's ("Commission") rules and regulations governing wastewater utilities shall apply in interpreting this tariff schedule.

"Applicant" means any ~~Person (as defined at A.A.C. R14-2-601(16))~~ ~~party~~ entering into an agreement with the Company for the installation of wastewater facilities to serve new service laterals, and may include ~~a~~ ~~Developer(s)~~ and/or ~~a~~ ~~Builder(s)~~ of new residential subdivisions, ~~but may also include commercial and industrial developers, including but not limited to persons discharging wastewater flows from industrial~~

**HOOK-UP FEES****COMMON WASTEWATER FACILITIES HOOK-UP FEES**

"Collection Main Extension Agreement" means any agreement whereby an Applicant, ~~Developer and/or Builder~~ agrees to advance the costs ~~to of the installation any collection mains (i.e., a sewer main of the utility from which service collection lines or "service laterals" are extended to customers) of wastewater facilities necessary for to~~ the Company to ~~serve establish~~ new service laterals ~~within a development, or costs to install certain such wastewater facilities in addition to the collection mains that are specifically needed necessary to serve new service laterals,~~ and ~~to arrange the~~ transfer of ownership of ~~these such~~ wastewater facilities to the Company, which agreement does not require the approval of the Commission pursuant to A.A.C. R-14-2-606, and shall have the same meaning as "Wastewater Facilities Agreement." A Collection Main Extension Agreement may also include provisions governing the design, construction and conveyance of Off Site Wastewater Facilities or Common Wastewater Facilities, even if those facilities are not subject to the refund provisions of such agreement.

"Off Site Wastewater Facilities" means those facilities – including but not limited to wastewater treatment plant, sludge disposal facilities, effluent disposal facilities, lift stations, transmission mains and related appurtenances for proper operation – that are being designed and built for the exclusive use of Applicant's development and are not for the benefit of the entire wastewater system (and may include expansions of existing facilities). Off Site Wastewater Facilities do not include those mains that are Collection Mains as defined herein.

"Common Wastewater Off Site Facilities" means the wastewater treatment plant, sludge disposal facilities, effluent disposal facilities, regional lift stations, transmission mains and related appurtenances (and may include any expansions of existing facilities) necessary for proper operation, including engineering and design costs, constructed for the benefit of the entire wastewater system and not for the exclusive use of the Applicant's development. Off-site Facilities may also include lift stations, transportation mains and related appurtenances necessary for proper operation if these facilities are not for the exclusive use of the Applicant and benefit the entire wastewater system.

**HOOK-UP FEES****COMMON WASTEWATER FACILITIES HOOK-UP FEES**

(E) Other Facilities That Are Not Collection Mains or Common Wastewater Facilities. Any facilities necessary for Applicant's development that are neither a Collection Main nor Common Wastewater Facilities as defined herein, which may include but are not limited to additional facilities including but not limited to wastewater treatment plant, sludge disposal facilities, effluent disposal facilities, lift stations, transmission mains and related appurtenances for proper operation, are Off-Site Wastewater Facilities where a contribution may be required from Applicant for the costs of such facilities, and where such contribution will not be subject to any hook-up fee credit. This contribution will be independent of hook-up fees assessed for Common Facilities, and may be in the form of (1) an additional cash contribution; or (2) design and construction of such facilities by Applicant, which are subsequently conveyed to the Company. The total costs for such Off-Site Wastewater Facilities will include design and engineering costs. At the Company's discretion, the Company may instead agree to treatment of such contribution(s) as a refundable advance subject to refund on the same terms as set forth in the Company's tariffs.

~~(FE). Failure to Pay ChargesHook-up Fees; Delinquent Payments. The Company will not be obligated to make an advance commitment to provide or to provide wastewater service to any Applicant ApplicantDeveloper, Builder or other applicant if the Applicant for service in the event that the ADeveloper, Builder or other applicant for service has not paid in full all chargesHook-up Fees hereunder. Under no circumstances will the Company connect service or otherwise allow service to be established if the entire amount of any payment due hereunder has not been paid.~~

~~Large Subdivision and/or Development Projects. In the event that the Applicant is engaged in the development of a residential subdivision and/or development containing more than 150 lots, the Company may, in its discretion, agree to payment of Off site Facilities Hook-up Fees in installments. Such installments may be based on the residential subdivision and/or development's phasing, and should attempt to equitably apportion the payment of charges hereunder based on the Applicant's construction schedule and water service requirements. In the alternative, the Applicant shall post an irrevocable letter of credit in favor of the Company in a commercially reasonable form, which may be drawn by the Company consistent with the actual or planned construction and Hook-up Fees schedule for the subdivision and/or development.~~
