

PROVIDING MORE

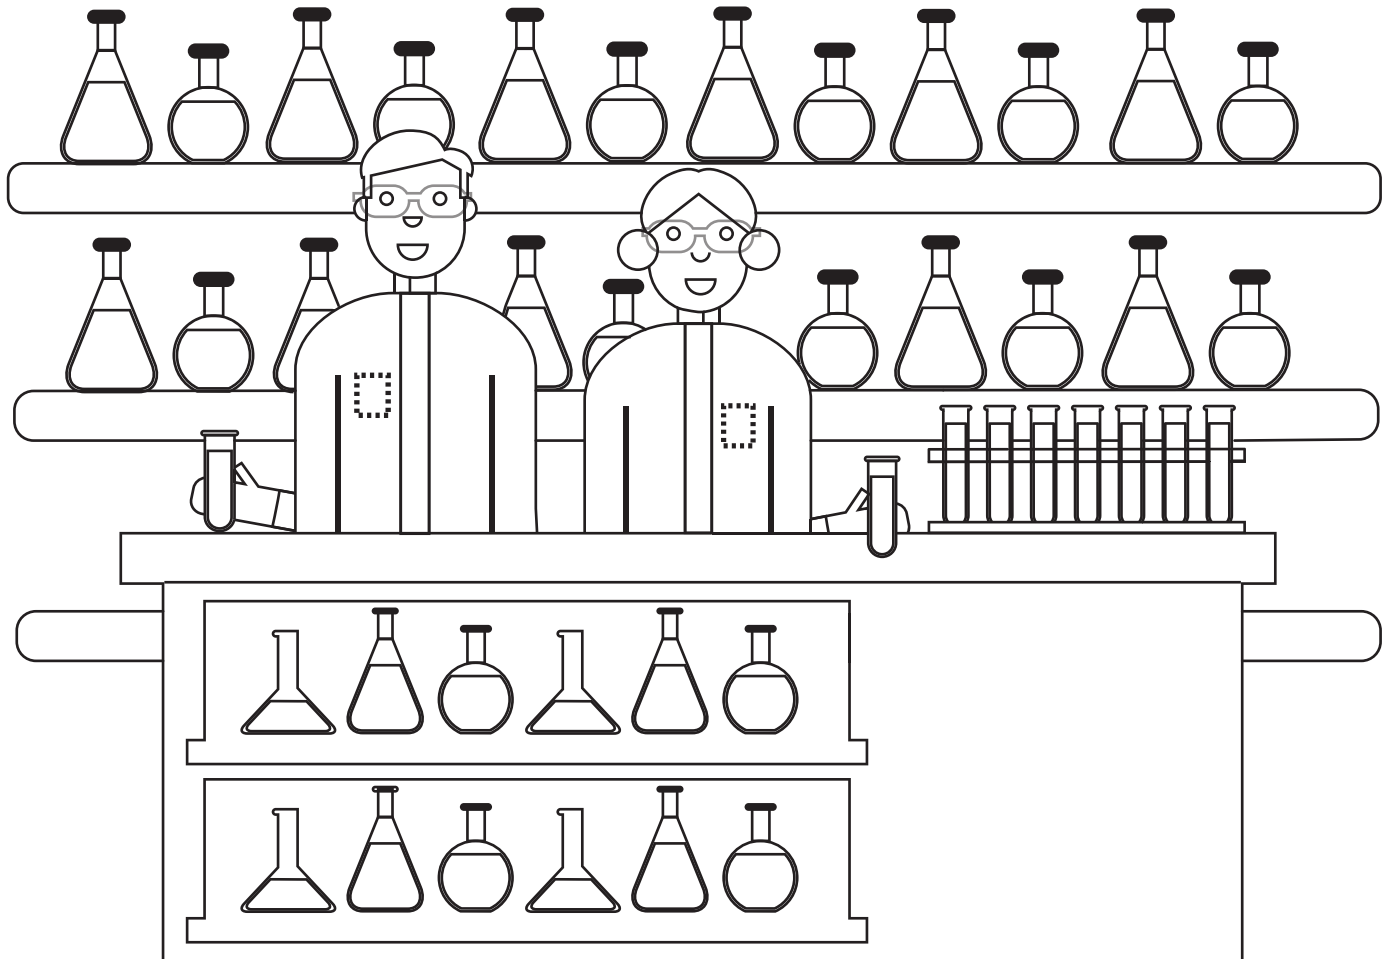

EPCOR

WHERE OUR WATER COMES FROM:

In Edmonton, our water comes from glaciers, snowpack and groundwater. These all flow together to make up the North Saskatchewan River.

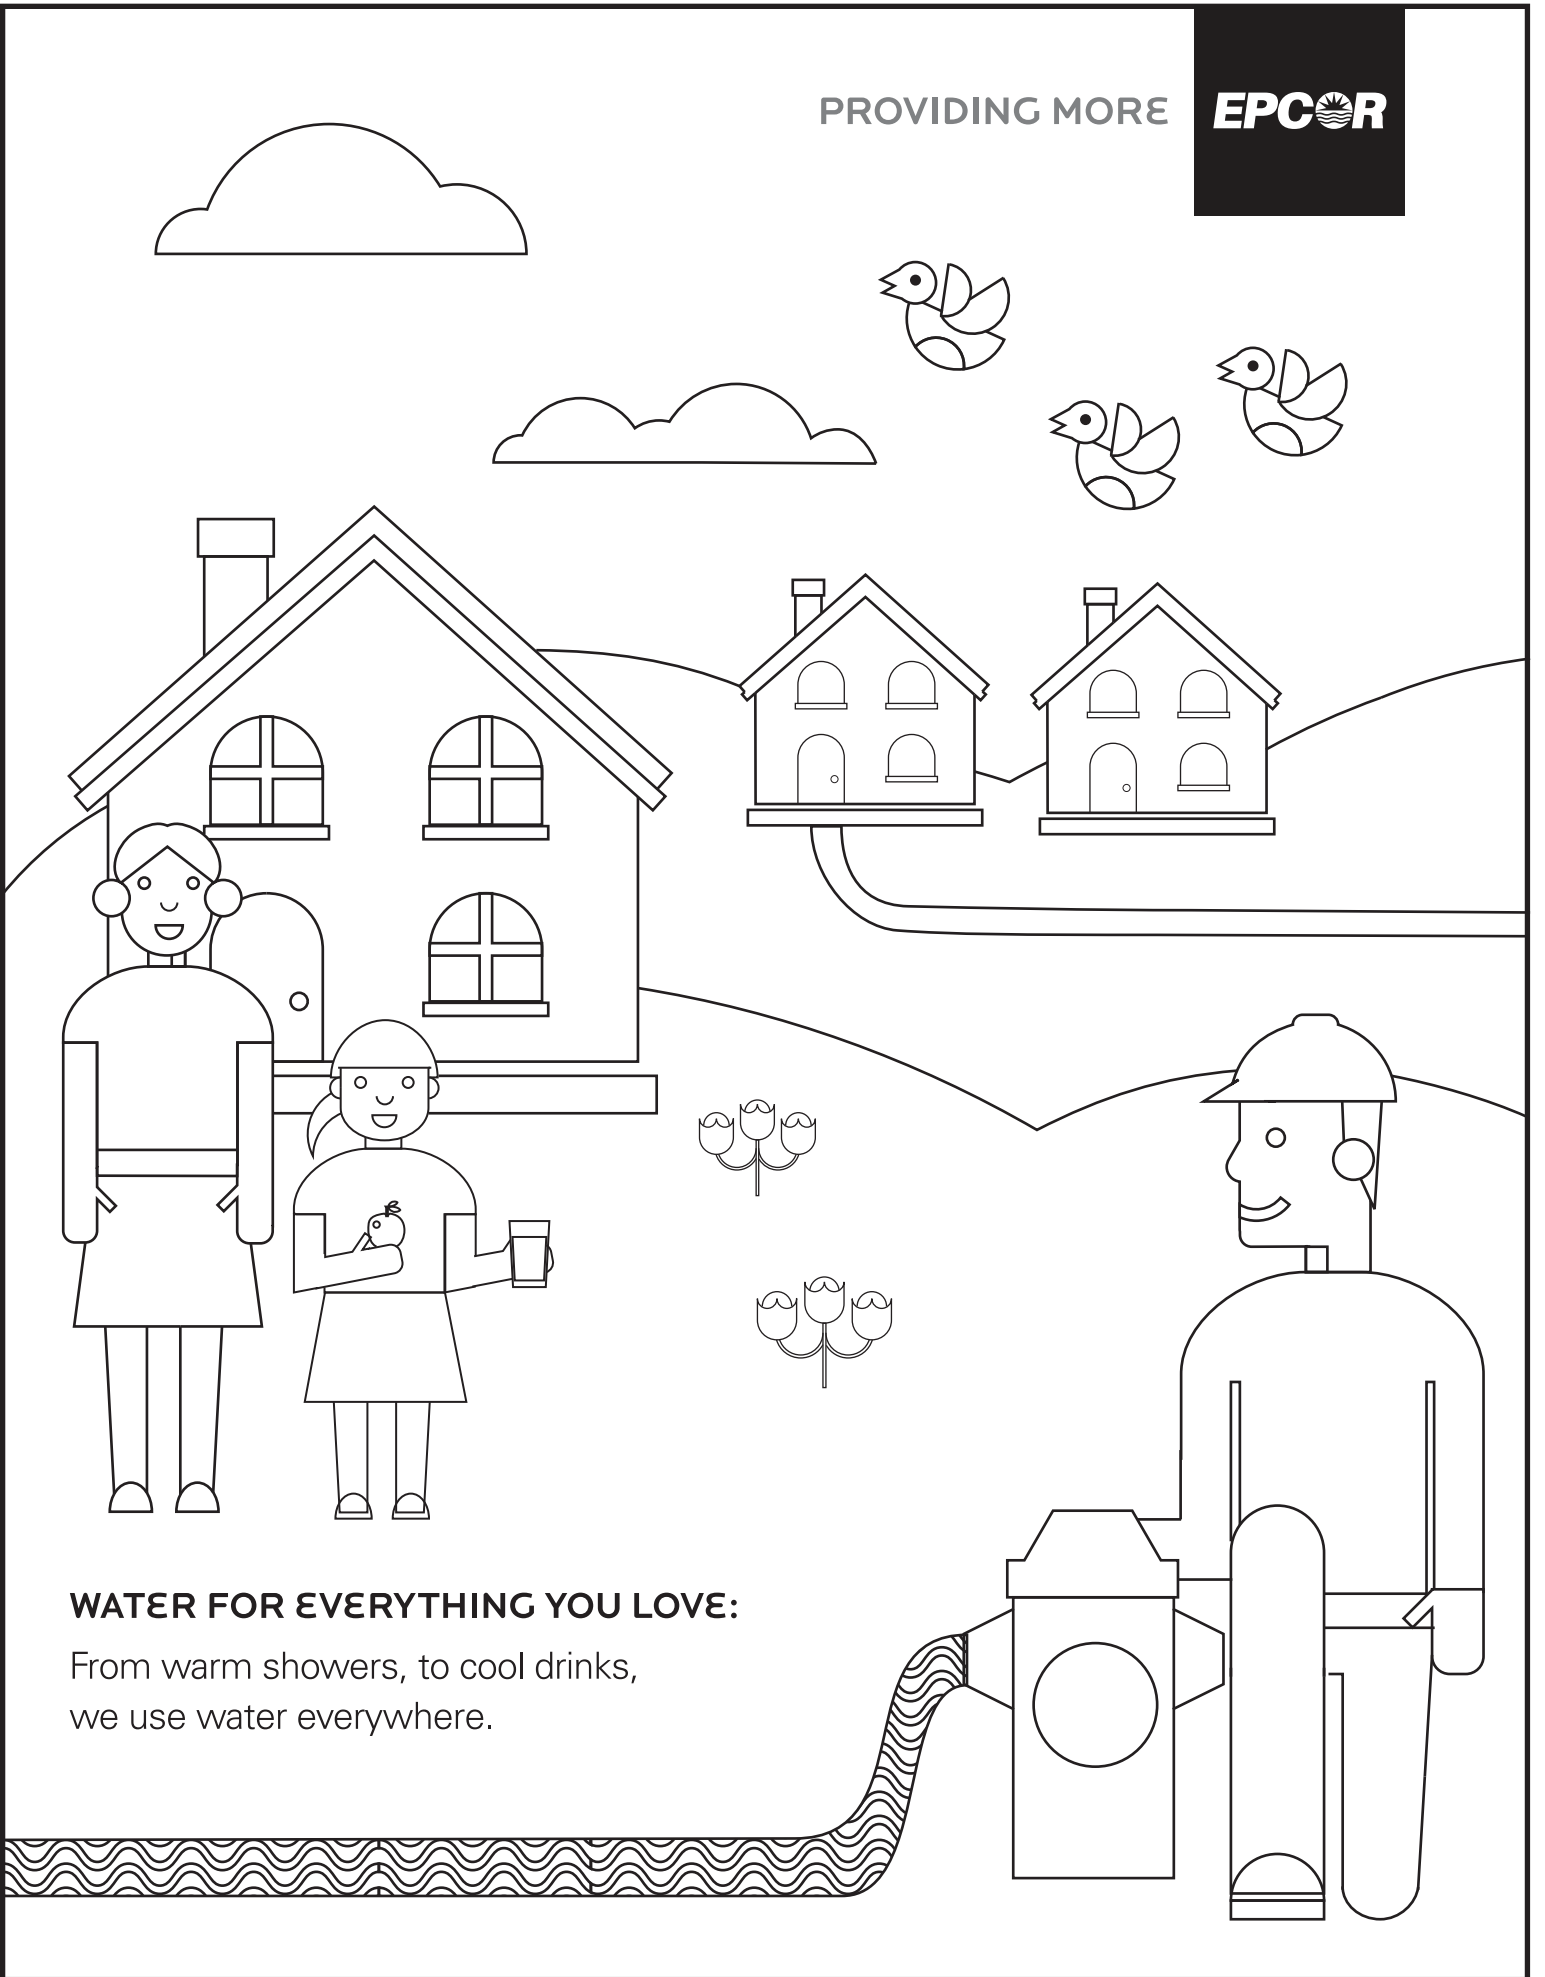

PROVIDING MORE

HOW EPCOR TREATS YOUR WATER:

Water from the North Saskatchewan River is clarified, filtered and disinfected before it reaches your house. EPCOR's Water Specialists also conduct thousands of tests, day and night, to make sure it's safe for you and your family to use.

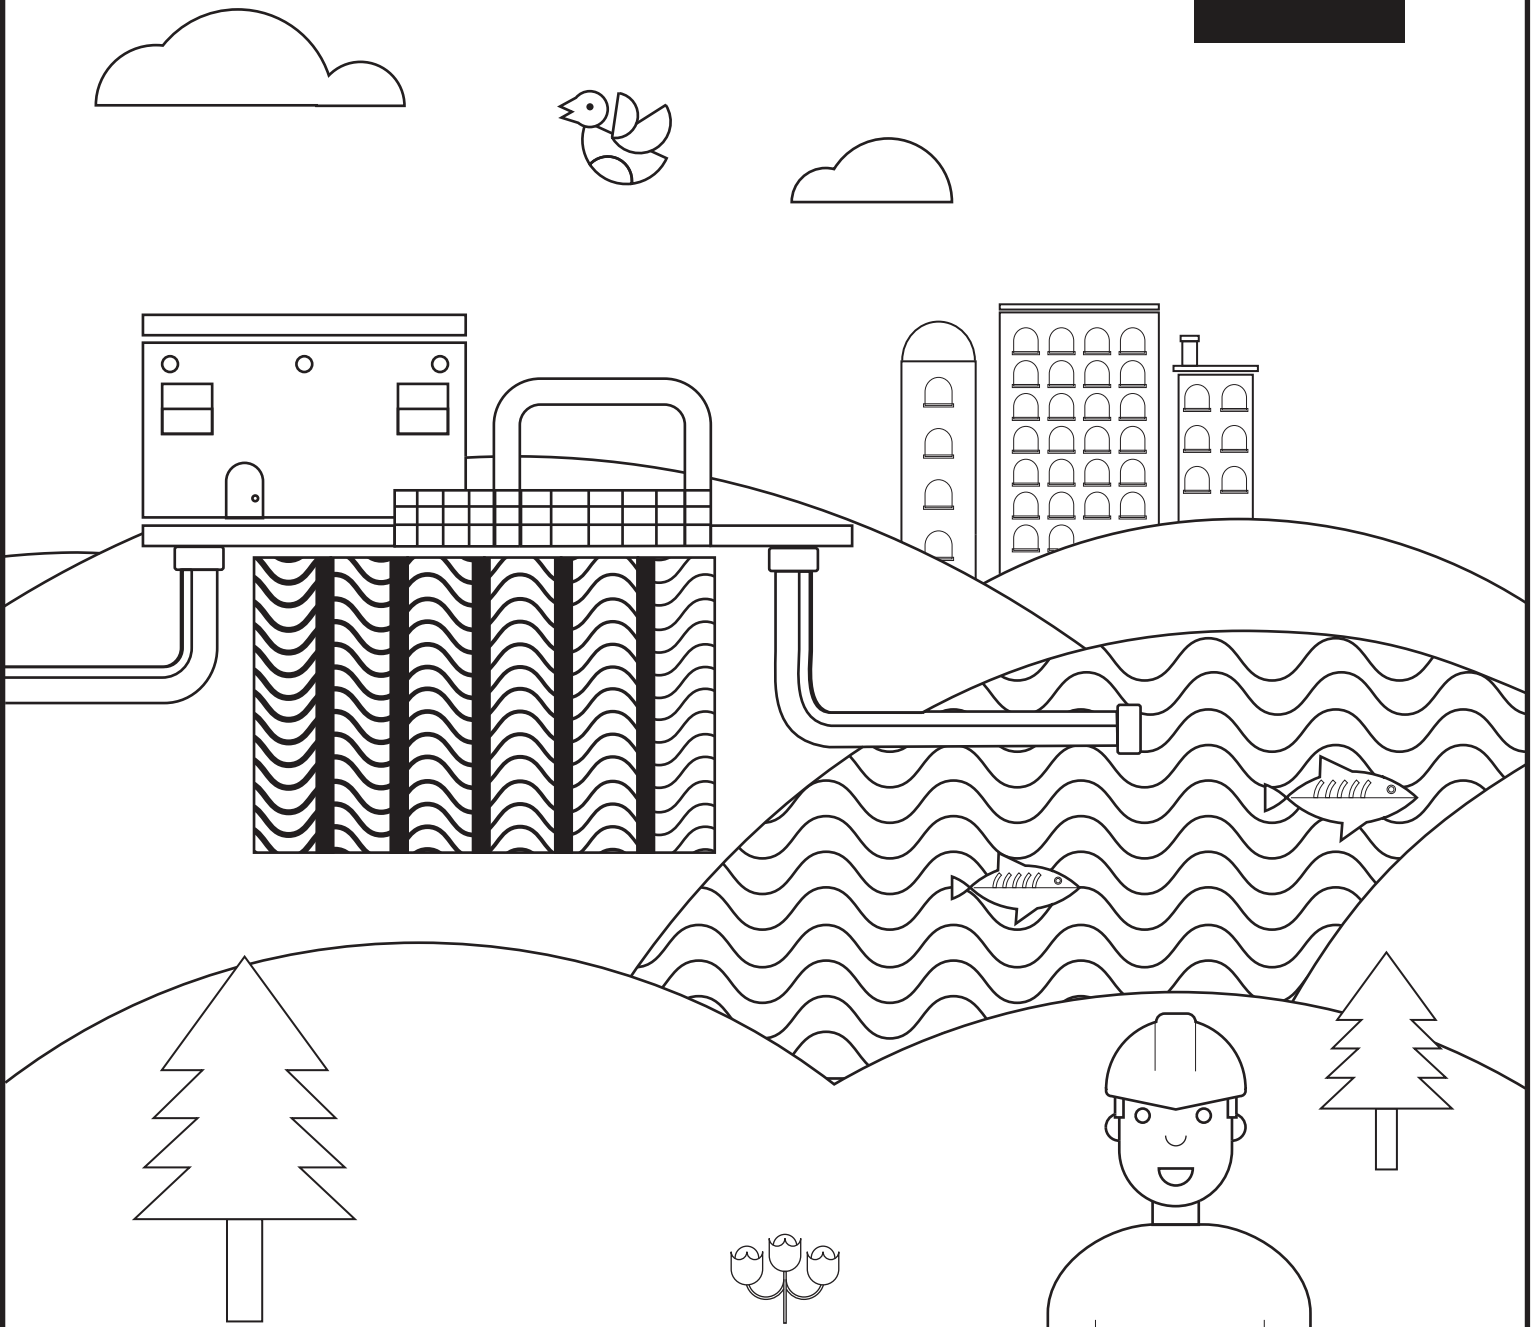

PROVIDING MORE

WATER FOR EVERYTHING YOU LOVE:

From warm showers, to cool drinks,
we use water everywhere.

PROVIDING MORE

WHERE USED WATER GOES:

Every time you take a shower or flush the toilet, that water goes to EPCOR's wastewater treatment plant. We clean and treat the water so that it's safe to put back in the North Saskatchewan River.
