

BRINGING NATURAL GAS TO YOUR COMMUNITY

EPCOR Construction Update: Spring 2023

EPCOR is proud to bring clean, safe and reliable natural gas to your community.

CONSTRUCTION ACTIVITY

Here is what you can expect as we connect properties to natural gas service.

Many properties have landscaping or driveways that extend on top of the public utility corridor where we will complete our work. This may result in driveways and sidewalks being cut or landscaping disrupted to expose underground utilities. Areas disturbed by construction will be restored.

At the end of the construction season, we will be planting grass seed and laying topsoil, as required. **We ask residents to water the restored areas of their lawn, as needed, to help facilitate growth.**

Notify EPCOR if you have underground systems, such as sprinklers, invisible dog fences or septic systems as these cannot be identified through utility locating services and could be damaged during construction. **Please keep utility locating flags and paint in place.**

SERVICE SCHEDULE

Gas service installation will continue throughout the 2023 construction season. Below, is when natural gas service may begin for customers. For more information, please visit our website.

April	May	July
Kincardine	Chesley	Paisley
Lucknow	June	Lurgan Beach
Ripley	Point Clark	
Tiverton		
Inverhuron		

BOOK AN HVAC CONTRACTOR

Notify your HVAC contractor once the service line has been installed so they can finish converting your appliances. If you're having trouble booking an appointment, please let us know.

KEEP HEATING SOURCE IN PLACE

Be sure to wait until your service line and meter have been installed before disconnecting your existing heating source or removing any equipment.

SAFETY IS OUR FIRST PRIORITY

Safety is a responsibility we all share and EPCOR's top priority. Please slow down and stay safe around construction.
